# profi-air® design grills

Exquisite highlight – easy installation

## Easy installation meets stylish appearance

### Design grills – to match any interior style

Exquisite design grills provide a perfect “finish” for heat recovery ventilation. You can decide individually which grill complements the interior style of the respective room best.

Thanks to the sophisticated profi-air series, the ventilation unit, the piping system and the ventilation grill form a true “single-source concept” in terms of quality and functionality.

For a pleasant indoor climate in the entire building and hygienically sound air exchange around the clock.

### The all-round design grills: Easy installation and variability thanks to innovative magnetic fixing

profi-air design grills are a true eye-catcher of heat recovery ventilation systems. As compared to products by other manufacturers, the innovative magnetic fixing ensures easy manual adjustment, and the design grill is reliably attached to the mounting frame. Varying within a wide range of design options is a breeze: simply remove the magnetically attached grill and replace it by a new one! Yet another advantage: profi-air design grills can be installed without any tools in just three simple steps.

#### Practical, flexible installation in just three simple steps:

1. Connect the design grill and the mounting frame.
2. Install them into the air outlet.
3. Align the design grill.

## Benefits at a glance

### **Flexible alignment ...**

---

#### **thanks to unique magnetic fixing**

With the help of unique magnetic fixing, the design grill can be quickly and easily connected to the mounting frame. Then, the grill is simply aligned by hand.

### **Easy installation ...**

---

#### **without any tools**

Installation is as simple as can be: Simply connect the mounting frame and design grill without any tools, and install it in the air outlet.

### **Strong connection ...**

---

#### **of the mounting frame thanks to clamps**

The clamps provide a reliable connection between the mounting frame and the air outlet. It can be undone by means of tools only.

### **Easy cleaning ...**

---

#### **of the ventilation system**

Just one easy move is enough to remove the magnetically fixed grill in order to reach the ventilation system. From here, the entire system can be easily cleaned.

### **Hygienically sound ventilation ...**

---

#### **thanks to integrated filter holder**

Practical adjustable flaps secure the filter in the mounting frame and ensure quick and easy filter exchange – for long-lasting hygienically pure air pipes in the entire building.

### **All designs ...**

---

#### **are quite easy to exchange**

Thanks to the innovative magnetic connection, different types of design grills are any time fully exchangeable.
