Product overview

The product groups at a glance

With this catalogue, Klingspor makes it quick and easy to select the products you need from our huge range of top quality abrasives. The clear and logical layout in fourteen product groups makes it easy for you to find what you are looking for.

State-of-the-art manufacturing techniques ensure that our coated abrasives fulfill the most demanding standards of surface finish, long life and stock removal.

Rolls

Klingspor rolls for hand sanding or use with handheld machines are available in a number of special grades designed for a wide variety of materials – from wood, to metal, to paint.

Belts

Klingspor abrasive belts are available in various sizes and grades to meet all sanding and grinding requirements for a wide range of materials and applications.

Fibre discs

Klingspor fibre discs are exceptionally suited for rough grinding work, derusting metal parts, deburring and working on welded seams.

Quick Change Discs

Klingspor Quick Change
Discs are designed for use on
pneumatic and electric die
grinders. The Quick Change
Discs allow a fast and safe tool
change.

Abrasive strips, sheets and discs

Klingspor strips, sheets and discs are available in various qualities and designs.

Abrasive mop wheels

The abrasive mop wheel is particularly suitable for finishing where flexibility is a must. It matches the contours of any workpiece perfectly. Klingspor has the right abrasive mop wheel for virtually every application and for nearly all types of material.

General information

Product overview

Non-woven products

Klingspor offers a large variety of non-woven products. From rolled goods, belts and wheels to abrasive angle grinder mop discs and abrasive spindle mop varieties.

Wire brushes

Klingspor wire brushes for use on the most diverse cleaning and surface preparation applications on steel and stainless steel.

Abrasive mop discs

The performance of the Klingspor abrasive mop disc, with its fan-shaped radial arrangement of the cloth grinding flaps, far exceeds that of other abrasive products.

Kronenflex grinding discs and cutting-off wheels

Continuous innovation and the development of specialised products for all application areas enables Klingspor to offer a range of grinding discs and cutting-off wheels to satisfy every need.

Retail range

The complete range available with relevant grit ranges and assortments in customised packing units. Uniform packing design with precise product identification for quick access.

Flexible abrasives

Flexible abrasives which were developed by Klingspor for precision finishing and polishing work on all kinds of surfaces.

Carbide burrs

Klingspor carbide burrs are manufactured according to the highest quality standards and with utmost precision. The different cuts are adapted to meet the specific requirements of various materials and applications.

Diamond tools

Klingspor's comprehensive range of diamond tools makes it easy for any user to work faster and with greater precision and endurance. As they are made of carefully tested premium grade materials, the products included in each product line offer a wide range of possible applications and meet the highest safety standards.

K Resin L Glue

Applications guide

Coated abrasives are abrasive products that are made out of more or less flexible backing material upon which grit is anchored with a bonding agent. The product family "coated abrasives" includes abrasive belts, rolls, sheets, strips and discs. They comprise of the following four, optionally also five, components (please refer to the illustration on the right):

- ▶ 1. Backing
- ▶ 2. Base coat
- ▶ 3. Grit
- ▶ 4. Topsize coat
- ▶ 5. Optional: additional coating

Structure

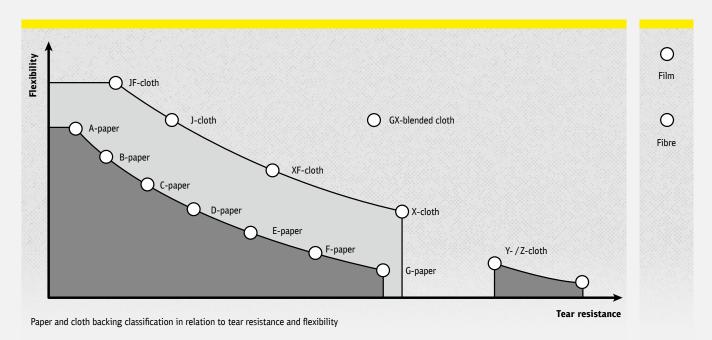

1. Coated abrasive backing

The backing is coated with grit and transfers stock removal forces onto the workpiece. The following backings are primarily used in the manufacture of coated abrasives:

- ► Paper
- ► Cotton cloth
- ► Polyester cloth

In addition, at Klingspor the following backings are used exclusively for individual products and/or for specific requirements/applications:

- ► Fibre (is used exclusively for fibre discs on portable angle grinders)
- ► Film (is used exclusively for the products FP 73 W and FP 73 WK) GX-blended cloth (special cotton/polyester blend for flexible yet highly tear resistant belts)

Applications guide

Backing	Description	Application examples
A – paper	approx. 95 g/m²	profile + surface grinding (hand)
B – paper	approx. 105 g/m²	profile + surface grinding (hand)
C – paper	approx. 110 g/m²	surface grinding (hand)
D – paper	approx. 130 g/m²	surface grinding (hand and machine)
E – paper	approx. 250 g/m²	surface grinding (machine)
F – paper	approx. 300 g/m²	surface grinding (machine)
G – paper	approx. 400 g/m²	surface grinding (machine)
JF – cloth	light, highly flexible	high profiled workpieces (hand and machine)
GX – blended cloth	light, flexible	profiled workpieces (machine)
J – cloth	light, flexible	profiled workpieces (hand and machine)
XF – cloth	heavy, flexible	hand tool belt grinder
X – cloth	heavy, firm	surfaces, edges, rotation bodies (machine)
Y – cloth	heavy, highly firm	surfaces, edges, rotation bodies (machine)
Z – cloth	heavy, highly firm, can be segmented	surface grinding (machine)
Film	polyester film	finish grinding
Fibre	vulcanised fibre	rough and finish grinding

2. Base coat

In the base coat step the grit in anchored. The basic bond is the connection between the grit and the backing. It is primarily formed using resin, this provides it with its consistent high quality properties. Glue is only added to a few abrasive papers that are used with hand operated machines and applications.

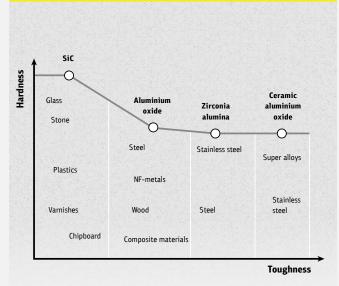

3. Grit

Grit is responsible for stock removal. When selecting the correct grit two properties are particularly important:

- ► Bond
- ► Toughness

All Klingspor grit types are produced synthetically. This ensures a consistently high quality product. Four different grit types are used with coated abrasives:

- ► Silicon carbide
- ► Aluminium oxide
- ► Zirconia alumina
- ► Ceramic aluminium oxide

Grit classification in relation to bond, toughness and their primary applications

Applications guide

Grain type	Bond / toughness	Structure	Properties / wear properties
Silicon carbide (SiC)	very hard / less tough	crystalline	sharp-edged, brittle, highly friable / micro-wear
Aluminium oxide	hard / tough	crystalline, irregular	wedge-shaped, block grain, even wear
Zirconia alumina	hard / very tough	crystalline, even	wedge-shaped, block grain / micro-wear, self-sharpening
Ceramic aluminium oxide	hard / very tough	micro-crystalline	sharp-edged, pointed grit / micro-wear, self-sharpening

Grit type properties and their specific wear properties

Definition	Description				
Close coating	The entire surface of the backing is coated with grit				
Semi-open coating	Approx. 75% of the backing surface is coated with grit				
Open coating	Approx. 50% of the backing surface is coated with grit				

In addition, there are also so-called grit agglomerates. This is not an independent grit type, rather it is a grit agglomeration, which is comprised of many individual aluminium-oxide or SIC-grits mixed with a resin bonding agent, which together form a large grit. Agglomerates are used almost exclusively on abrasive belts.

The advantage of agglomerates is that they provide an even finish from the first use to the last. Dull grit breaks off from the agglomerate and creates space for new, sharp grit. The objective is to attain an even finish through continual stock removal and an extremely long service life.

Coating

Moreover, the coated abrasives are coated with different grit coverage densities. The term "grit density" describes the grit coverage density distributed on the backing.

One differentiates between:

- ► close coating
- ► semi-open coating
- ► open coating

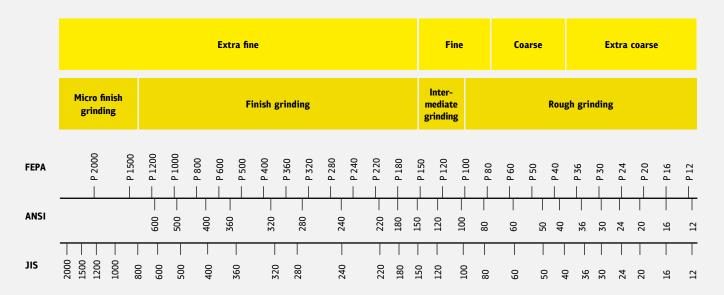

Open coated grit has a large space between the individual grits, such that the stock removal and the grinding dust can be extracted more easily from the grinding surface. This prevents premature clogging when working on long-chipping materials, such as wood.

The decision as to which grit density to use is primarily dependent upon how great the likelihood is that the grinding dust will clog the space between the grits.

Applications guide

Grit size chart

4. Size coat

The size coat supports the base coat in the anchoring of the grit on the backing and against forces which affect the grit during grinding. The cover bonds are produced exclusively from resin and also provide the product with its typical colour (exceptions are coated abrasives with additional coatings).

5. Special coatings

Special coatings with grinding aids provide the grinding tool properties that positively affect the grinding process and extends the service life of the coated abrasive. Special coatings are applied as an additional layer.

Stearate coating:

The stearate on a coated abrasive prevents the clogging and loading of the belt and is specifically suited for high quality varnish surface applications. Paints, varnishes and plastics can become soft and sticky through the heat generated from grinding, this can result in the premature clogging and loading of the belt. The dust clogs the space between the grits and this can result in additional "negative bond". This clogs the grits and the sharp edges are no longer effective. To prevent this from happening or to slow the process down, the coated abrasives can be coated with a non-stick material, so-called stearates.

Multibond:

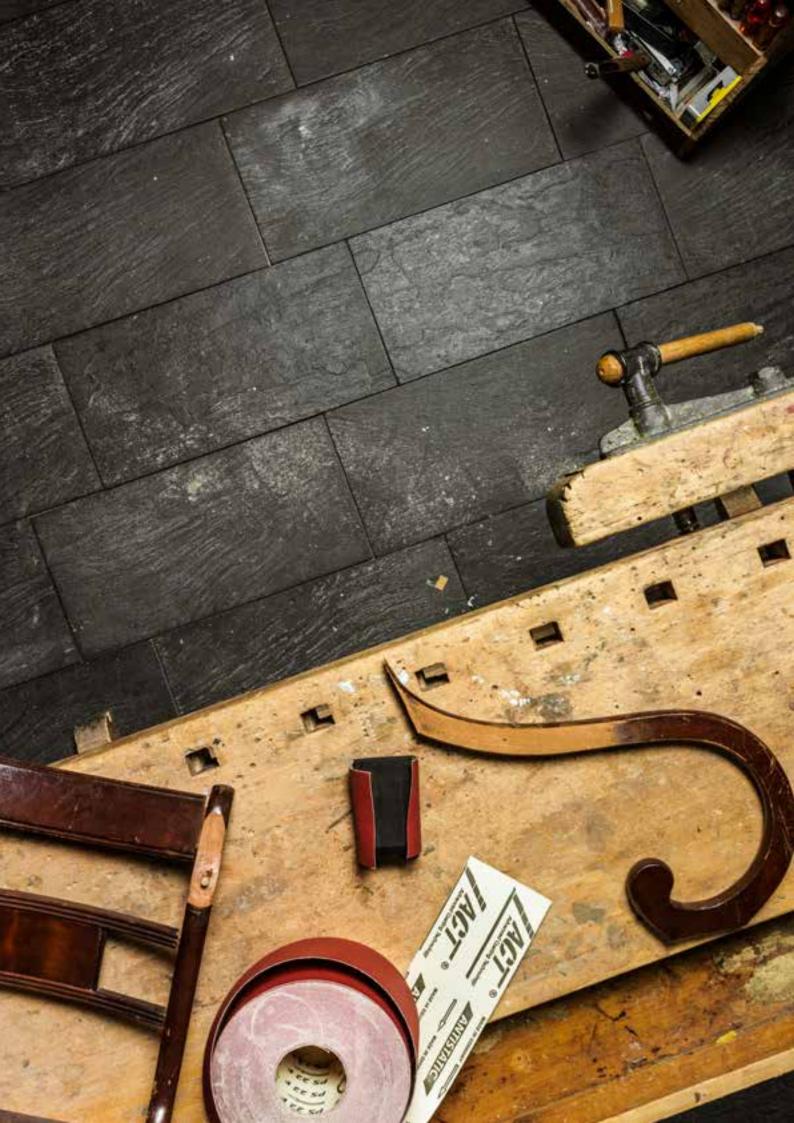

The multibond, like the stearate coating, is applied in an additional production step to the cover bond layer. This allows the cool grinding of stainless steel and high alloy steels, which in turn increases the stock removal rate and service life.

ACT-Advanced Coating Technology:

Klingspor uses this technology to improve the properties of the coated abrasives. When working on metal, ACT provides significantly higher grit adhesion, e.g. for aggressive belt grinding of the edges of punched parts and castings. This significantly increases the life of the grinding belt. For belts that are used for wood and varnish grinding, ACT prevents the premature clogging of the coated abrasives and significantly increases the service life.

Antistatic:

Electrode migration is the result of friction i.e. grinding between different materials, and in turn causes charge separation, which in the case of non-conductive materials, such as wood, results in the load differences not being balanced. In these cases, the coated abrasive is equipped with antistatic properties that ground the electrical charge through the coated abrasive and the machine. This prevents the grinding dust from adhering to the workpiece, belt and machine.

Abrasive screen, self-fastening, waterproof

AN 400

Properties		Applications:	
Bonding ag	ent Resin	Paint/Varnish/Filler	•
Grain	Aluminium oxide	Gel coats	•
Backing	Polyester screen	Plaster	•
		Plasterboard walls	•

DIICATIONS:		
nt/Varnish/Filler	•	Composite materials
coats	•	Wood
ster	•	Wood-based materials

Advantages: Effective and full-surface dust extraction thanks to open grid structure - Dust-free grinding extends the service life of the abrasive - At the same time, improved health and safety thanks to reduced dust formation at the work station - Independent of existing extraction hole patterns - Waterproof

Available grits:

16	24	30	36	40			80	100	120	150	180	220	240	280	320	360	400	600		1000	1200	1500	2000 2

115 x 10000	400	1	353060	1.803,59 ZAR	1

Properties	1
Grain	Graphite
Coating	Lamellar
Backing	X-cloth
Thickness	1,5 mm

Advantages: Reduces friction between the back side of the belt and the contact element - Reduces heat generation during the grinding process - Enables a smooth and constant grinding - **No self-fastening support**

All sizes and minimum purchasing quantities available on request

Abrasive belts

About the product

Applications guide

- ► Suitable for all sanding and grinding operations: with unsupported belt, sander pad and contact wheel
- ► Special designs for customised applications, e.g. for furniture production to enable fast and clean preparation of large surfaces ready for painting
- ▶ Wide range of sizes
- ► Backings made of paper, cloth and film
- ► Superior tear resistance of all products

Application	Туре	Grain	Backing	Coating	Characteristics	Page
	LS 309 J	Al. oxide	J-cotton	•	Flexible abrasive cloth for processing slightly profiled workpieces, high stock removal rate, particularly suited for metal	available on request
	LS 309 JF	Al. oxide	JF-cotton	•	Highly flexible abrasive cloth for highly profiled workpieces for the manufacture of fine surfaces in metal and woodworking	43
	LS 309 X	Al. oxide	X-cotton	•	Universal abrasive cloth for metal and woodworking, good price-performance ratio	available on request
	LS 309 XH	Al. oxide	X-cotton	•	Standard quality for portable belt sanders, especially suited for the processing of metal, wood, paint and varnish	37
Steel	CS 310 X	Al. oxide	X-cotton	•	Abrasive cloth for metal and woodworking with stable cloth backing, for heavy duty with particularly long service life	43, 60
	CS 410 X	Al. oxide	X-cotton	•	Abrasive material with stable cloth backing, multibond for long service life, especially suited for stainless steel processing	available on request
	CS 341 X	Al. oxide	X-cotton waterproof	•	Waterproof abrasive cloth for wet grinding on steel and stainless steel, particularly suited for centreless and surface grinding	available on request
	CS 308 Y	Al. oxide	Y-polyester	•	Polyester abrasive cloth with close coating for working with metal and surface grinding of hardwood	43, 60
	PS 61 F	Ceramic al. oxide	F-paper	•	Close coating, tear resistant backing and continuously self-sharpening cermic grain, the perfect product for users with highest demands on service life, high stock removal rate and process reliability, for the processing of stainless steel surfaces	41, 59
	LS 312 JF	Al. oxide	JF-cotton	•	Highly versatile and flexible premium product for stainless steel components such as fixtures, fittings and surgical instruments	44
	LS 313 JF	Al. oxide	JF-cotton	•	Highly flexible high quality product for stainless steel shaped parts, additional multibond for cool grinding and long service life	available on request
	CS 931 JF	Ceramic al. oxide	JF-cotton	•	Special product with highly flexible backing for use on stainless steel and high alloy steels. Continuously aggressive abrasive performance with a long service life due to semi-open coated self-sharpening ceramic grit. Multibond for "cool grinding" with no discolouration	available on request
	GX 931 JF	Ceramic al. oxide	JF-blended cloth	•	Special highly flexible tear resistant polyester / cotton backed product for stainless steel and high alloy steels; ideal for robot applications. Micro-crystalline ceramic grit with multibond for "cool grinding" and continuously aggressive abrasive performance	available on request
Stainless steel	GX 712 JF	Al. oxide	JF-blended cloth	•	High performance belt with highly flexible, but nonetheless equipped with extremely tear resistant blended cloth backing, tempered aluminium oxide and coated materials	available on request
	CS 329 JF	Al. oxide- agglomerate	JF-cotton		Long life belt with particular long service life and constant scratch pattern. Special product for the dry grinding of slightly and strongly profiled parts in the stainless steel processing industry	available on request
	CS 631 XF	Ceramic al. oxide	XF-cotton	•	Flexible highly efficient belt for best grinding preformance, long service life through self-sharpening ceramic grain for rough and intermediate grinding of contours, profiles and fittings, with multibond for cool grinding	available on request
	CS 411 X	Zirconia alumina	X-cotton	•	High performance belt with high stock removal rate for rough grinding and deburring of steel and stainless steel	available on request
	CS 411 Y	Zirconia alumina	Y-polyester	•	Particularly tear resistant high performance belt with high stock removal rate for rough grinding and deburring of stainless steel and steel	47, 63
	CS 416 Y	Zirconia alumina	Y-polyester	•	Extra tear resistant abrasive belt with high stock removal rates for grinding steel and stainless steel with a semi-open coating	available on request
	CS 409 Y	Zirconia alumina	Y-polyester	•	Extremely tear resistant high performance belt with high stock removal efficiency and long service life due to additional multibond, for stainless steel and high alloy steels, cool grinding	47, 63

Applications guide

Application	Туре	Grain	Backing	Coating	Characteristics	Page
	CS 922 Y ACT	Ceramic al. oxide	Y-polyester	•	Extremely tear resistant high performance belt with self-sharpening ceramic grain for high stock removal efficiency and long service life for processing high alloy steels	50, 66
	CS 920 Y ACT	Ceramic al. oxide	Y-polyester	•	Extremely tear resistant high performance belt with self-sharpening ceramic grain for high stock removal efficiency and long service life for processing high alloy steels, multibond for cool grinding	50, 66
	CS 330 X	SiC/Kork	X-cotton waterproof	•	Special belt for steel and stainless steel on surface belt grinders and circular grinding ma- chines, particularly suitable for satin polishing and finishing	46
Stainless steel	CS 326 Y	Al. oxide- agglomerate	Y-polyester		Long life belt for wet grinding with extremely long service and uniform scratch pattern for centreless circular and surface grinding	46, 62
	CS 329 Y	Al. oxide- agglomerate	Y-polyester		Long life belt with very long service life and constant surface finish for centreless circular and surface grinding. Aggressive grinding behaviour with low tool pressure	46, 62
	CS 420 Y	Al. oxide- agglomerate	Y-polyester		Special product with cylindrical-shaped structured abrasive grain for the centreless finishing of stainless steel. Very long service life and uniform scratch pattern	48
	CS 325 Y	SiC agglomerate	Y-polyester		Long life belt with very long service life and constant surface finish for centreless finishing	available on reques
	CS 451 X	Zirconia alumina	X-cotton	•	Abrasive cloth with a stable backing for use under heavy load. Especially well suited for work on stainless steel	available on reques
	PS 20 F	Al. oxide	F-paper	•	Close coating and heavy, tear resistant backing for high stock removal rate and a long service life for metalworking	available on request
	PS 21 F	Zirconia alumina	F-paper	•	Close coating, tear resistant backing and high quality, self-sharpening zirconia alumina grain for a long service life and high grinding performance particularly on stainless steel surfaces	39, 56
	PS 529 F	SiC agglom- erate	F-paper		Long life abrasive belt for a brilliant and glossy finish at low to medium tool pressure. Extra long service life at consistent surface roughness. Ideal for dry sanding applications performed with wide belt and long belt sanders	availa- ble on request
	PS 729 F	Al. oxide- agglomerate	F-paper		Long life belt for dry grinding applications, for a constant surface quality for pre-grinding until finishing. Specially developed for coil and sheet grinding with intermediate contact pressure	41, 59
	CS 412 Y	Al. oxide	Y-polyester	•	Sturdy and highly tear resistant polyester backing for coarse and intermediate grinding on metal	47, 64
	CS 310 XF	Al. oxide	XF-cotton	•	Flexible abrasive cloth for profiled metal formed parts, standard quality for use with hand tool belt grinders	44
Steel / Stainless steel	CS 411 X	Zirconia alumina	X-cotton	•	High performance belt with high stock removal rate for rough grinding and deburring of steel and stainless steel	available on reques
Jea e33 3 .cc .	CS 411 Y	Zirconia alumina	Y-polyester	•	Particularly tear resistant high performance belt with high stock removal rate for rough grinding and deburring of stainless steel and steel	47, 63
	CS 416 Y	Zirconia alumina	Y-polyester	•	Extra tear resistant abrasive belt with high stock removal rates for grinding steel and stainless steel with a semi-open coating	available on reques
	CS 330 X	SiC/Kork	X-cotton waterproof	•	Special belt for steel and stainless steel on surface belt grinders and circular grinding machines, particularly suitable for satin polishing and finishing	46
	CS 710 XF	Al. oxide	XF-cotton	•	Flexible abrasive belt for working on surfaces and mouldings	available on reques
	CS 729 X	Al. oxide- agglomerate	X-cotton		Long life abrasive belt for wet and dry sanding with exceptionally long service life. Specially developed for surface grinding at medium contact pressure - Optimum workpiece adaptation due to semi-flexible and tear-resistant cotton backing	48, 65
	CS 811 Y ACT	Zirconia alumina	Y-polyester	•	Excellent grain adhesion, stable, highly tear-resistant polyester backing for particularly high duty during rough grinding and deburring of steel and stainless steel. High quality zirconia alumina for highest aggressiveness over the complete service life	available on reques
	CS 333 JF	SiC	JF-cotton	•	Highly flexible abrasive belt for metal shaped parts, particularly suited for NF metals	available on reques
	CS 333 XF	SiC	XF-cotton	•	Flexible abrasive belt for metal shaped parts, particularly for NF metals	available on reques
NE . 1	GX 533 JF	SiC	JF-blended cloth	•	Flexible belt with aggressive, hard SiC grit and flexible blended cloth backing for grinding profiles, contours and formed/shaped parts, e.g. fittings	48
NF metals	GX 712 JF	Al. oxide	JF-blended cloth	•	High performance belt with highly flexible, but nonetheless equipped with extremely tear resistant blended cloth backing, tempered aluminium oxide and coated materials	available on reques
	PS 20 FW	Al. oxide	F-paper	•	Special product with improved clogging behaviour and significantly increased service life due to additional stearate coating. Special product for grinding aluminium and non-ferrous metals	39, 56
	LS 314 JF	Al. oxide	JF-cotton	•	Special product with stearate coating for working on slightly profiled and profiled workpieces	available on reques
	PS 22 F ACT	Al. oxide	F-paper	•	Close coating for maximum stock removal and uniform scratch pattern regarding surface treatment of hard, low content woods. Advanced Coating Technology (ACT) and antistatic properties prevent premature clogging	39, 57
Mond	PS 28 F	Al. oxide	F-paper	0	Open coating and antistatic properties prevent premature clogging of the belt with grinding dust, sturdy, tear resistant backing, for all kinds of wood, particularly soft and high resin woods, e.g. spruce, pine	available on reques
Wood	PS 29 F ACT	Al. oxide	F-paper	0	Abrasive belt with outstanding service life. Open coating, antistatic properties as well as Advanced Coating Technology (ACT) prevent premature clogging. The abrasive paper is particularly suitable for processing soft and high resin woods	40, 58
	PS 38 G ACT	SiC	G-paper	•	Special product with very strong and robust G-weight paper backing, excellent antistatic properties and sharp-edged silicon carbide grain, for finishing of particle boards and fibre-	available on request

Abrasive belts

Applications guide

Application	Туре	Grain	Backing	Coating	Characteristics	Page
	LS 309 X	Al. oxide	X-cotton	•	Universal abrasive cloth for metal and woodworking, good price-performance ratio	available on request
	LS 309 XH	Al. oxide	X-cotton	•	Standard quality for portable belt sanders, especially suited for the processing of metal, wood, paint and varnish	37
	CS 311 Y ACT	Al. oxide	Y-polyester	0	Aluminium oxide quality with an open coating on tear resistant polyester backing for calibration and intermediate grinding when working with wood	44, 61
	CS 308 Y	Al. oxide	Y-polyester	•	Polyester abrasive cloth with close coating for working with metal and surface grinding of hardwood	43, 60
Wood	LS 318 JF ACT	Al. oxide	JF-cotton	0	Highly flexible J-Flex backing for intermediate sanding and finishing of highly profiled and curved wooden parts. Advanced Coating Technology (ACT) and antistatic properties prevent premature clogging	available on request
	CS 538 Z ACT	SiC	Z-polyester (can be segmented)	•	Special product for the timber products industry. A close coating and antistatic technology ensure an optimal service life. The sharp silicon carbide easily penetrates high density material surfaces	64
	CS 336 Y	SiC	Y-polyester	•	Special product for calibrating and grinding of chipboard	available on request
	CP 540 Z	SiC	Kombi	•	Special product with a combination of paper and blended cloth. Extremely tear resistant and stable. Best results in respect to service life and finish with constant stock removal	available on request
	PS 24 F ACT	SiC	F-paper	•	Close coating, a stable backing with hard silicon carbide grit for painted and coated surfaces in the timber and especially the furniture industry	40, 58
	PS 27 DW	SiC	D-paper	0	Open coating and a special stearate coating prevent premature clogging and loading of the belt. Special product for high quality varnish surfaces, particularly UV varnish	available on request
Paint / Varnish / Filler	PS 524 E	SiC	E-paper	•	Close coating with hard silicon carbide grain for painted and filled surfaces in the wood and furniture industry	40, 57
rillei	FP 73 W	Al. oxide	Film	•	Special product with very tear resistant film backing for the processing of paint, varnish and filler with high service life through additional special coating	available on request
	FP 77 K T-ACT	Al. oxide	Film	•	High-performance abrasive product with new innovative coating technology that keeps the disc from clogging prematurely during the sanding of strongly adhesive materials. Fine and finish sanding with an exceptionally level and tear-resistant film backing	42
Plastic	GX 533 JF	SiC	JF-blended cloth	•	Flexible belt with aggressive, hard SiC grit and flexible blended cloth backing for grinding profiles, contours and formed/shaped parts, e.g. fittings	48
Glass	CS 322 X	(Cork)	X-cloth waterproof		Special belt for polishing glass	45
	CS 333 X	SiC	X-cotton	•	Abrasive cloth with tear resistant backing for heavy duty and long service life for the processing of glass, ceramics, plastic and scale (dry grinding)	available on request
Plastic / Glass	CS 320 Y	SiC	Y-polyester	•	Highly tear resistant special belt for high demands for wet and dry grinding of glass, ceramic and plastic	45, 61
	CS 321 X	SiC	X-cotton	•	Special belt for wet and dry grinding of glass, ceramic and plastic	36, 45

Minimum order quantities for made to order items

Width	Minimum order quantities
3 – 50 mm	30 pieces
51 – 60 mm	25 pieces
61 – 75 mm	20 pieces
76 – 100 mm	15 pieces
101 – 150 mm	10 pieces
151 – 300 mm	10 pieces
301-399 mm	30 pieces
400 mm and wider	10 pieces

We reserve the right to over-deliver or under-deliver made to order items.

The minimum length of production belts is 281 mm (cloth and paper backing)

Other sizes and grits available on request.

Short and long belts

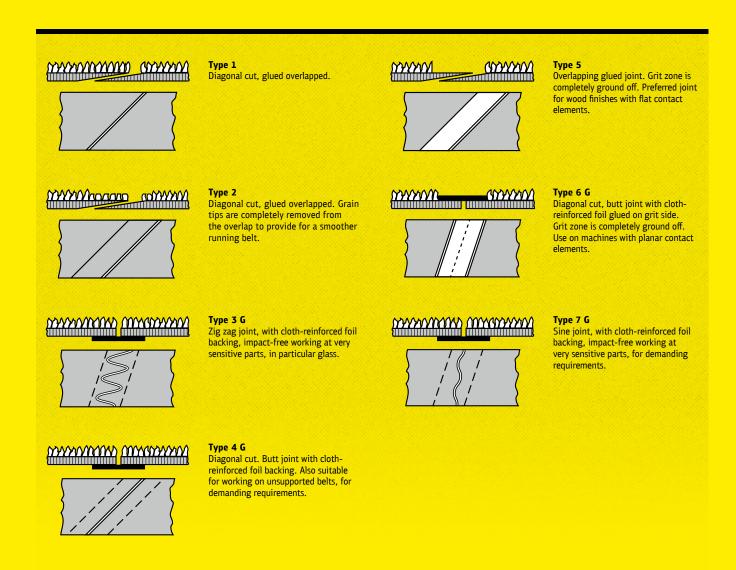

Applications guide

Belt joints for long and short belts

Klingspor supplies belts with various types of joints. The type of joint you require depends on the work involved and the machine you are using. The following illustrations show the usual types of joint.

The available types of joint are listed in the product charts on the following product pages.

If the product you require is not in stock, we will manufacture it for you subject to a minimum order quantity.

The chart alongside contains all the standard types of machines. Please contact us if you cannot find the machine used by you on this list. We will be pleased to assist you further.

Coated abrasives

Advantages: High aggressiveness and long service life due to self-sharpening zirconia alumina - Specially developed for rough grinding through finish grinding of stainless steel surfaces

Available grits:

16 24 30 36 40 50 60 80 **100** 120 **150** 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

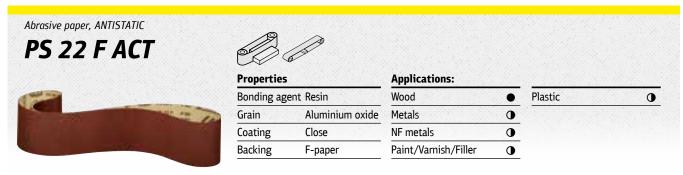

Advantages: Special product with improved clogging behaviour and significantly increased service life due to additional stearate coating - Specially for grinding aluminium and non-ferrous metals

Available grits:

16 24 30 36 40 50 60 **80** 100 **120 150 180** 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

Advantages: High removal rate, fine surface scratch pattern - Specially developed for finish grinding of hardwood - Reduced clogging and longer service life due to ACT recipe and antistatic properties

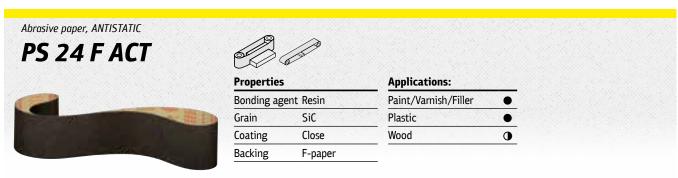

Available grits:

16 24 30 36 **40** 50 **60 80 100 120 150 180** 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

Coated abrasives

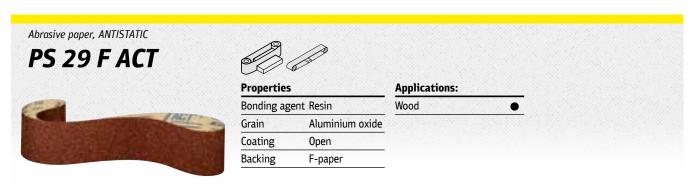

Advantages: For hard and tough surfaces - Finely sanded and varnish surfaces in the wood and furniture industry - Long service life due to ACT recipe and antistatic properties

Available grits:

16 24 30 36 40 50 60 80 100 120 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request

Advantages: High-quality universal belt for general woodworking, especially softwood - Reduced clogging and longer service life due to ACT recipe and antistatic properties

Available grits:

16 24 30 36 **40 50 60 80 100 120 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000**

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

Coated abrasives

Properties								
Bonding agent Resin								
Grain	Ceramic Al. oxide							
Coating	Close							
Backing	F-paper							

Applications:	
Stainless steel	
Steel	
Wood	

Advantages: Continuously aggressive abrasive behaviour due to micro-crystalline and self-sharpening ceramic grit - High-performance abrasive belt for stainless steel finish grinding - The PS 61 F belt includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Available grits:

16 24 30 36 40 50 **60 80** 100 **120 150 180 220 240 280 320 360 400** 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

Properties Bonding agent Resin Grain Al. oxide agglom. Coating Close Backing F-paper

Applications: Stainless steel Steel

Advantages: Long life belt for dry grinding applications - Extremely high service life - Constant surface quality for pre-grinding until finishing - Especially developed for grinding with intermediate contact pressure

Available grits:

16 24 30 36 40 50 60 80 100 120 150 **180** 220 **240** 280 **320** 360 400 500 600 800 1000 1200 1500 2000 2500 3000

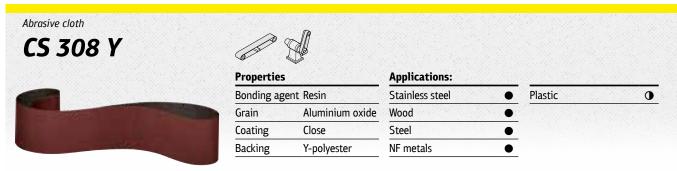

All sizes and minimum purchasing quantities available on request. All available grits see page 9.

Coated abrasives

Coated abrasives

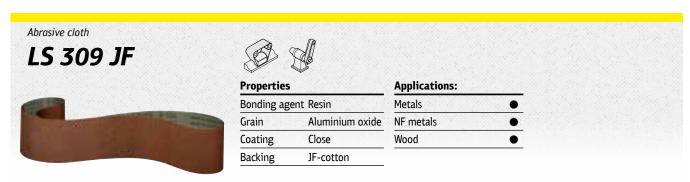

Advantages: Tear-resistant universal abrasive cloth for metalworking and for hardwood finish grinding - Excellent removal rate under high stress

Available grits:

16 24 30 36 40 50 **60 80 100 120 150 180** 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

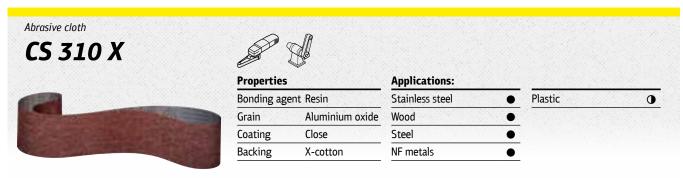

Advantages: High removal rate in metalworking and woodworking - Very good adaptation to radiuses and contours due to highly flexible cotton backing

Available grits:

16 24 30 36 40 50 60 **80 100 120 150 180 220** 240 280 **320 360 400 500 600** 80 100 1200 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

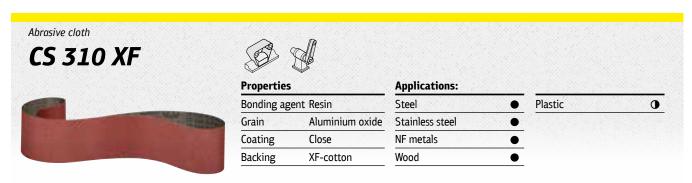

Advantages: High-quality universal type for metalworking and woodworking - Good removal rate under high stress

Available grits:

16 24 30 36 40 50 60 80 100 120 150 180 **220** 240 280 **320** 360 **400** 500 **600** 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

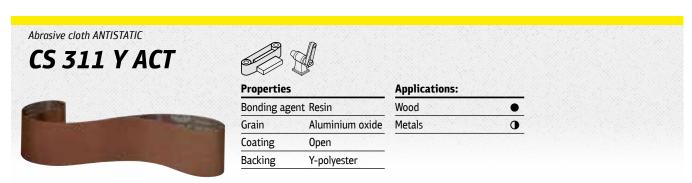

Advantages: Flexible, tear-resistant universal product for processing lightly profiled or shaped metal parts

Available grits:

16 24 30 36 **40** 50 **60 80 100 120 150 180** 220 **240** 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

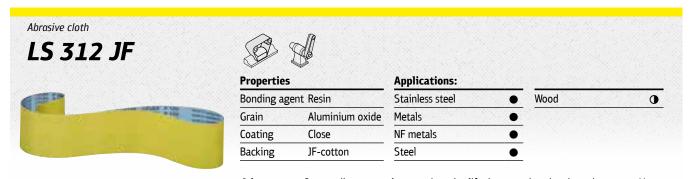

Advantages: Good removal rate for working on wood under high stress - Minimal clogging and long service life due to ACT recipe and antistatic properties

Available grits:

16 24 30 36 **40** 50 **60 80 100 120 150 180 220** 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Advantages: Outstanding removal rate and service life due to active abrasive substances - Very good adaptation to radiuses and contours due to highly flexible cotton backing

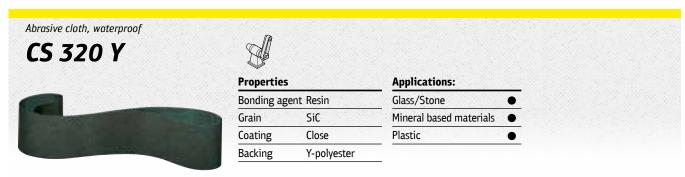

Available grits:

16 24 30 36 40 50 60 80 **100 120 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000**

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

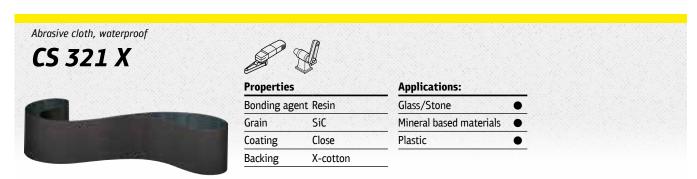

Advantages: Outstanding abrasive performance on hard and difficult-to-machine materials - Ideal for high stress - Can be used wet or dry

Available grits:

16 24 30 36 40 50 **60** 80 100 120 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

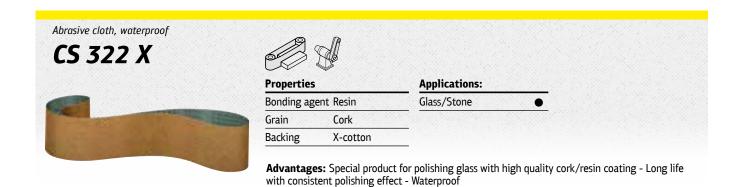

Advantages: Outstanding abrasive performance on hard and difficult-to-machine materials - Ideal for wet grinding, but also suitable for dry grinding

Available grits:

16 24 30 36 40 50 60 **80 100 120 150 180 220 240** 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

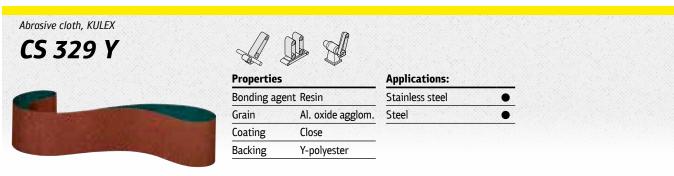

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

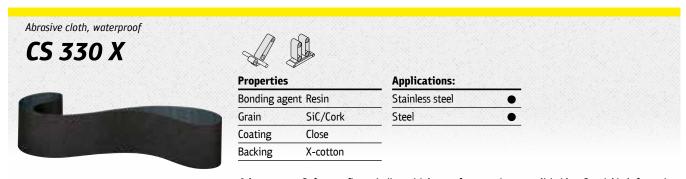

Advantages: Long-life abrasive belt for a satin surface scratch pattern, under low to medium grinding pressure - Especially suitable for dry grinding

Available grits:

16 24 30 36 40 50 60 80 100 **120** 150 180 220 240 280 **320** 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Advantages: Soft, very fine grinding with low surface roughness, polishable - Special belt for satin final finishing of stainless steel and steel surfaces with cork granulate with SiC/resin coating

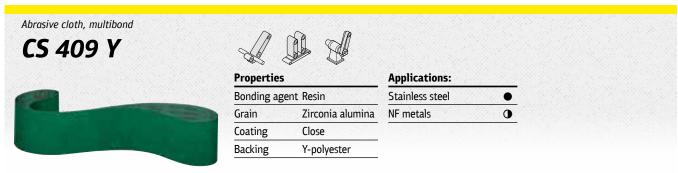

Available grits:

16 24 30 36 40 50 60 80 100 120 150 180 **220** 240 280 320 360 **400** 500 **600 800** 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

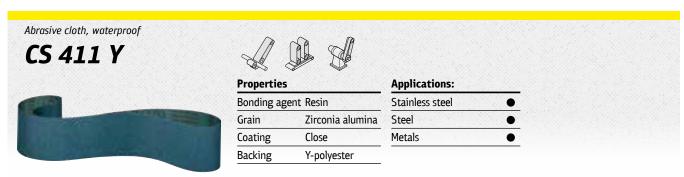

Advantages: Aggressive abrasive behaviour - Cool grinding and increased grinding performance on stainless steel and high-alloy steels due to additional multibond - Very long service life also when used for grinding of non-ferrous metals

Available grits:

16 24 30 **36** 40 50 **60 80 100 120** 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

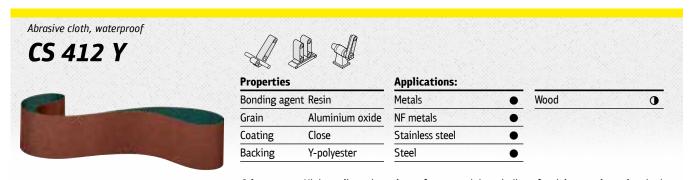

Advantages: Tear-resistant high-performance belt - Especially high aggressiveness and abrasive performance due to active abrasive substances - Especially for stainless steel, but also for steel and metal in general

Available grits:

16 **24** 30 **36 40** 50 **60 80 100 120** 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

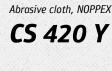

Advantages: High-quality universal type for wet and dry grinding of stainless steel, steel and other metal surfaces

Available grits:

16 24 30 **36 40** 50 **60 80 100 120 150** 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

Ceramic Al. oxide

Close

JF-cotton

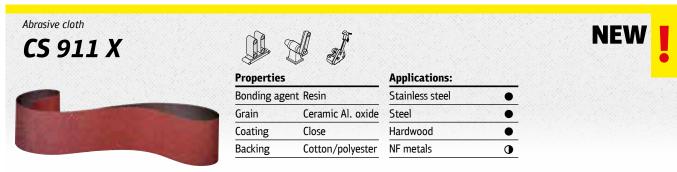

NF metals Metals

Advantages: Special product with highly flexible cotton backing for processing non-ferrous metals, stainless steel and steel - Continuously aggressive grinding behaviour due to self-sharpening ceramic grain and grinding-active additives - Grinding of heavily profiled workpieces in the metal industry - The LS 912 JF belt includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Available grits:

36 40 50 **60 80 100 120 150 180** 220 **240** 280 **320** 360 **400** 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

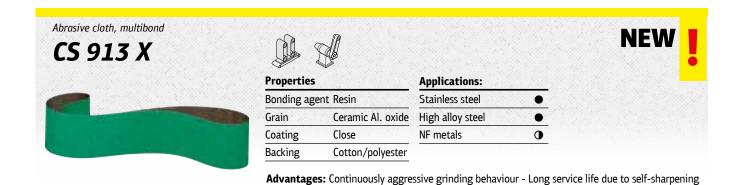

Advantages: Self-sharpening ceramic grit for coarse and intermediate grinding in the steel and stainless steel processing industry and for parquet sanding

ceramic grit - The additional multibond provides a "cool grinding" in the processing of stainless steel and thus tempering colours are avoided - No premature clogging on aluminium

Available grits:

40 60 **80 100 120** 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000 50

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

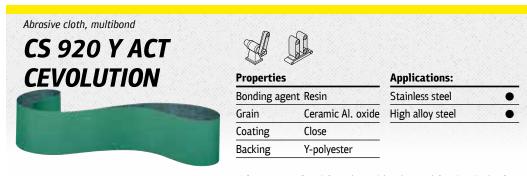

Available grits:

60 80 100 120 150 180 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Coated abrasives

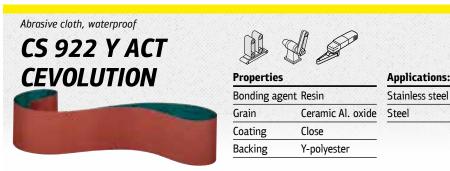

Advantages: Special product with Advanced Coating-Technology (ACT) - Excellent grit adhesion - Highly tear-restistant polyester backing and self sharpening ceramic grain for rough, and intermediate grinding of stainless steel and high alloyed steel at high loads - Higher service life and cool grinding due to special coating with active multibond - The CS 920 Y belt includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Available grits:

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Advantages: Continuously aggressive grinding behaviour - Long service life due to self-sharpening ceramic grit - Very high grain adhesion thanks to Advanced Coating Technology and highly tearresistant polyester backing - The CS 922 Y belt includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Available grits:

16 24 30 **36 40 50 60 80 100 120 150 180** 220 240 280 320 360 400 500 600 800 1000 1200 1500 2000 2500 3000

All sizes and minimum purchasing quantities available on request. All available grits see page 11.

Applications guide

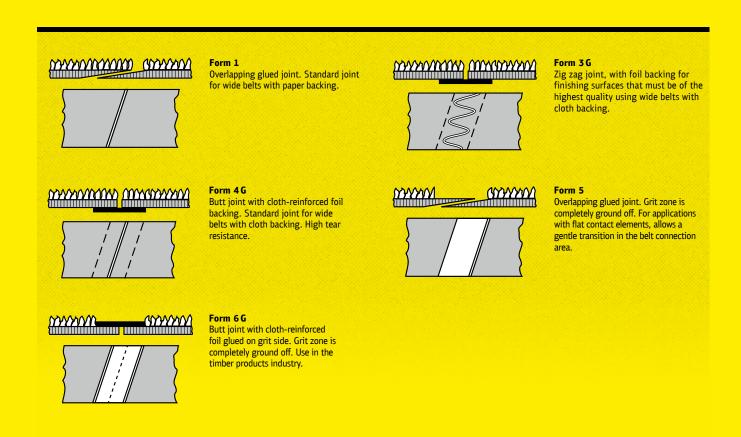

Belt joints for wide belts

Klingspor supplies belts with various types of joint. The type of joint you require depends on the work involved and the machine you are using.

The following illustrations show the usual types of joints. The available types of joints are listed in the product charts on the following pages.

The chart alongside contains all the standard types of machines for wide belts. Please contact us if you cannot find the machine used by you on this list. We will be pleased to assist you further.

If the product you require is not in stock, we will manufacture it for you subject to a minimum order quantity.

Coated abrasives

About the product

Klingspor fibre discs have high material removal rates and service life, producing an optimal finish. Suitable backing plates complete the product range.

Areas of use are steel, stainless steel, non-ferrous metal and cast iron. The comprehensive grit range makes it possible to select the right tool for every application. Even the most difficult of surfaces can be worked on easily with the fibre discs.

Klingspor fibre discs are outstanding for rough grinding and sanding, de-rusting metal parts, deburring and grinding welded seams. These discs are also suitable for precision finishing work on metals.

The state-of-the-art laser cutting technology allows special shapes for specific applications.

Quality and performance

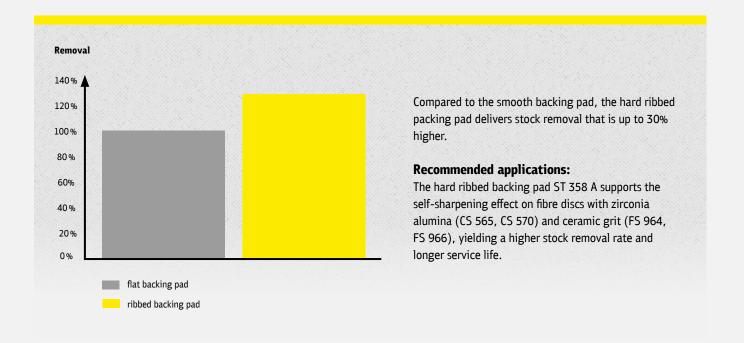

- ► Low clogging rate
- ► Market leading service life
- ► Even grinding finish
- ► Cool grinding

	Applications Fibre Discs					
Application	Туре	Grain	Backing	Coating	Characteristics	Page
Steel / NF metals	CS 561	Aluminium oxide	Fibre	•	Abrasive fibre disc for working on steel and NF metals	72
	FS 764 ACT	Aluminium oxide	Fibre	•	Abrasive fibre disc for processing steel and non-ferrous metals. High aggressiveness and long service life due to new Advanced Coating Technology	available on request
Steel /	CS 565	Zirconia alumina	Fibre	•	Abrasive fibre disc with high stock removal rate for rough grinding and deburring of steel and stainless steel	73
Stainless steel	FS 964 ACT	Ceramic aluminium oxide	Fibre	•	Premium fibre disc with microcrystalline, self-sharpening ceramic grit delivering superior aggressiveness and removal on construction steel and high-alloy steels. Outstanding grit adhesion and service life thanks to Advanced Coating Technology	75
	CS 570	Zirconia alumina	Fibre	•	High performance fibre disc with additional multibond for high stock removal rate and long service life for cool grinding on stainless steel and high-alloy steel, especially for surface grinding	74
Stainless steel	FS 966 ACT	Ceramic aluminium oxide	Fibre	•	High performance fibre disc with very high stock removal rate and extremely long service life, with self-sharpening ceramic grain for the processing of high-alloy steel, multibond for cool grinding. Improved grit adhesion due to Advanced Coating Technology	76

Applications guide

Technical information about the backing pad

	The right	The right backing pad				
Product	ST 358	ST 358 A				
Backing pad form	Medium hard, flat	Hard, ribbed				
	Even grinding finish, good adaptation to the workpiece	High material removal rates, high stability				
Benefit		Additional benefit of our ribbed backing pad: increased aggression, cool grinding				
Application	Finish grinding (grit 50 and finer), edge rounding, contour grinding, surface grinding	Rough grinding (up to grit 40 and coarser), chamfering, deburring work, welded seam work				

The safe use of Klingspor abrasives

Klingspor fibre discs have been tested according to the guidelines of the oSa directives and are guaranteed to comply with European safety standard EN 13743

Wear safety goggles or glasses to protect the eves

Wear safety gloves to protect hands

Observe safety instructions

Do not use for wet grinding

Only permitted with a backing pad

Do not use if damaged

Applications guide

Hole pattern for fibre discs

10 = round hole 30 = star sha hole

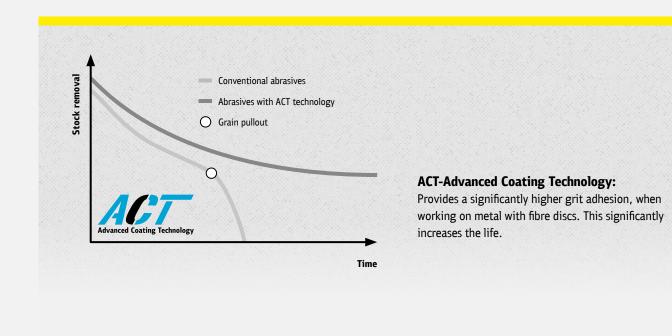

Additional special cutting shapes are available on request. Please ask for more information.

Minimum order quantities for made to order items

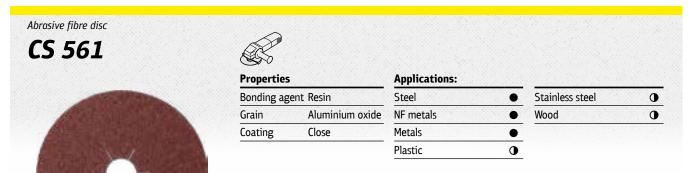

We reserve the right to over-deliver or under-deliver made to order items.

Disc diameter Minimum order quantities
up to 235 mm 1,000 pieces

Coated abrasives

Strips/Sheets/Discs

About the product

Klingspor manufactures a very large selection of high quality abrasive products for the strips, sheets and discs product sectors.

Application	Туре	Grain	Backing	Coating	Characteristics	Page
	NPA 400	Aluminium oxide	Non-woven web		Non-woven web hand pad, suited to deburring, cleaning and surface finishing	159
Stainless steel	NDS 800	Aluminium oxide	Surface conditioning material		Premium surface conditioning disc with extra strong edges for demanding applications. Suited to rough cleaning work, deburring and working on weld seams	160
	SV 484	Aluminium oxide	Surface conditioning material		Standard surface conditioning disc, superb value for money for finishing surfaces, slightly contoured surfaces	160
Steel / stainless steel	PS 21 FK	Zirconia alumina	F-paper	•	Premium self-fastening disc for finish grinding stainless steel and other metal surfaces using hand-operated machines. Ultra high level of aggressiveness and outstanding service life thanks to self-sharpening zirconia alumina. Exceptional stability and excellent edge strength on the perimeter thanks to strong F-paper backing	105
	PS 61 FK	Ceramic aluminium oxide	F-paper	•	Close coating, strong backing and micro-crystalline, self-sharpening ceramic grain provide an aggressive grinding behaviour on steel and stainless steel	110
	NDS 400 K	Aluminium oxide / SiC	Non-woven web with self-fastening		Non-woven disc for work on ultra-fine surfaces. The velour back lining makes the disc suitable for use on self-fastening backing pads	available on request
	KL 361 JF	Aluminium oxide	JF-cotton	•	High quality, highly flexible abrasive cloth for versatile applications in the metal processing industry, also suitable for stainless steel	97
	KL 371 X	Aluminium oxide	X-cotton	•	Economical universal product for surface grinding in metal processing	96
Steel / metals	KL 385 JF	Aluminium oxide	JF-cotton	•	Highly flexible universal product for the metal processing industry, good price-performance ratio	available on request
	CS 411 XK	Zirconia alumina	X-cotton	•	Product for universal use during the processing of metal and stainless steel that offers a robust, tear resistant cloth-reinforced backing. Unrivalled versatility and a high level of aggressiveness and grinding performance during rough grinding applications on steel and stainless steel	available on request
	PS 22 F ACT	Aluminium oxide	F-paper	•	Close coating for maximum stock removal and uniform scratch pattern regarding surface treatment of hard, low-content woods. Advanced Coating Technology (ACT) and antistatic properties prevent premature clogging	available on request
	PS 22 K	Aluminium oxide	E-paper	•	Abrasive paper with semi-open coating and exceptional machining performance to create a uniform scratch pattern when processing wood and metal	92, 105, 106
	PS 30 D	Aluminium oxide	D-paper	•	Economical abrasive paper for versatile applications in the processing of wood and paint	available on request
Wood	PS 19 EK	SiC	E-paper	•	Robust high performance product with stable E-paper backing for coarse, intermediate and finish sanding. Ideal for hard and difficult-to-machine materials due to the use of sharp-edged silicon carbide	104
	PL 16 E	Aluminium oxide	E-paper	•	Universal product for hand sanding or machine sanding of wood and other materials	92
	PL 28 C	Aluminium oxide	C-paper	•	Universal product suitable for hand sanding or power-tool grinding of wood and other materials	88
	PL 31 B	Aluminium oxide	B-paper	•	Flexible finishing paper with an optimal price-performance ratio for a wide range of applications for the processing of wood, paint and varnish. Provides a smooth surface finish	88
	SW 501 TR	Aluminium oxide	Sponge	•	Highly flexible abrasive sponge, coated on 2 sides, for hand sanding of profiles and contours, extremely resistant to creasing and tearing, washable and reusable, solvent-free bonding system with a colour scheme that varies with the grit size	99

Clo	Cloth					
JF	Cotton, light, highly flexible					
GX	Blended cloth, light, flexible

Strips/Sheets/Discs Applications guide

Application	Туре	Grain	Backing	Coating	Characteristics	Page
	PS 33 B	Aluminium oxide	B-paper	•	High quality abrasive paper, especially suited for paint, varnish and filler	90
	PS 33 BK	Aluminium oxide	B-paper	•	High quality abrasive paper for outstanding results - especially on paint, varnish and filler	93, 109
	PS 33 C	Aluminium oxide	C-paper	•	High quality abrasive paper, especially suited for paint, varnish and filler	89
	PS 33 CK	Aluminium oxide	C-paper	•	High quality abrasive paper for outstanding results - especially on paint, varnish and filler	93, 108
	PS 73 BW	Aluminium oxide	B-paper	•	High quality abrasive paper, especially suited for the processing of paint, varnish and filler, with a special coating for a long service life	90
	PS 73 BWK	Aluminium oxide	B-paper	•	High quality sanding disc for outstanding results - especially on paint, varnish and filler - with a long service life thanks to added active agent coating	112
	PS 73 CWK	Aluminium oxide	C-paper	•	High quality sanding disc for outstanding results - especially on paint, varnish and filler - with a long service life thanks to added active agent coating	112
	PS 77 CK T-ACT	Aluminium oxide	C-paper	•	High performance abrasive paper with new innovative coating technology that prevents premature clogging during the sanding of strongly adhesive materials. Coarse and intermediate sanding with premium latex C-paper	94, 115
	PS 19 EK	SiC	E-paper	•	Robust high performance product with stable F weight paper backing for coarse, intermediate and finish sanding. Ideal for hard and difficult-to-machine materials due to incredibly sharp silicon carbide grain	104
	FP 73 WK	Aluminium oxide	Film	•	Special product with very tear resisant film backing for the processing of paint, varnish and filler with high service life through additional special coating	111
Paint /	FP 77 K T-ACT	Aluminium oxide	Film	•	High performance abrasive paper with new innovative coating technology that prevents premature clogging during the sanding of strongly adhesive materials. Fine and finish sanding with an exceptionally level and tear resistant film backing	94, 114
Varnish /	PL 28 C	Aluminium oxide	C-paper	•	Universal product suitable for hand sanding or power-tool grinding of wood and other materials	88
Filler	PS 11 A	SiC	A-paper	•	High quality, highly flexible, waterproof abrasive paper for working on paint, varnish and filler especially in the car repair sector	87
	PS 11 C	SiC	C-paper	•	High quality, highly flexible, waterproof abrasive paper for working on paint, varnish and filler especially in the car repair sector	86
	PS 8 A	SiC	A-paper	•	Very flexible, waterproof abrasive paper for processing paint, varnish and filler predominantly in the sector of car repair and body paint	85
	PS 8 C	SiC	C-paper	•	Very flexible, waterproof abrasive paper for processing paint, varnish and filler predominantly in the sector of car repair and body paint	85
	NPA 500		Non-woven web		Non-woven web hand pad, excellently suited to deburring, cleaning and surface finishing	159
	FD 500	Aluminium oxide / SiC	Foam core		Foam-coated disc for finishing. Superior flexibility and adaptability on contours and profiles	117
	SK 500	Aluminium oxide	Sponge	•	Abrasive block coated on four sides for fine work on contoured and flat surfaces. The abrasive block is robust, can be washed and reused. It is suitable for wet and dry finishing	98
	SK 700 A	Aluminium oxide	Sponge	•	Suitable for flat or upright use on all four sides; the angled edge (approx. 45°) makes it an exceptional choice for narrow, tapering workpiece contours. Excellent contouring and pressure distribution thanks to flexible foam core. Robust, washable and reusable	98
	SW 501	Aluminium oxide	Sponge	•	Highly flexible hand finishing tool. Abrasive sponge coated on two sides with plastic foam core. Resistant to creases and breaks, can be washed and reused. Suitable for dry and wet finishing	available on request
	SW 501 TR	Aluminium oxide	Sponge	•	Extremely tear resistant version of the abrasive sponge SW 501. Extra long service life, solvent-free bonding system with a colour scheme that varies with the grit size	99
	SW 502	SiC	Sponge	•	Structure like SW 501, though with more aggressive SiC grit	100
	SW 510	Aluminium oxide	Sponge	•	Thin, ultra flexible sanding sponge for particularly hard-to-reach areas such as indentations, profiles and edges. Tight foam structure, allowing for exceptionally uniform pressure distribution and an extra fine finish. No bending, no creases. Can be used wet and dry	100
Composites, gel coats, paints and coatings, plaster and plasterboard, wood fillers and varnish	AN 400	Aluminium oxide	Abrasive screen	•	Effective high extraction dust removal thanks to open grid structure	95, 116

Strips/Sheets/Discs

Applications guide

Minimum order quantities for made to order items

Product	Dimensions	Minimum order quantities				
Sheets	230 × 280 mm	250 pieces				
	70 × 450 mm	500 pieces				
Chuinn	115×140 mm	1,000 pieces				
Strips	93 × 230 mm	500 pieces				
	115 × 280 mm	500 pieces				
Sheets exceeding 230 x 280 mm	Minimum quantities on	request				
Large sheets	1400 × 1540 mm	10 pieces				

Product	Dimensions	Minimum order quantities
	70×125 mm	1,000 pieces
	80×133 mm	1,000 pieces
Self-fastening products	93 × 230 mm	500 pieces
	100×115 mm	1,000 pieces
	115 × 280 mm	500 pieces

Other sizes available on request.

Strips/Sheets

- ► for general use for freehand sanding and finishing and for use with handheld power tools
- ► specially designed for particular materials (e.g. wood, metal, etc.)
- ► special sizes available on request
- ► for wet and dry applications
- ▶ paper or cloth backed

Hole patterns for strips

Klingspor offers a wide range of products with hole patterns for dust extraction. The hole pattern you require depends on the machine you are using. The chart alongside shows the most popular types of machines and the required hole pattern.

You will find the available hole patterns marked in the tables on the following product pages.

If the product you require is not in stock, we will manufacture it for you subject to a minimum order quantity.

Other hole patterns available on request.

Discs

- ▶ for general use with many types of machines
- ▶ special designs with a wide range of hole patterns
- ▶ various sizes on customer's request
- ► for wet and dry applications
- backings: paper, film, non-woven web and surface conditioning material
- ▶ self-fastening products
- ▶ suitable backing plate for angle grinder / orbital sander

Abrasive sponge, flexible, coated on 1 side, waterproof

SW 510

Properties	
Grain	Aluminium oxide
Coating	Close

Applications:	
Paint/Varnish/Filler	•
Wood	•
Plastic	•
Metals	0

Advantages: Thin, ultra flexible sanding sponge for particularly hard-to-reach areas such as indentations, profiles and edges - Tight foam structure, allowing for exceptionally uniform pressure distribution and an extra fine finish - No bending, no creases - Can be used wet and dry

Available grits:

16	24	30	36	40				100	120	150	180	220	240	280	320	360	400	600		1000	1200	1500	2000	2500	3000

Hole patterns for discs

Klingspor offers a wide range of products with hole patterns for dust extraction.

You will find the available hole patterns marked in the table below.

The chart on the following product pages shows the most popular types of machines and the required hole pattern.

Other hole patterns available on request.

Coated abrasives

Properties		Applications:
Bonding ag	ent Resin	Steel
Grain	Zirconia alumina	Stainless steel
Coating	Close	Metals
Backing	F-paper	

Advantages: Aggressive abrasive behavior due to self-sharpening zirconia alumina - Optimal recipe for rough grinding and finish grinding of stainless steel - Long service life

Available grits:

16	24 30 36	40 50 60	80 100 120	150 180 220 240 280 3	320 360 400 500	600 800 1000 120	00 1500 2000 2500 3000

Coated abrasives

Advantages: Improved abrasive and stock removal performance thanks to special heat-tempered aluminium oxide abrasive grain - Reduced clogging thanks to sanding active fillers in the size coat and the semi-open coating - Outstanding flexibility paired with good stability and tear resistance thanks to latex impregnated paper backing

Properties	
Bonding age	ent Resin
Grain	Ceramic Al. oxide
Coating	Close
Backing	F-paper

Applications:	
Stainless steel	•
Steel	•
Wood	0

Advantages: Continuously aggressive abrasive performance - High-performance abrasive disc for stainless steel grinding - Also very good results in repair grinding of parquet flooring - The PS 61 FK includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Composite materials • Plastic •

Advantages: New high-performance disc with optimized clogging behaviour - Increased service life due to the new coating, which prevents the adhesion of paint and dust particles - For fine sanding in the fine grit range 240 - 2000, a highly flexible and completely flat film backing is used for highest surface quality

Abrasive screen, self-fastening, waterproof

AN 400

Properties	
Bonding age	ent Resin
Grain	Aluminium oxide
Backing	Polyester screen

Applications:	
Paint/Varnish/Filler	
Gel coats	•
Plaster	•
Plasterboard walls	•

•
•
•

Advantages: Effective and full-surface dust extraction thanks to open grid structure - Dust-free grinding extends the service life of the abrasive - At the same time, improved health and safety thanks to reduced dust formation at the work station - Independent of existing extraction hole patterns - Waterproof

Duick Change Die

Quick Change Discs

About the product

Klingspor Quick Change Discs are designed for use on pneumatic and electric die grinders. The Quick Change Discs allow a fast and safe tool change.

Applications

- ► Tool design and construction
- ► Aviation industry
- ► Engine construction
- ► Turbine blade construction
- ► Mould construction
- ► Container and apparatus construction
- ► Model building / model making

Advantages

- ► Simple and fast disc changes reduce set-up times
- No clip or self-fastening device so no slipping or release caused by heat
- ► Disc stays centred
- ► Simple handling and smooth running characteristics
- ► Diverse applications thanks to different dimensions and backing plate hardnesses

Coated abrasive	Туре	Grain	Coating	Characteristics	Page
	QMC/QRC 412	Aluminium oxide	•	The versatile disc for coarse and intermediate grinding on metal	126, 130
	QMC/QRC 411	Zirconia alumina	•	High stock removal rate for rough grinding and deburring of stainless steel and steel	127, 131
	QMC/QRC 409	Zirconia alumina	•	Extremely high stock removal rate and long service life for stainless steel and high alloy steels with multibond for cool grinding	128, 131
	QMC/QRC 910	Ceramic aluminium oxide	•	Extremely sharp ceramic grain for highest aggressivity and multibond for cool grinding	128, 132

Applications guide

We reserve the right to over-deliver or under-deliver made to order items.

The right choice of the backing pad

Backing pads for Quick Change Discs are available in grades according to the required application. The firmer the backing pad the higher the stock removal rate. Softer backing plates are suited to working on contoured surfaces and finish sanding.

The QCA 555 (cat. no. 308693) allows use on a regular angle grinder.

Please observe the max. RPM for the backing pads in the product chart. $\,$

Two fastening systems have prevailed on the market for the product group 'Quick Change Discs'. Klingspor can offer you both, Quick Metal Connect and Quick Roll Connect, for all available types.

Applications guide

The system QMC (Quick Metal Connect)

The Quick Change Discs with metal locking are fixed on the backing pad by means of an internal thread.

The system QRC (Quick Roll Connect)

Fix the Quick Change Disc to the backing plate using the plastic threaded bushing and secure by turning 180° clockwise.

Installation on an angle grinder

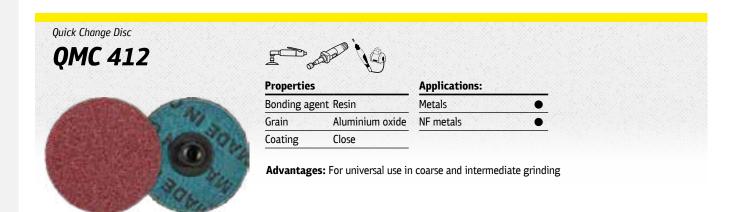

The QCA 555 adapter allows you to use the quick change discs on conventional angle grinders with an M14 receiving spindle.

- 1. Mount the QCA 555 adapter with the M14 thread onto your angle grinder. The lower clamping flange can remain on the machine.
- 2. Affix the backing pad QMC 555 or QRC 555 with the $1/4^{\prime\prime}$ thread on top of the adapter.

QMC 555

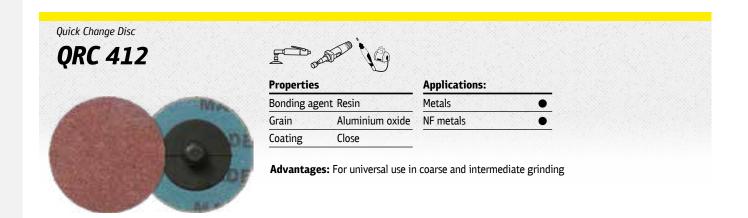

Advantages: For secure mounting of QMC discs - Optimized abrasive properties (aggressiveness, surface quality) due to three hardnesses - Easy differentiation of the hardnesses through coloured rings - Fixing spindle can be unscrewed, therefore the use on angle grinder or with adapter QCA 555 is possible via 1/4"-20 thread

About the product

Developed by Klingspor over 40 years ago the abrasive mop wheel has found many practical and economical uses in surface finishing work. The Klingspor abrasive mop wheel comprises of high quality grinding flaps coated with aluminium oxide. The fan-shaped radial arrangement is firmly anchored by a resign core at the centre of the abrasive mop wheel. The structure of the abrasive mop wheel provides for very soft, comfortable grinding behaviour and adapts optimally to the contours of the workpiece. Klingspor abrasive mop wheels are especially suited for achieving a very smooth surface finish.

Klingspor has the perfect abrasive mop wheel to suit every surface, ranging from even to profiled surfaces, and is suited for nearly every material.

Machines

Klingspor abrasive mop wheels can, depending on the dimensions, be used with the following machines:

Die grinders

Angle grinders

Flexible shafts

Drilling machines

Floor stand grinders

Satin finishing machine

Applications guide

Mounting

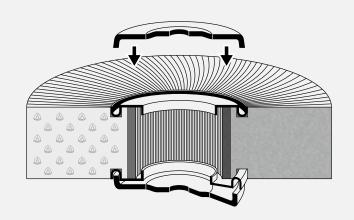

Abrasive mop wheels SM 611, MM 650,

These abrasive mop wheels are mounted to the machine spindle with two SMD 612 mounting plates.

Correct mounting is important

To ensure that the abrasive mop wheel runs smoothly, please check that the mounting plates are mounted evenly and fit tightly to the inner edge of the metal side mounting plate retaining groove. The mounting plates are equipped with mounting bore holes. Making bore hole adjustments to fit the respective shaft diameter easy and quick - by simply drilling the appropriate bore hole diameter. Please refer to product text SMD 612 for more information on maximum bore hole diameters.

The special abrasive mop varieties listed below are designed in such a way that they can be fitted on top of the respective machine shafts without any additional SMD 612 mounting plates:

Abrasive mop wheel SM 611 H

The abrasive mop wheel with a wooden core is preferred for work on floor stand grinders with cone-shaped mounting spindles. It can be mounted directly on the machine spindle without the use of a mounting plate. Abrasive mop wheel SM 611 H is equipped with a Ø 13 mm bore hole. Making bore hole adjustments to fit the respective shaft diameter easy and quick - by simply drilling the appropriate bore hole diameter.

Abrasive mop wheel **SM 611 W**

This abrasive mop wheel is equipped with a Ø 25.4 mm mounting bore hole and can be mounted to a machine without the use of a mounting plate.

WSM 617

The WSM 617, an abrasive mop wheel of the second generation with an integrated M14 or %" inside thread, can be mounted and released again without the need for any additional tools.

Abrasive flap drum SM 611 S

These drums come as standard with a 19 mm receiving hole and keyway standard satin finishing machines that are equipped with the corresponding machine spindle.

Applications guide

The surface scratch pattern

The abrasive mop wheel's construction makes it perfect for achieving a smooth surface finish.

The abrasive mop wheel achieves a significantly smoother surface finish compared to that of a belt grinder. When choosing a grit size please select a grit size that is 2-3 sizes coarser than that used with a belt grinder.

Abrasive belt 40 grit

- ► short distinctive line pattern
- ► rough surface
- ► high contrast finish

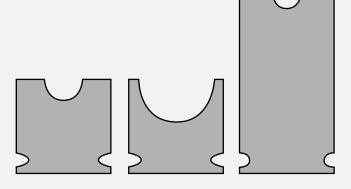

Abrasive mop wheel 40 grit

- ► long continuous line pattern
- ► minimum depression
- ► smooth finish

Common profilings

Pre-profiled abrasive mop wheels are designed to adapt perfectly to the contours of your individual workpiece and provide excellent results from the very beginning. Time consuming pre-profiling of the abrasive mop is no longer needed.

If you require an individualised abrasive mop wheel, we would be pleased to assist you with this.

Applications guide

Selection of the correct mop diameter

To be able to work at the optimal cutting rate (38-42 m/s) the selection of the abrasive mop diameter for machines, that are not equipped with RPM setting functionality, is based on the set RPM. Machines that are equipped with RPM setting functionality are to be set according to the abrasive mop wheel diameter settings.

Before turning the machine on please check that the pre-set RPM does not exceed the maximum abrasive mop RPM setting.

Please refer to the adjoining table for the correct abrasive mop diameter settings for the optimal RPM range.

If the abrasive mop wheel is used at the optimal RPM setting, the grinding flaps stand up straight as result of the centrifugal forces around the core and provide optimum abrasive mop wheel grinding properties. Only the edges of the grinding flaps are subjected to wear and tear. This results in the use of new and sharper grits. This ensures uniform stock removal and surface finish – from the first to the last workpiece.

Suboptimal RPM settings (too low) result in the incorrect positioning of the grinding flap as a result of tool / grinding pressure. This results in wear and tear on the grit side of the grinding flaps, and the area the abrasive mop wheel grinds is too large, which in turn results in higher friction between the workpiece and the grinding flaps. Consequently the workpiece and abrasive mop wheel are subjected to a higher thermal load and a higher degree of wear and tear on the grinding flaps. Ultimately, this can result in the failure of the abrasive mop wheel and damaged grinding flaps.

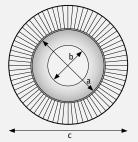

Maximum RPM

Klingspor SM 611 abrasive mop wheels are certified for widths of \leq 100 mm and maximum revolutions per minute of 50 m/s.

Optimal cutting rate

The abrasive mop wheel's optimum performance range is a cutting rate between 38-42 m/s.

Mop-Ø [mm]	Recommended RPM range [min-1] (38 - 42 m/s)
100	7,300–8,000
140	5,200-5,700
165	4,400-4,800
200	3,650-4,000
250	2,900–3,200
300	2,400-2,650
350	2,100-2,300
380	1,900-2,100
410	1,750-1,950
480	1,500-1,650
510	1,400-1,550

^{*} applies to standard versions (stock items)

Applications guide

Packet assembling

Another way to influence the grinding result is packet assembling. During packet assembling an intermediate layer is stamped between the cloth flaps. This creates space between the individual flaps, which influences the grinding behaviour of the wheel. The higher the ratio of grinding flaps to intermediate layers, the harder the abrasive mop wheel.

The standard abrasive mop wheel is manufactured without packet assembling.

Exception: Starting at a diameter of \geq 250 mm, a width of \geq 50 mm, and and a grit size of 220 and finer, abrasive mop wheels are manufactured with a packet assembly ratio of 5:1.

5:1

3.1

1.1

Factors influencing the grinding result

The surface finish is dependent upon a wide range of process parameters. The table below illustrates the different influencing factors and their affect on the grinding result.

			Grinding result	
Influencing factor		Stock removal*	Surface finish	Service life
Cutting rate	high	increases	finer	shorter
cutting rate	low	decreases	coarser	longer
Tool / swinding nuccesses	high	increases	coarser	shorter
Tool / grinding pressure	marginal	decreases	finer	longer
Grit size	rough	increases	coarser	shorter
urit size	fine	decreases	finer	longer
Grinding aids	without	increases	coarser	shorter
oils, lubricants)	with	decreases	finer	longer

^{*} Note: the essential parameters that affect the stock removal rate are the selection of a coarser (more stock removal) or finer (less stock removal) grit.

The safe use of Klingspor abrasives

Klingspor abrasive mops are manufactured in accordance with the oSa and EN 13743 standards, this ensures the highest level of user safety.

Wear safety goggles or glasses to protect the

Wear safety gloves to protect hands

Wear a dust mask

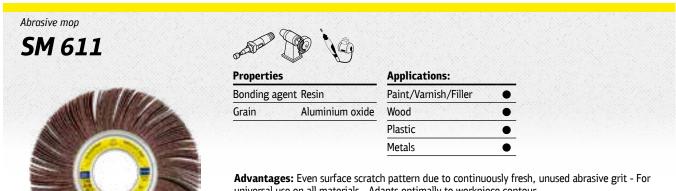

Observe safety instructions

Use ear protectors

Abrasive mop

universal use on all materials - Adapts optimally to workpiece contour

Small abrasive mop

About the product

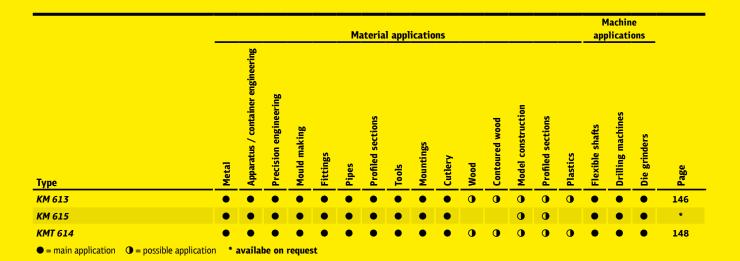

The small abrasive mop comprises of grinding flaps coated with aluminium oxide. The fan-shaped abrasive flaps are securely fixed to a central mounting spindle. The grinding flaps' fan-shaped radial arrangement adapts perfectly to the contours of the workpiece.

The wide range of grits (40 – 320) and top size coat additives (with and without multibonds) make the Klingspor small abrasive mop perfect for a wide range of applications.

The small abrasive mop is equipped with the following standard features: a 6 mm or 3 mm fixing spindle and a shaft length of 40 mm.

Application examples

- ► Grinding work for tool and mould making
- ► Processing of profiled workpieces
- Processing of internal surfaces on pipework, fittings and difficult-to-reach areas
- ► Grinding work on small parts and casing

Minimum order quantities for made to order items

Product	Grit	Minimum order quantities
	40-320	250 pieces
KM 613	from 360	500 pieces
KM 615	40-180	250 pieces
VMT C14	40–320	250 pieces
KMT 614	from 360	500 pieces

Applications guide

Application recommendations

- ► The small abrasive mop can be used with flexible shaft grinders, die grinders (pneumatic, electric) or drilling machines.
- ➤ The small abrasive mop's optimum performance is achieved at a cutting rate between 20 25 m/s. By observing these speeds, the product will perform at its most economical as regards tool wear, stock removal, surface finish and thermal load of the workpiece.

Factors	s influ	encing
the gri	nding	result

Stock removal

An increase in stock removal should only occur as a result of using coarser grit and not as a result of increased tool / grinding pressure.

Steady increased tool / grinding pressure

- results in unnecessary tool wear and tear
- ▶ results in increased workpiece temperature load
- ► can result in tool failure

Surface finish

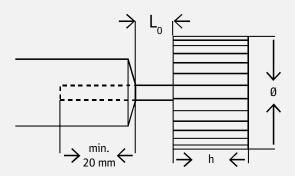

- ► The wear of the outer edge of the grinding flaps results in the presentation of new sharp abrasive grain, which results in a uniform surface finish
- ► The surface roughness decreases through an increase in the cutting rate
- ► An increase in the tool / grinding pressure results in a coarser surface finish
- ► The small abrasive mop achieves a significantly smoother surface finish compared to that of a belt grinder

Temperature load

► By reducing the tool / grinding pressure and the peripheral speeds the temperature load of the workpiece and the tool is reduced.

		Maximum						
ø [mm]	Height h [mm]	operating speed [m/s]*	L ₀ = 0 mm	L ₀ = 10 mm	L ₀ = 20 mm			
10	≤ 15	40	76,300	55,000	35,000			
15	≤ 25	40	50,500	37,000	28,000			
20	≤ 20	40	38,150	28,600	21,900			
25	≤ 15	40	30,500	22,900	17,500			
30	≤ 15	40	25,400	19,000	14,600			
40	≤ 20	40	19,000	14,300	10,900			
50	≤ 30	40	15,200	11,400	8,700			
60	≤ 40	40	12,700	9,500	7,300			
60	50	32	10,150	7,900	6,300			
00	≤ 40	40	9,500	7,100	5,400			
80	50	32	7,650	6,000	4,800			

^{*} for exposed shank length $L_0 = 0 \text{ mm}$

Tool wear

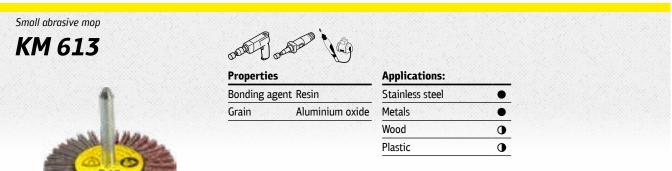

Tool wear is reduced by working with a lower grinding pressure.

To ensure the optimal and most efficient use of a tool

- ▶ the maximum revolutions per minute may not be exceeded
- ► the fixing spindle length of the small abrasive mop in the mounting device must be at least 20 mm
- ▶ the set revolutions per minute may not be exceeded when using an exposed shaft length LO (please refer to the table above)

For additional information please refer to the safety information provided with the product.

Abrasive mop

Advantages: Universal product for steel and stainless steel materials - Even removal rate - Suitable for use in hard-to-reach areas

Notes

Abrasive mop

About the product

Thanks to its open, elastic structure, a non-woven abrasive web is capable of applying "soft" sanding to produce surfaces with a low scratch depth that are particularly fine. Fully and evenly interspersed with abrasive grain, a non-woven abrasive web can be used to produce a uniform and reproducible scratch pattern while also delivering a long service life.

Thanks to the great many beneficial properties of the material, the importance of non-woven products in the field of surface finishing is increasing steadily, especially for the work step of "finishing stainless steel surfaces".

Carrying an extensive variety of products with differences in fibre structure, grain, grit, bond and density, Klingspor offers the right abrasive tool for every processing step - from light deburring and stock removal to cleaning and creating satin finishes to the polishing of surfaces.

Applications guide

Types of non-woven material

When trying to find the product that is right for your application, you will want to factor in the properties of the non-woven material.

Non-woven material is divided into four different categories:

- ► Soft non-woven material without fabric lining (clean and finish)
- ► Non-woven material with fabric lining (Surface Conditioning Material SCM)
- ► Highly compacted fleece (unitised and convolute)
- ► Coarse cleaning fleece (clean and strip)

General benefits of non-woven materials Wide range of applications for finishing

► The products are available with various grains and densities

Exceptionally long service life

- ► Continuous release of new abrasive grains
- ► Even finish throughout the entire service life
- ▶ No clogging thanks to open structure

Uniform scratch pattern

- ▶ Abrasive grains are distributed evenly in the material structure
- ▶ No excessive penetration into the workpiece surface

Perfect contouring to the workpiece

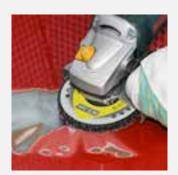

- ► The structure of non-woven materials is exceedingly flexible
- ► Shape and geometry of the base material remain unchanged

Finishing processes, typical work steps

Light sanding and creating satin finishes

Light stock removal combined with an excellent finish. The right choice: Non-woven tools made of SCM non-woven material with fabric lining (e.g. belts, discs) or combinations with non-woven and coated abrasives (e.g. SMT 850).

Coarse cleaning

Removal of rust, scale and varnish as well as coatings in general and effortless removal of heat tinting. The right choice: Non-woven tools made of coarse cleaning fleece with an extra open structure, relatively strong non-woven fibres and coarse abrasive grain.

Finishing and creating matt finishes

Blending scratch patterns, cleaning surfaces and creating a final finish; no stock removal. The right choice: Tools, often including tools for off-hand sanding, made of soft, flexible non-woven material.

Removal of heat tinting and pre-polishing

Removal of hint tinting and/ or creation of surfaces with a low scratch depth that are particularly fine. The right choice: Tools made of highly compacted fleece. Depending on its density and degree of fineness, the non-woven material may even allow for light stock removal or light deburring.

About the product

Since their market launch, the Klingspor abrasive mop disc has successfully taken the place of the grinding disc in many areas of surface finishing.

The performance of the abrasive mop disc, with its fan-shaped radial arrangement of cloth grinding flaps, far exceeds that of other abrasive products.

Klingspor abrasive mop discs are made of zirconia alumina, ceramic, or aluminium oxide coated flaps fastened to glass fibre-reinforced or plastic backing plates.

The even arrangement of the flaps guarantees high flexibility, constant high grinding performance and low vibrations.

Type

Product groups

Klingspor offers three integrated product groups. For each user and application we offer the right abrasive mop disc. All abrasive mop discs are manufactured according to the applicable standards and guarantee the highest degree of safety.

Ideal price-performance ratio for universal implementation. Excellent grinding results on different steel materials.

Professional products with excellent service life and high stock removal rate. Aggressive grinding and long service life

SPECIAL

High performance products for special industrial and trade applications. High performance and service life even when used intensively.

Applications guide

Product structure

The three abrasive mop disc components are perfectly integrated to achieve maximum performance.

1. Grinding flaps

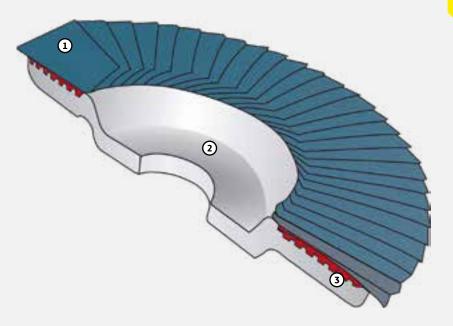

Klingspor has developed special coated abrasives for its abrasive mop discs. The grinding tool is perfect for use with high speed angle grinders (80 m/s) and corresponding applications. This ensures top grinding performance and long service life.

2. Backing plate

Klingspor uses two different backing plate types to produce abrasive mop discs. The first one is the most popular on the market made of glass fibre; the second one is made of plastic.

3. Glue

The glue (adhesive) is the joint between the backing plate and the grinding flaps. It ensures that the grinding flaps cannot come off the backing plate if used properly. It also ensures safety far above the guidelines of the oSa directives and the EN 13743 safety standard.

Form

The convex abrasive mop disc grinds a narrower surface than the flat abrasive mop disc. The more selective use of the convex disc achieves a greater stock removal rate per time unit as compared to the flat mop disc. The convex abrasive mop disc is particularly suited to working on edges and welded seams. The flat disc is primarily used for flat and surface grinding.

convex

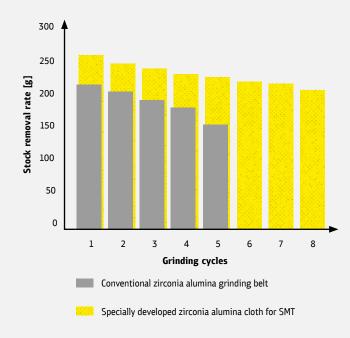

flat

Applications guide

Coated abrasives

Compared to belt applications the coated abrasives for abrasive mop discs withstand much higher loads. On the one hand, the cutting speed of abrasive mop discs is approximately 2 to 2.5 times faster than the cutting rate of a belt application, on the other hand the backing must wear down to ensure that new, unused grit is used. Klingspor has developed special coated abrasives specifically for this product group. These are developed specifically for high powered angle grinders (80 m/s) and ensures top grinding performance and long service life (see diagram).

1. Zirconia alumina cloth

Zirconia alumina grit, heavy cotton polyester cloth, best performance with high power machines

2. Zirconia alumina cloth

Aggressive zirconia alumina grit, cotton cloth, good stock removal with angle grinders of all performance classes

3. Zirconia alumina + Multibond

Self-sharpening zirconia alumina grit, cotton backing, especially for cool grinding on stainless steel

4. Aluminium oxide cloth

Durable grit aluminium oxide, cotton cloth, for use with metal and NF-metals

5. Ceramic aluminium oxide + Multibond

Ceramic high performance grit, robust polyester backing high performance for stainless steel work, cool grinding on stainless steel surfaces

6. Ceramic aluminium oxide

Ceramic high performance grit, robust polyester backing, high performance for steel work

The safe use of Klingspor abrasives

Klingspor abrasive mop discs are manufactured according to the oSa and EN13743 standards, this ensures the highest level of user safety.

Wear safety goggles or glasses to protect the

Use ear protectors

Wear safety gloves to protect hands

Observe safety instructions

Do not use for wet grinding

The Klingspor *CEVOLUTION*

The four new abrasive mop discs in the Klingspor range all have one thing in common – they all feature the new CEVOLUTION technology.

Klingspor products with CEVOLUTION technology are more powerful than comparable other ceramic abrasives. In most applications the new products offer more aggressiveness and an extended service life.

The extra performance of products with CEVOLUTION technology results from the combination of an aggressive, self-sharpening ceramic grit with the unique Klingspor know-how regarding grit mixture, grit sizes, grit quantities, formulation of pre- and postcoat, multi-bond as well as special manufacturing processes.

All of these individual elements are specifically matched by the Klingspor developers for each different mop disc variant/type. This results in optimised products that will meet the requirements of the metalworking professional.

Four newcomers for Klingspor

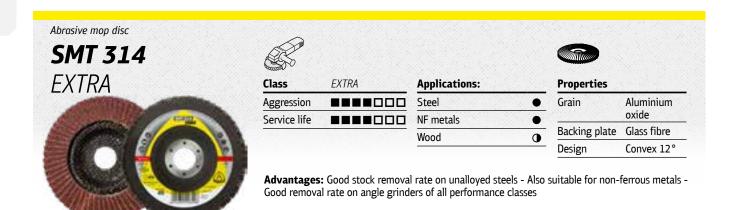

Klingspor expands the abrasive mop disc range

SMT 975 - SMT 674 - SMT 976 - SMT 974 - the durable one the efficient one the cool one the solid one

	Design

Grain Ceramic Al. oxide
Backing plate Glass fibre
Design Convex 12°, flat

Advantages: Universally suitable for all grinding tasks in the steel sector - Also suitable for stainless steel - Optimum price/performance ratio due to ceramic grain - The SMT 674 includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Abrasive mop disc CEVOLUTION

SMT 975 SPECIAL **CEVOLUTION**

Class	SPECIAL	Applica
Aggression		I ■ Steel
Service life		I■ Stainles

Applications:

Properties	
Grain	Ceramic Al. oxide
Backing plate	Plastic, glass-fibre reinforced
Design	Convex 6º

Advantages: High and fast stock removal due to newly developed abrasive with self-sharpening ceramic grain - Easy mounting due to integrated M14 thread - Very long tool life due to trimable backing plate - The SMT 975 includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

About the product

As the inventor of the high speed cutting-off wheel, it is only natural that we strive to continually develop and improve our Kronenflex® products.

Kronenflex® cutting-off wheels and grinding discs feature an optimal combination of bonding agent and grain type for high aggressiveness, outstanding service life and consistently high quality. They comply with the highest safety standards, including the oSa regulations and the European safety standard EN 12413.

As a result of continuous innovations and the development of special products for diverse requirements, our Kronenflex® products offer the optimal solution for all standard materials and applications.

Typical materials for these products

- ▶ Steel
- ► Stainless steel
- ► Construction steel
- ► NF metals
- ▶ Cast materials
- ► Stone
- ► Plastics
- ► Mineral materials

- ▶ Pipes
- ► Flat irons
- ► Tins
- ► Solid materials

Typical applications for these products

- ▶ Bodywork
- ► Maintenance and repair work
- ▶ Locksmiths
- ► Steelwork
- ▶ Plant construction
- ► Container construction
- ▶ Upkeep
- ► Metal works
- ▶ Vehicle construction
- ► Foundries
- ► Shipyards

Applications guide

- 1. EAN code (EAN 13)
- 2. Safety pictograms
- 3. Max. operating speed
- 4. Klingspor cat. number
- 5. Specification of design, grade and bond according to EN 12413
- 6. Dimensions in mm and inches
- 7. Applications (see colour coding system)

- 8. Information about the manufacturer
- 9. Operating restrictions
- 10. Safety standard (oSa / EN 12413)
- 11. Max. RPM
- 12. Safety pictograms
- 13. Product group / type
- 14. Klingspor brand Kronenflex®

Performance classes

Kronenflex® cutting-off wheels and grinding discs come in three performance classes with six colour codes for a quick overview of the most important material applications.

Products for universal application, offering a particularly attractive price-performance ratio.

SUPRA

Optimised products for different applications. Excellent service life and cutting performance.

SPECIAL

High performance products for special applications. Highest service life and cutting performance in the respective material application area.

Applications guide

1. Label and cover sheet

The label includes all of the important information on the product, manufacturer and information on the proper use of the grinding tool

2. Mixture

The grit: Today all grit types are only produced synthetically. Only grit produced synthetically can ensure continuously high wear and cutting disc quality.

Resins and fillers: Additional, important components for cutting and grinding discs are resins, (in liquid and dry form), and fillers. These components are key in determining the disc properties, such as stability, stock removal rate, sheer strength and can be adjusted to meet the needs of the specific application.

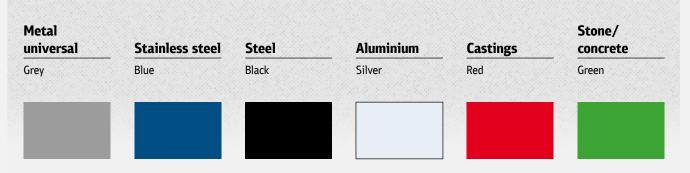

3. Metal ring

Provides information on the expiry date of the disc.

4. Glass fibre

Glass fibre is a reinforcing layer to ensure stability and increases the safety of the cutting-off wheel. The number and strength of the glass fibre layers is dependent upon the disc type and application. The higher the potential lateral load on a cutting-off wheel (it is greater during free cutting than during stationary cutting), the more glass fibre that the cutting disc must contain, or the contained glass fibre must be more stable. Particularly thin material is used for thin cutting discs, (0.8 mm to 1.0 mm), to ensure that a large grit ratio is achieved between the layers. Grinding discs are constructed with at least 3 glass fibre layers.

Klingspor cutting-off wheel and grinding disc colour coding system

Pictograms on the product pages

One glass fibre cloth

Two glass fibre cloths

Free of iron, sulphur and chloride

Packaged in units of 25 pcs each in the Kronenflex® tub for consistently high performance and protection from moisture

Safety and storage

The shelf life of cutting-off wheels and grinding discs is primarily determined by their moisture content. Cutting-off wheels and grinding discs that are subjected to increased humidity after they were manufactured loose their original service life. Correct storage ensures a consistent long service life. Cutting-off wheels and grinding discs that are subjected to water or steam are a safety risk.

The user is obligated to use the product correctly. Cutting-off wheels and grinding discs should not be used past the expiry date.

Working safely

By being careful and recognising risks

Please avoid the risks listed below when working with cutting-off wheels and grinding discs.

- ► contact with rotating abrasive discs
- ▶ abrasive disc breakage
- ▶ grinding dust and debris
- ▶ vibration
- ▶ noise

Through personal protective gear

Goggles, gloves, ear muffs and dust masks must be worn. When working on hard grinding applications additional protective gear is required, such as face protection, leather aprons and safety boots.

With protective machine guards

Machine guards are supplied with the grinding machine and may not be changed or removed. When using cup grinding wheels the outer surface must be completely enclosed. In addition, cup grinding wheels may only be used in combination with an adjustable wheel guard, to balance the wear on the disc and to keep the exposure of the disc at a minimum.

Through visual inspection and performance of checks prior to mounting

Ensure the disc RPM matches the machine RPM setting and avoid exceeding the maximum admissible operating speed.

Carefully check the cutting-off wheel and grinding disc for damage. If the cutting-off wheel or grinding disc is damaged, do not use the damaged product. Our cutting-off wheels and grinding discs are marked with the corresponding safety pictograms.

Through correct use

Ensure that the respective disc is being used correctly. Avoid damage to the mounting bore or to the disc through jerks, excessive force, or falls.

Ensure that the disc is correctly and securely mounted and use the correct mounting flange.

Prior to starting work, the abrasive disc should run at operating speed for at least 30 seconds.

Please observe the FEPA safety regulations and the European Standard 12413.

The peripheral speed and grinding pressure are important parameters for achieving optimal cutting-off and grinding disc results.

Applications guide

The optimal speed

Too low

If the RPM of the machine is too low, the cutting-off wheel and grinding disc tend to "jump", and the disc edges wear down unevenly. Particularly with thin material cross sections, such as cutting tin or wire, this causes the grit to be separated from the bond and the disc wear speed is above average.

Optimal

Klingspor cutting-off wheels and grinding discs are high performance products and were developed such that best disc performance (measured according the stock removal volume to disc wear ratio) is achieved in the range right below the maximum peripheral speed. Keep the machine running at a consistently high RPM and, if needed, select a more powerful machine.

Too high

The maximum RPM and peripheral speed is printed on the label of each disc. For your own safety, please be sure not to exceed the recommended speeds when grinding.

The correct grinding pressure

An important requirement for a satisfactory cutting result is the correct grinding pressure. A common mistake is to reduce the grinding pressure to preserve the disc and extend the cutting life of the wheel. If this is done, the material overheats (turns blue); the cutting-off wheel becomes clogged and "burns up". This is why the grinding pressure should always be set such that the cutting time is as short as possible. This is particularly true for heat sensitive material with large material cross sections.

The proper hardness

Cutting-off wheels

Generally, the rule of thumb when selecting the correct cutting-off wheel is: the harder the material, the softer the abrasive bond. The reason: the service life of a cutting-off wheel is dependent on whether the cutting surface of the workpiece hardens or not. Overheating results in the disc "glazing" and the cutting properties are negatively affected. In this case, the hardness of the bond should be decreased and a softer cutting-off wheel should be used.

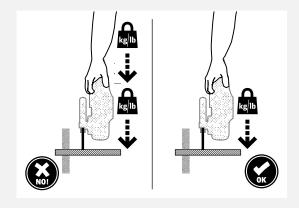

Grinding discs

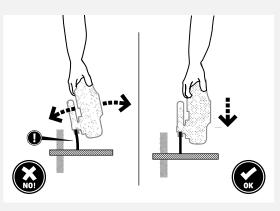

The rule of thumb also applies to grinding discs: the harder the material, the softer the grinding disc bond. In addition, the application plays a decisive role. Corner grinding and the grinding of burrs and sharp edges can cause grit to be removed from the bond. We suggest the selection of a hard bond. On the other hand, when working on surfaces or small weld seams a disc that is too hard would become dull and would no longer be effective. It would have a good service life, but would also have a low stock removal rate and high work costs. A medium or soft disc bond would be best for finish grinding.

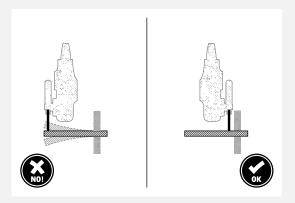

Applications guide

Correct application/techniques for cutting-off

Pressure may only be placed on the cutting-off wheel from a radial direction. This is the only way to avoid wobbling, buckling and disc breakage, especially when applying a high level of cutting pressure. The workpiece that is to be cut-off should be properly affixed to the workbench to ensure that the disc does not slide off to the side. In addition, we recommend that the material is affixed as close to the cutting site as possible to ensure that it does not vibrate, flutter or slip to the side.

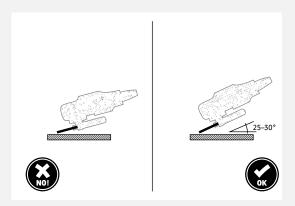

Correct application/techniques for grinding

Grinding discs work best at 35 degree angle to the workpiece. This angle provides the best stock removal to disc wear ratio. If possible, always select this angle. When grinding and the angle is below 15° a very thin edge which levels off is formed around the circumference of the disc. Even minimal changes to the angle can result in a situation in which the grinding pressure can no longer be absorbed resulting in the grinding disc slipping to the side. Valuable grit is not used and an imbalance is created that results in having to replace the disc prematurely.

Applications guide

The correct mount

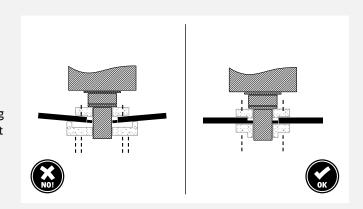

For better power transmission

Cutting-off wheels and grinding discs are mounted to the machine with side flanges. The flange elements are responsible for transferring power to the disc. For reasons of safety it is extremely important that defective or incorrect flanges are not used.

For more safety

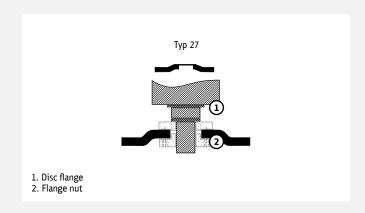

The use of wheel flange FL 76 provides increased lateral stability and user control, specifically when using thin cutting-off wheels with a flat form and diameter of 180 mm and 230 mm.

The applicable regulations and standards must be complied with when using the wheel flange. The contact surface and diameter of the wheel flange must match. Using wheel flanges with diameters that do not match is prohibited.

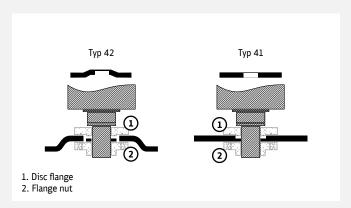

Depressed centre grinding discs

4 - 10 mm thickness

Flat and depressed centre cutting-off wheels

0.8 - 4 mm thickness

Kronenflex® large cutting-off wheels

Applications guide

Cutting-off wheels for different types of machines

- ► Handheld machines 80m/s
- ► Handheld machines with a clamping device for vigonole rails 100m/s
- ► Transportable bench chop saws < 3KW
- ▶ Stationary saws / cutters up to 5KW
- ► Stationary saws / cutters > 5KW

Stationary cutting-off wheels may not be used with freehand machines.

Products for handheld machines

These products were developed for use with handheld machines (petrol, electric, high frequency).

Please note that it is very important that the maximum operating speed setting on the machines and the maximum operating speed setting on the products match. 80 m/s and 100 m/s machines are available on the market. Klingspor large cutting-off wheels for handheld machines are certified for 80 m/s handheld machines. Products for railway construction with a clamping device are certified up to 100 m/s.

Products for transportable bench chop saws

Cutting-wheels for this product group are suitable for low power bench chop saws. These products may not be used with large stationary and / or handheld machines.

They are known for their high cutting rate, which ensures fast and cool cutting.

Products for stationary saws / cutters

Stationary machines are best suited for economical and safe cutting of large cross sections and heavy workpieces.

Products in this segment with their outstanding performance and long service life fulfil the most demanding requirements of stationary cutting. Good aggressiveness ensures low thermal loads when working on large cross sections.

Kronenflex® large cutting-off wheels

Applications guide

Which cutting-off wheel is used with which machine?

Large cutting-off wheels for stationary machines and large cutting-off wheels for handheld machines are designed differently and their build is optimised for the respective machine type. For safety reasons large cutting-off wheels for stationary machines may never be used with handheld machines.

The bore diameter of a large cutting-off wheel does not indicate if it is a wheel that can be used with a stationary machine or if it is a wheel that can be used with a handheld machine.

A binding overview regarding which Klingspor wheel type is to be used with which machine type is provided in the table below.

Disc wobbles

Applications guide

Recognise and avoid errors

	Issue	Possible cause	Solution						
		Cutting time is too long	Increase feed speed or grinding pressure						
		Drive power is too low	Use a more powerful machine						
	Cutting surface is blue	Disc is too hard	Select a softer bond						
		Material cross section is too great for the disc diameter	Work with a saw cut / work with a smaller material diameter						
		Cutting disc is too wide for the material/application	Use a thinner cutting disc						
		White cutting surface: disc hardness is too low	Select a harder bond						
	Disc wear is too high	Peripheral speed is too low	Increase peripheral speed						
		RPM decrease is too great	Reduce grinding pressure or use a more powerful machine						
		Workpiece is not mounted properly	Mount the material closer to the cutting site						
s		Grinding pressure is too great	Reduce grinding pressure						
heel	Crooked cut	Disc width is too thin for the material/application	Increase disc width						
Ff w		Disc is completely worn down	Replace disc						
B-0		Machine is operated incorrectly	Avoid lateral pressure on the disc						
Cutting-off wheels		Incorrect wheel flange diameter	Use wheel flange with identical diameters						
ਤ	Disc breakage	Cutting-off wheel is used for grinding	Cutting-off wheels may not be used for grinding						
		Material is not properly affixed	Mount the material closer to the cutting site						
		Disc periphery is burned	Select a softer bond, decrease grinding pressure						
	Disc periphery is frayed	Material is not properly affixed	Mount the material closer to the cutting site						
		Wheel flange is dirty or worn out	Clean wheel flange or replace wheel flange						
	Disc jumps	Bearing is defective	Replace machine or replace bearing						
		Bore dimension and mount do not match	Use proper bore dimension or use a reducer ring						
		Wheel flanges are of different sizes	Use wheel flanges that have the same diameters						
	Bore hole is broken	Machine is operated incorrectly	Reduce lateral pressure on the disc						
		Cutting-off wheel is used for grinding	Cutting-off wheels may not be used for grinding						
	Issue	Possible cause	Solution						
	-	Shiny contact surface: bond is too hard	Select a softer bond						
	Removal rate is too low	Grinding pressure is too low	Increase grinding pressure						
		Machine performance is too low	Use a more powerful machine						
		Bond is too hard	Select a softer bond						
	Disc is loaded/clogged	Loading/clogging with NF metals	Use softer bond or select a special cutting-off wheel for NF metals						
		Grinding pressure is too low	Increase grinding pressure						
S		Grinding pressure is too high	Reduce grinding pressure						
Grinding disc		Bond is too soft	Select a harder bond						
ding	Wear is too high	Machine RPM decreases too quickly	Reduce grinding pressure						
Ĝ		Machine performance is too low	Use a more powerful machine						
	Periphery is not rounded / breakage on	Disc angle is too flat	Increase disc angle (at least 25°)						
	the edge	Grinding pressure is too high	Reduce grinding pressure						
		The mount is not centred	Check bore diameter and mounting diameter and adjust accordingly						
	Disc wobbles	Mounting shaft is worn	Replace machine						
	2.50 Hobbies	Mounting flange is worn / dirty / incorrect	Replace / clean mounting flange / check dimensions						

Use a new disc

Applications guide

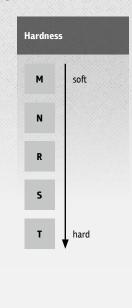

What the type designation reveals about the design of cutting-off wheels and grinding discs

The type designation given on a cutting-off wheel or grinding disc divulges more than just the name of the product. It provides important information on the performance class and on the composition of the tool. The first letter indicates which abrasive grit is used. If this letter is followed by a three digit number, the first digit signifies the performance class (the performance class is also included below the name of the product). The last two digits point to the size of the grit that was used. The letters at the end of the type designation mark the hardness grade of a cutting-off wheel or grinding disc.

Remain in full control of all processes: staying true to this motto, Klingspor managed to rise to be one of the world's first manufacturers of grinding and cutting tools. The company is now applying their extensive experience in research and development and manufacturing, their global network of distributors and their highly efficient service and logistics structure to their diamond tools.

Applications guide

The three product lines

The right tool for every application: Klingspor diamond tools are available in three product lines that are colour-coded to provide the user with a quick overview of the most important materials for which the tools are suitable.

Product line 900 – High performance tools offering outstanding cutting performance and service life. For users who need their tools to perform at peak output and reliability even if subjected to the most punishing applications.

Product line 600 – Professional tools with an exceptional price-performance ratio. For users who require diamond tools that deliver reliable and powerful performance every day.

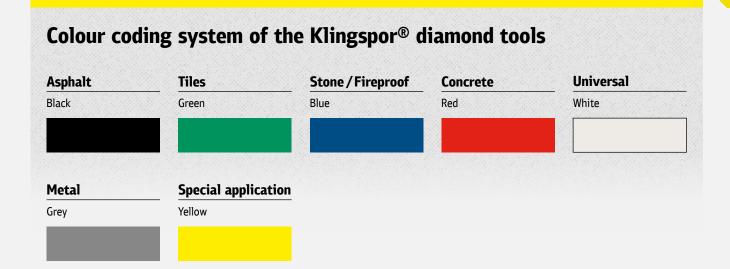

Product line 300 – Brand name quality at an affordable price. For users who expect their tools to meet professional standards, but do not need to use them continuously.

- 1. Klingspor cat. number
- 2. Product group / type
- 3. Applications
- 4. Safety pictograms
- 5. Max. operating speed
- 6. Klingspor logo

- 7. Information about the manufacturer
- 8. Safety standard
- 9. Dimensions in mm and inches
- 10. Max. RPM
- 11. Rotational direction

Applications guide

1.

Standard gullet

- rapid feed rate
- exceptional cutting properties

2.

Turbo continuous rim

- exceptionally smooth operation
- clean cutting edges

3.

Continuous rim

- ▶ clean cutting edges
- work with superior precision
- short cutting times

4.

Turbo segments

- exceptionally smooth operation
- clean cutting edges
- ▶ fast cutting speed
- ▶ long service life

5.

Short segments

- ▶ first-rate cutting performance
- clean cutting edges

6.

Wide gullet

▶ high feed rate

7.

Narrow gullet

- clean cut
- exceptionally smooth operation thanks to narrow segment spacings

8.

Hammer segments

- prevent rear grinding
- prevent segments tearing off
- optimal protection thanks to segments soldered in

9.

Continuous rim with special geometry

- ▶ for extra clean cutting edges
- soft and comfortable cutting performance

10.

Continuous rim with laser-cut slots

- for fine and clean cutting edges
- specially designed for ceramic and fine stoneware

Diamond tools

Applications guide

Number of revolutions

Diamond tools made by Klingspor are high performance products and have been engineered to reach their highest level of performance at a level immediately below their maximum peripheral surface speeds. The maximum permissible values for motor speed and operating speed are indicated on every diamond blade.

The table below contains all permissible maximum speeds as a function of the diameter and the maximum permissible operating speed of the diamond tools.

Maximum operating speed [m/s]												
		30	35	40	45	50	55	60	70	80	100	
	200	2865	3342	3820	4297	4775	5252	5730	6685	7640

Motor speeds and cooling water quantity

The recommended speed range

The chart illustrates the ideal speed range for drill bits as a function of the diameter and the maximum permissible operating speed.

Recommended cooling water quantity

Drill bits require cooling with water regardless of the material on which they are used. Refer to the right side of the table for the recommended quantity of cooling water.

Diamond cutting blades for petrol powered cutters and table saws

Design

Vacuum-brazed

Segmentation	Narrow gullet
Aggression	
Service life	

Applications:

Construction materials •			
Concrete, universal	•		
Glass	•		
Wood-based materials	•		

Plastic	•
Rubber	•
Metal	•

Advantages: Vacuum-brazed diamond cutting blade for almost all materials - Very wide range of applications due to special manufacturing process - 10 mm high diamond coating for a good service life and an aggressive cut for very different and demanding materials - Ideal for rescue services

Diameter x Bore in mm	Max. operating speed	Max. RPM	Segment in mm Number / Length / Width / Height	Packing unit/pcs.	Cat. number	Price/piece ZAR	Discount group

Diamond cutting blade CEVOLUTION

DT 350 AB EXTRA **CEVOLUTION**

Design

Aggression

Service life

Segmentation Wide gullet

Laser welded

Applications:

Asphalt			•
Concrete			•

Advantages: Multi-purpose product for all repairs on asphalt and concrete thanks to laser-welded block segments, turbo segments and slanted protective segments - Can be used on gasolinepowered cutters and joint cutters with up to 10 kW - The diamond cutting blade DT 350 AB includes the new CEVOLUTION technology. CEVOLUTION stands for holistically optimized, ceramic abrasives. Klingspor products with CEVOLUTION technology contain, among others, an optimized grit mix, grit sizes and formulation in order to offer the maximum performance in every application.

Flexible abrasives

About the product

R-Flex abrasives

Used for finishing and polishing all kinds of surfaces. Despite their elastic construction, R-Flex abrasives boast a long service life with high dimensional stability throughout their use.

Mounted points

Available in numerous sizes and grains. They are used for apparatus and container construction, in the aviation and automobile industries, as well as in the food and chemical sectors.

The Sandflex hand block

Cleans, polishes and matt finishes a large variety of materials including metal, wood, paints, plastics, rubber and paper. In addition to its commercial applications, the Sandflex hand block is also excellent for car care and jobs around the house like cleaning iron soleplates, ski edges etc. Sandflex performs even better when used with water, soap, paraffin oil or pastes. With four different grain sizes to choose from, you will find the right product for all types of materials and jobs.

R-Flex wheels

Available with silicon carbide or corundum grit in different binding hardnesses and dimensions. Typical applications are deburring plastic parts, giving surgical instruments their final finish, sharpening knives, etc. R-Flex wheels are, due to their elastic attachment, easy to shape and adjust to the contours of the tool during grinding.

Mottling point fixing spindle with milled plane surface

Mottling points

Create special surface effects with a uniform, extra fine finish.

R-Flex mottling points are used with great success for surface treatment applications in tank and container construction (breweries, wine and champaign producers) and in plant construction for commercial kitchens. They are available with bonding agents E (specially designed for aluminium and NF metals) and the softer, more elastic bonding agents W and T (for stainless steel) – with the T bonding agent creating a glossier finish on stainless steel surfaces and offering suitability for universal use.

Klingspor mottling points are available with 2 shaft options

- ► a full length round shaft
- ► a shaft with a milled plain surface (see image above) for secure mounting

Flexible abrasives

Applications guide

R-Flex points for cleaning and finishing and R-Flex wheels are ideally suited for fine machining surfaces thanks to their elastically embedded grit. Matching any type of possible application, Klingspor offers an extensive range of tools with a large variety of dimensions, grit sizes and three different kinds of bonding agents (hard, medium and soft). The chart below provides an overview of the available versions:

Example of a decorative finish created with an R-Flex mottling point SFM 656 on a stainless steel sheet

Dimensions R-Flex point RFS 651

Ø [mm]	Possible widths [mm]	Grit size	Minimum order quantities	Requested grit type / grit size

About the product

Powerful milling and leveling of surfaces and forms

Klingspor carbide burrs are used wherever outstanding stock removal and service life are pivotal to the proper processing of hard-to-reach places. The burrs are manufactured according to the highest quality standards and with utmost precision. Our comprehensive product selection offers all shapes and dimensions

necessary to find the solution that matches each application best. Thanks to the abundance of available toothing options, you can be sure to achieve the desired outcome on any material and with unparalleled speed.

Materials

Applications guide

The cuts at a glance

2 Cuts

Standard cut / plain cut with good finishing properties for universal applications.

3 Cuts aluminium

High stock removal rate and reduced clogging of teeth for working on long-chipping and soft materials like NF metals and plastics.

6 Cuts mega seller

Double cut for universal applications, improved handling and low vibration. Creates a small chip.

New high performance tooth geometries for steel and INOX processing

Perfectly adapted to the respective group of processed material, the newly engineered blade geometries 10 (steel) and 11 (INOX) allow for a significantly higher stock removal rate when compared to the cross-cut toothing typically found on ordinary burrs.

The advantages at a glance:

- ▶ higher level of aggressiveness and cutting performance
- ▶ improved chip removal
- ► markedly enhanced service life thanks to reduced built-up edge formation
- ▶ less thermal stress on tool and workpiece
- ► decrease in annealing colours during INOX applications

10 cuts high performance tooth geometry - steel

Toothing optimised for steel processing; significantly higher stock removal rate compared to a standard cross-cut tooth geometry

11 cuts high performance tooth geometry - INOX

Toothing optimised for the processing of austenitic as well as corrosion and acid-resistant grades of stainless steel; strikingly improved stock removal performance by contrast with standard cross-cut tooth geometries

Additional cuts available on request

Applications guide

20,000

15,000

Important safety recommendations

- ► Please ensure that a maximum 30% of the tools circumference is in contact with the workpiece
- ► Extra long burrs with extended shank require slower operating speeds
- ► Ensure the burr is clamped correctly in a regularly maintained operating tool
- ► Run the selected burr at the correct operating speed to avoid risks and to ensure an optimum tool performance
- ► Please observe the safety recommendations on the packaging

Burr head in mm	Max. RPM
2/2,4/3	100,000

Notes

About the product

The wire brushes made by Klingspor are used for a wide variety of machining tasks in the steel and stainless steel sector. A key benefit a wire brush holds over abrasives is the fact that the brush only works on the surface of the workpiece without changing the shape of the workpiece to be processed. This benefit is of particular importance during work on ultra-thin sheet metal.

The selection of wire brushes offered by Klingspor comprises a comprehensive range of products that are designed for the most diverse machining tasks, materials and machines.

Applications

- ► Cleaning of weld seams and surfaces (rust removal, descaling, paint stripping)
- ► Deburring of cutting edges
- ► Structuring of surfaces (creating matt, satin or rough finishes)

● = main application * available on request

Applications guide

The most common brushes at a glance

Wheel brushes

Preparing and finishing weld seams, deburring and cleaning cutting edges, corners or angles

Cone brushes

For work on difficult-to-access areas, corners or edges as well as for surface cleaning

Cup-shaped brushes

For efficient rust, paint or weld spatter removal from large surfaces

End brushes

Ideal tool for work on the insides of pipes, drill holes or indentations

Handheld brushes

For the manual cleaning of surfaces and weld seams

Applications guide

Klingspor logotype Reference to certified Klingspor quality

2. Safety recommendations

3. Rotational speed

Reference to maximum permissible motor speed in revolutions per minute

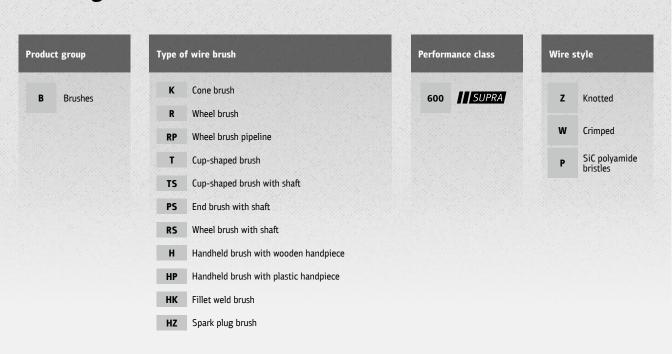

4. Wire style

Klingspor offers wire brushes with knotted, crimped or SIC polyamide bristles

5. Area of application

The base colour of the tool gives an indication of the wire material used Green = stainless steel
Silver = steel

What the type designation reveals about the design of wire brushes

Here explained by example of the BTS 600 W

Product	t group	f wire brush	Perform	ance class	Wire s	tyle	
В	Brushes	TS	Cup-shaped brush with shaft	600	SUPRA	w	Crimped

Applications guide

Bristle materials and their properties

Wire types / style

Steel wire

High strength quality steel wire with great tensile and bending fatigue strength for exceptional economy.

Knotted

- ► Aggressive brush action
- ► Long service life
- ► Minimum flexibility

Non-corrosive steel wire / INOX

Quality stainless steel wire with great tensile

strength for a long service life. Resistant to

corrosion during applications on chromium-

nickel steel, aluminium and other NF metals.

Crimped

- ► Gentle, material-friendly brush action
- ► For sensitive surfaces and soft materials
- Perfect contouring to the shape of the workpiece

Brass wire

Soft, fine brass wire for the surface finish of NF metals (copper, brass).

Polyamide bristle

A flexible abrasive bristle interspersed with SiC abrasive grain. Uniform brush action thanks to the continuous release of new abrasive grain.

Applications guide

Safe application of wire brushes

The maximum operating speed of the brush varies with the diameter of the brush and must never be exceeded for safety reasons. Before using the brush, always verify that the motor speed of the machine does not exceed the maximum operating speed of the brush.

Refer to the table below for a recommendation as to which brush diameter you can mount on which angle grinder:

	Ø.	Ø 115 mm (max. 12,500 rpm)	Ø 125 mm (max. 11,500 rpm)	Ø 180 mm (max. 8,500 rpm)				
Турс	e of brush	Brush diameter						
	BR 600 Z Wheel brush, knotted	Ø 115 mm (max. 12,500 rpm)	Ø 125 mm (max. 12,500 rpm)	Ø 180 mm (max. 8,500 rpm)				
	BRP 600 Z Pipeline brush, knotted	Ø 115 mm (max. 15,000 rpm)	Ø 125 mm (max. 12,500 rpm)	Ø 180 mm (max. 9,000 rpm)				
	BK 600 Z Cone brush, knotted	Ø 100 mm Ø 115 mm (max. 12,500 rpm)						
	BT 600 Z Cup-shaped brush, knotted	Ø 65 mm (max. 12,500 rpm)		Ø 80 mm Ø 100 mm (max. 8,500 rpm)				
	BT 600 W Cup-shaped brush, crimped	Ø 65 mm (max. 12,500 rpm)		Ø 80 mm Ø 100 mm (max. 8,500 rpm)				

Applications guide

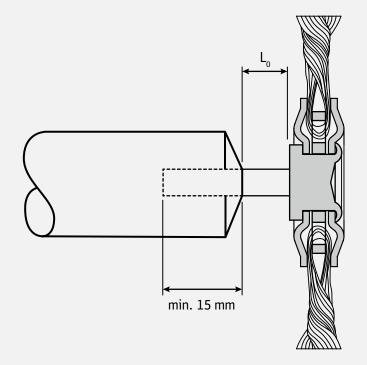

Cutting speeds

The cutting speeds are dependent on the material to be processed. Working within the proper speed range is paramount to the economical operation of the brush. Depending on the material, we recommend using the following cutting speeds as guidelines:

	Cutt	Cutting speed [m/s]										
Material	10	15	20	25	30	35	40	45	50	55		
Steel								40-50				
Stainless steel					30	-35						
NF metals			18-22									
Plastic		15	-20									

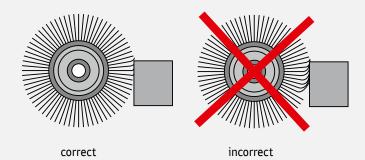

Safe use of shaft brushes

The receiving shaft should be as low as possible, but should be clamped into the tool holder with a depth of no less than 15 mm. If the exposed shaft length is L0 > 10mm, the speed must be reduced for safety reasons.

Tool pressure

You will achieve an optimum sanding result when working only with the wire tips of the brush. Increasing the tool pressure will cause the brush to wear out faster due to wire breakage and thus reduce the service life of the brush.

Applications guide

Factors with an impact on the brushing result

If the brushing result does not satisfy your requirements, you can optimise the outcome by changing certain application parameters.

Measure Problem	Brush Ø	Rotational speed	Wire thickness	Bristle length
Brush action too weak	increase	increase	increase	reduce
Brush action too aggressive	decrease	reduce	reduce	extend
Surface finish too rough and uneven	decrease	reduce	reduce	extend
Surface finish too fine	increase	increase	increase	reduce
Formation of secondary burrs	increase	increase	increase	reduce

The safe use of Klingspor abrasives

Manufactured in compliance with the requirements set out in the EN 1083-2, Klingspor wire brushes guarantee the highest level of safety for the user.

Wear safety goggles or glasses to protect the eves

Wear dust mask

Wear safety gloves to protect hands

Observe safety instructions

Wheel brush, knotted wire

BR 600 Z

Applications:	
Stainless steel	
Steel	•

Advantages: Wheel brush for pre- and post-processing of welding seams - For aggressive removal of scale, rust, slag - For heavy brushing and deburring work

Pipeline brush, knotted wire

BRP 600 Z

Applic	ations:		
Steel			•
Stainle	ess steel		•

Advantages: Ideal tool for the professional processing of U / V-type welds in pipeline, pipework and container construction - Thanks to its slim overall width it is also well suited for working on hard-to-reach areas (e.g. root or narrow fillet welds) - Cleaning of all welding seams on pipe connections

Diameter x Width x Bore in mm	Fill material	Wire thickness in mm	Filament length in mm	Number of knots	Max. RPM	Packing unit/pcs.	Cat. number	Price/piece ZAR	Discount group

Bevel brush with thread, knotted wire

BK 600 Z

Applications:	
Steel	•
Stainless steel	•

Advantages: Ideal tool for working on hard-to-reach areas, inside corners and bevels - High brushing capacity due to knotted wire design - Excellent for cleaning larger surfaces - Removal of scale, rust, paint, slag, etc.

Diameter x Width in mm	Thread/Shaft	Fill material	Wire thickness in mm	Filament length in mm	Number of knots	Max. RPM	Packing unit/pcs.	Cat. number	Price/piece ZAR	Discount group

Wheel brush with shaft, polyamide bristles

BRS 600 P

Applications:
Stainless steel

Stainless steel

NF metals

Wood

Advantages: Abrasive bristles of polyamide interspersed with silicon carbide (SiC) grain for working with light contact pressure - Ideal for structuring and paint stripping of wooden components - Removal of oxide layers on non-ferrous metals or of tarnish colours on stainless steel components, e.g. filled rods on stainless steel railings

Diameter x Width x Shaft in mm	Total length in mm	Fill material	Filament length in mm	Max. RPM	Packing unit/pcs.	Cat. number	Price/piece ZAR	Discount group

Retail range

Point of Sale

Flexible, easy care and maintenance, representative: The new, modular POS system by Klingspor

The full range of products – from the show room to one-on-one selling. It must be representative, boost sales and be easy to care for – the requirements for a POS are manifold and keep changing. The new POS system by Klingspor can be configured flexibly according to individual needs.

Flexibility

The new Klingspor POS system is flexibly scalable. Standardised modules with a width of one metre can be flexibly extended in height and width. All new POS elements are fully compatible with previous Klingspor POS modules.

Optimally representative

The image modules complement your POS presentation by true attention-getters. Depending on your line of goods, these modules can be fitted out flexibly. The main eye-catcher is a large work piece, on which typical application examples can be shown.

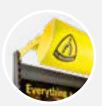

Minimal effort for care and maintenance

The modular design and easily exchangeable magnetic foils keep your wall up to date: Popular products and promotions that make for sales momentum can be installed on the wall with a few simple steps. Out-of-stock fast movers can be refilled directly at the POS through an optional storage space in the base rail.

Point of Sale Catalogue

Please request our Point of Sale Catalogue for more detailed information on the POS elements, modules and accessory.

Backlit top panels

Simple but effective: With backlit top panels that disperse light to the front as well as on the products, you will find it easy to attract attention to your POS.

Optional storage space

Consultancy documents or much-in-demand fast movers for refilling the wall quickly can be stored easily in the storage space behind the base rail.

Point of Sale

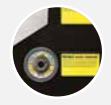

Flexible labelling due to detachable magnetic foils

Quick orientation, fewer questions and quickly placed.

Representative image module

A true attention-getter – with user-oriented tasks, you can stage the highlight products in your line of goods. Beside a stainless steel hexagon with different machining examples, your own in-house work pieces can be set up.

Individual concepts are possible

Design the wall with individual eye-catchers that hit on the dot the work focus of your customers. We are glad to advise you!

Magnetic headder foils

The magnetic folis are also suited for centre gondolas and offer quick orientation.

Safety recommendations

Applications guide

General Principles of Safety

Abrasive products improperly used can be very dangerous.

- Always follow the instructions provided by the abrasive product and machine supplier.
- Ensure that the abrasive product is suitable for its intended use. Examine all abrasive products for damage or defects before use.
- ► Follow the correct procedures for handling and storage of abrasive products. Be aware of the hazards likely during the use of abrasive products and observe the recommended precautions to be taken:
- ► Bodily contact with the abrasive product at operating speed.
- ► Injury resulting from product breakage during use.
- Grinding debris, sparks, fumes and dust generated by the grinding process.
- ▶ Noise
- Vibration

Use only abrasive products conforming to the highest standards of safety. These products will bear the relevant EN standard number and/or the inscription "oSa":

- ► EN 12413 for Bonded Abrasives.
- EN 13236 for Superabrasives.
- ► EN 13743 for Specific Coated Abrasives (vulcanised fibre discs, flap wheels, flap discs and spindle-mounted flap wheels).

Never use a machine that is not in good working order or one with defective parts. Employers should carry out a risk assessment on all individual abrasive processes to determine the appropriate protective measures necessary. They should ensure that their employees are suitably trained to carry out their duties.

More detailed information on the safe use of abrasive products, comprehensive Safety Codes are available from FEPA or your National Trade Association.

- ► FEPA Safety Code for Bonded Abrasives and Precision Superabrasives.
- ► FEPA Safety Code for Superabrasives for Stone and Construction.
- ► FEPA Safety Code for Coated Abrasives.

Precautions against likely hazards

Bodily contact with the abrasive product

- Always take great care and attention when using abrasive products. Tie back long hair and do not wear loose clothing, ties or jewellery.
- Prevent accidental start up of the machine before mounting or changing an abrasive product. Isolate machines from their power source where necessary.
- Never remove guards from machines where fitted and ensure they are in good condition and properly adjusted before starting the machine.
- Always use gloves and suitable clothing where the workpiece or machine is handheld. For gloves, a minimum protection level of EN 388 Category 2 is recommended.
- After switching off the machine, ensure the product has come to rest before leaving the machine unattended.

Injury caused by product breakage

- Always handle abrasives with great care, they are easily damaged. Examine all
 products for defects or damage before use.
- Store abrasives in dry, frost-free conditions avoiding wide variations in temperature. Ensure they are properly protected and supported to prevent damage and distortion.
- ► Coated abrasives should be stored at 18-22° C, 45-65% relative humidity.
- ► Abrasive belts should be hung on a rod or peg not less than 50mm diameter.

- Never use an abrasive product beyond its expiry date where marked. Observe the recommended shelf life for the following specific products; Resinoid and Shellac products 3 years, Rubber products 5 years, Vitrified products 10 years.
- ► Check abrasive product or package for any warnings or other safety information.
- ► Ensure that the correct abrasive product is selected. Never use a product if it cannot be properly identified.
- Follow the instructions provided by the abrasive product or machine supplier when mounting abrasive products. Observe any mounting indications marked on the product such as direction of run or mounting position.
- ▶ Never force the abrasive product onto the mounting fixture or modify it to fit.
- ▶ Never exceed the maximum operating speed where specified.
- Check that the correct mounting devices are used and that they are undistorted, clean and free from burrs.
- ▶ Use mounting blotters where supplied.
- ▶ Do not tighten the mounting device excessively.
- After mounting or re-mounting an abrasive product, conduct a trial run at operating speed with the guard in place for at least 30 seconds, standing clear of the machine before use.
- Never remove guards from machines where fitted and ensure they are in good condition and properly adjusted.
- Ensure that the workpiece is secure and properly supported. Ensure that work rests are properly adjusted and secure.
- ▶ Never start the machine with the workpiece in contact with the abrasive product.
- Never apply excessive force or shock to the abrasive product or let it overheat.
- $\,\blacktriangleright\,$ Do not grind on the part of the product that is not designed for the operation.
- Avoid grinding with the edge of abrasive belts, use the centre of the belt if possible.
- Avoid clogging and uneven wear to ensure that the abrasive product is working efficiently. Dress frequently where appropriate.
- ► Let the abrasive product stop naturally, not by applying pressure to its surface.
- ► Turn off and spin out excess coolant before stopping the machine.
- ▶ Do not leave abrasive belts under tension when not in use.

Safety recommendations

Applications guide

Grinding debris - sparks, dust and fumes

- Exposure to dust generated from workpiece and/or abrasive materials can result in lung damage and/or other physical injury.
- ► All dry grinding processes should be provided with adequate extraction facilities.
- ▶ Do not use abrasive products near flammable materials.
- The use of respirators complying with EN149 is recommended for dry grinding processes even if extraction systems are provided.
- Guards where provided should be adjusted to deflect sparks and debris away from the operator.
- ► Take additional measures to protect people working nearby.
- Eye protection is recommended for all machine applications for abrasives. For handheld machines or workpiece, goggles or full face shields are recommended.
- ► Eye protection with a minimum protection of EN166 Grade B is recommended.
- Ensure that the correct abrasive product is selected. An unsuitable product can produce excessive debris and dust.

Noise

- Ear protection complying with EN352 is recommended for all applications where the workpiece or machine is handheld, irrespective of the noise level.
- ► Ensure that the correct abrasive product is selected. An unsuitable product can produce excessive noise.

Vibration

- ► Processes where the workpiece or machine is handheld can cause vibration injury.
- ► Action needs to be taken if tingling, pins and needles or numbness is experienced after 10 minutes continuous use of the abrasive product.
- The effects of vibration are more pronounced in cold conditions so keep the hands warm and exercise hands and fingers regularly. Use modern equipment with low vibration levels.
- Maintain all equipment in good condition and stop the machine and have it checked if excessive vibration occurs.
- Use good quality abrasive products and keep them in good condition during their life.
- Maintain mounting flanges and backing pads in good condition and replace if worn or distorted.
- Do not grip the workpiece or machine too tightly and do not exert excessive pressure on the abrasive product.
- ► Avoid continuous use of the abrasive product.
- ▶ Use the correct product. An unsuitable product can produce excessive vibration.
- ► Don't ignore the physical symptoms of vibration seek medical advice.

Disposal of abrasives

- Used or defective abrasives should be disposed in accordance with local or national regulations.
- ► Further information can be obtained from material safety data sheets provided by the supplier.
- ▶ Be aware that the abrasive product may be contaminated with material from the workpiece or process after use.
- Disposed abrasive products should be damaged to prevent them from being taken from waste skips and re-used.

SAFETY RECOMMENDATIONS FOR THE USE OF ABRASIVE BELTS

1. General safety recommendations

- Ensure that quality and dimensions of the belt are correct for the machine and type of application. Refer to the machine manufacturer's instructions.
- ▶ Do not use near easily flammable material.
- ► Prevent long hair, loose clothes or jewellery from getting into contact with the machine and being pulled in. Take precautionary measures.
- ► Ensure that people nearby are protected from chips, sparks, debris, fumes, dust and noise. Belt grinding operations may produce high concentrations of dust, gas or mist, which can represent a health hazard as well as a risk of explosion.
- Do not open the guard or put down the machine until the belt has come to a complete standstill.

2. Specific safety recommendations

- Abrasive belts can tear. Please take precautions against risks by tearing of belt (e.g. protective clothing and devices, safety equipment of machinery).
- Abrasive machines, which do not have a completely closed guard require comprehensive protective equipment of the user (e.g. protective gloves, leather aprons, face shield, dust mask).
- Check the locking mechanism of the machine cover. Do not remove guards.
 Any contact with running belts can result in serious injuries.
- ► When mounting, refer to direction of running advice, if necessary.
- ▶ Make sure the workpiece is held correctly or is mechanically secured.
- Start the machine and wait until belt has reached its full operational speed before grinding.
- ► Belts should only be used dry unless specified as suitable for wet grinding (please contact the manufacturer if in any doubt).
- Use the centre of the belt, if possible, and grind as flat as possible. Avoid grinding with the edge of the belt as well as strong punctual loading e.g. through sharp or sharp-edged workpieces.
- ► Do not exert excessive pressure and prevent the belt from overheating.
- Check the belts in use periodically for wear and tear or damage (e.g. cracks at edges, fracturing or strong wear and tear in the joint) and replace the belts if necessary.

Due to the extraordinary variety of applications and machine constructions, these recommendations are limited to basic aspects of safety. Further safety regulations and instructions can be taken from the respective legislation, decrees and technical standards.

CONDITIONS OF SALE AND DELIVERY OF KLINGSPOR ABRASIVES SA (PTY) LTD

IN THIS AGREEMENT THERE ARE CERTAIN CLAUSES OF SIMILAR FONT TO THIS TEXT, WHICH CONTAINS PROVISIONS THAT MAY HAVE THE EFFECT OF (I) LIMITING THE RISK OR LIABILITY OF THE COMPANY OR OF ANY OTHER PERSON AND/OR (II) MAY CONSTITUTE AN ASSUMPTION OF RISK OR LIABILITY BY YOU AND/OR (III) MAY IMPOSE AN OBLIGATION ON YOU TO INDEMNIFY THE COMPANY OR ANY OTHER PERSON FOR ANY CAUSE AND/OR (IV) MAY BE AN ACKNOWLEDGEMENT OF ANY FACT BY YOU. THESE PROVISIONS ARE VERY IMPORTANT AND YOU MUST ENSURE THAT YOU READ THEM CAREFULLY AND THAT YOU UNDERSTAND THEM CLEARLY.

1. GENERAL

- 1.1 All contracts are exclusively subject to the COMPANY'S terms and conditions of delivery and sale and the COMPANY rejects any terms and conditions of the CUSTOMER to the contrary or deviating from the COMPANY'S terms and conditions unless it has expressly consented to their validity in writing.
- 1.2 The terms and conditions set out herein cancel all previously issued terms and conditions.
- 1.3 These terms and conditions, as re-issued or revised by the COMPANY from time to time, apply to all orders placed with the COMPANY and such orders are subject to acceptance by the COMPANY and shall be deemed to be made subject to these terms and conditions.
- 1.4 No qualification or condition contained in any order form, acknowledgement of order or otherwise, shall form part of the contract of sale or override these terms, unless expressly agreed to in writing by the Managing Director of the COMPANY. No employee or agent of the COMPANY shall have the authority or the ability to change these terms in any manner whatsoever, save for the Managing Director of the COMPANY.
- 1.5 Price lists issued by the COMPANY from time to time, are for information purposes only and do not constitute offers for sale.
- 1.6 The COMPANY reserves the right to refuse an order and acceptance on the part of the COMPANY shall only be deemed to have occurred on delivery of the GOODS.
- 1.7 Save insofar as may be otherwise specifically agreed upon in writing to the contrary by the COMPANY, orders are accepted only at prices and transport tariffs on that date of dispatch.
- 1.8 Due to variables such as quantity, size, packaging, marketing etc., invoiced prices may differ marginally from advertised prices.

2. APPLICATION OF THE CONSUMER PROTECTION ACT

- 2.1 If the CPA is applicable to this AGREEMENT, the provisions of the CPA shall be applied and take precedence where they contradict any provision of this AGREEMENT
- 2.2 Whether the CPA applies to this AGREEMENT depends on whether certain values of the CUSTOMER's business (the "Threshold Values") are above or below the threshold
- 2.3 The Threshold Values are the CUSTOMER'S asset value or annual turnover. If either of these values exceed R2 000 000.00 (Two Million Rand) on the date that the Parties agree that the COMPANY will sell the GOODS, the CPA will not apply to this AGREEMENT.
- 2.4 The values measured and the threshold itself will be amended from time to time, in which case the Parties agree that the new measurements shall apply to this AGREEMENT from the date of such amendment.
- 2.5 The COMPANY'S duties in terms of this AGREEMENT may vary depending on whether the CPA applies to it, and the COMPANY shall act upon the information given by the CUSTOMER in the credit application form. Consequently:
- 2.5.1 The CUSTOMER warrants that any statement made to the COMPANY in respect of its Threshold Value is accurate.
- 2.5.2 If the CUSTOMER claims that all the Threshold Values are below R2 000 000.00 (Two Million Rand), or otherwise that the CPA applies to this AGREEMENT, the COMPANY may at its instance require the CUSTOMER to provide it with financial statements as proof thereof.
- 2.5.3 If the CUSTOMER misstates the Threshold Values and as a consequence the COMPANY believes that this AGREEMENT is subject to the CPA when it is not, then the COMPANY may retroactively apply any provisions of this AGREEMENT that were not applied as a result of this belief.
- 2.6 The CUSTOMER shall be liable for any costs or damage sustained by the COMPANY resulting from such misstatement.

3. INTERPRETATION AND DEFINITIONS

- 3.1 In this AGREEMENT unless the context otherwise requires:-
- 3.1.1 The singular shall import and include the plural and vice versa;
- 3.1.2 Words indicating one gender shall import and include other genders;
- 3.1.3 Words indicating natural persons shall import and include artificial persons;
- 3.1.4 The headnotes to this AGREEMENT are used for the sake of convenience only and shall not govern the interpretation of the clauses to which they relate;
- 3.1.5 Where any number of days is prescribed in this AGREEMENT, they shall be calculated exclusive of the first day and inclusive of the last day unless the last day falls on a Saturday, Sunday or public holiday. In such day the last day shall be the next succeeding day which is not a Saturday, Sunday or public holiday;
- 3.1.6 If any doubt or conflict arises where figures are referred to in numerals and in words, the words shall prevail;
- 3.1.7 Should there be any conflict or inconsistency between this AGREEMENT and other agreement/s concluded between the Parties, then terms and conditions of this AGREEMENT shall prevail;
- 3.1.8 If any provision in a definition contained in this AGREEMENT is a substantive provision conferring rights or imposing obligations on any Party, notwithstanding that it only appears in the definition clause, effect shall be given to it as if it were a substantive provision in the body of the AGREEMENT;
- 3.1.9 The rights and obligations of any Party arising from this **AGREEMENT**, shall devolve upon and be binding upon its successors-in-title.
- 3.2 Unless such meaning is inconsistent with the context, the following terms shall, throughout this AGREEMENT, have the meanings respectively ascribed to them, namely:
- 3.2.1 "AGREEMENT" shall mean these terms and conditions of sale and delivery and annexures, if any, attached hereto;
- 3.2.2 "COMPANY" shall mean Klingspor Abrasives SA (Pty) Ltd, with Registration Number: 1998/022423/07, a company duly registered and incorporated in accordance with the laws of the Republic of South Africa, with registered address situated at 2 Spartan Road, Spartan, Johannesburg, South Africa;
- 3.2.3 "CONTRACT PRICE" shall mean the price of the GOODS as set out in the invoice;
- 3.2.4 "the CPA" shall mean the Consumer Protection Act, 86 of 2008, as amended.
- 3.2.5 "CUSTOMER" shall mean the person or legal entity with whom an AGREEMENT is entered into for the sale of the GOODS;
- 3.2.6 "DELIVERY NOTE" shall mean a note on which is reflected at least the invoice number, delivery instruction note number, net and gross weights and number of bags/packages/cartons or other containers in which the GOODS are supplied. All INVOICES shall be accompanied by a tax invoice complying with the Value Added Tax Act (as amended);
- 3.2.7 "GOODS" shall mean the GOODS as described more specifically in the invoice;
- 3.2.8 "INVOICE" shall mean the invoice document of the COMPANY whereon an invoice number, full particulars of the CUSTOMER, CONTRACT PRICE and the date of order of the GOODS by the CUSTOMER shall appear.

4. PRICES

- 4.1 Unless otherwise agreed upon in writing, the CONTRACT PRICE shall, inter alia, be deemed to include charges for landing costs, packing and storage.
- 4.2 In the event that the order value exceeds the value for free transportation, currently R2 500.00 (Two Thousand Five Hundred Rand), the costs of the transport shall be paid by the COMPANY.
- 4.3 In the event that the order value falls below the value for free transportation, currently R2 500.00 (Two Thousand Five Hundred Rand), the order will not be delivered to the CUSTOMER and will be held back by the COMPANY, pending additional orders from the CUSTOMER until such time as the cumulative order value exceeds the value for free transportation, currently R2 500.00 (Two Thousand Five Hundred Rand).
- 4.4 Notwithstanding clause 4.3 above, in the event that the order value falls below the value for free transportation, currently R2 500.00 (Two Thousand Five Hundred

- Rand), and the CUSTOMER requires immediate delivery of the GOODS, the costs of the transport shall be paid by the CUSTOMER.
- 4.5 The COMPANY reserves its right to add a reasonable charge for storage on any items which have not been collected or could not be delivered within 14 (Fourteen) days of the date on which they were available for delivery or collection, as the case may be, and in the event that this is as a result of the CUSTOMER'S conduct.
- 4.6 All orders are accepted subject to a 'minimum carriage free order value'. In this regard, the transport costs shall be borne by the CUSTOMER.
- 4.7 Any orders accepted below the 'minimum order value' shall attract an administration charge in addition to the transport charge referred to in clause 4.4 above.
- 4.8 'Minimum carriage free order values' and 'minimum order values' are subject to alteration without notice.
- 4.9 Samples and specimen products are only delivered against payment by the CUSTOMER, unless the Parties have otherwise agreed upon in writing.
- 4.10 The COMPANY shall retain the title to and copyrights in all offer documents; these may not be made available to third parties without the COMPANY'S express written consent.
- 4.11 The CONTRACT PRICE shall specifically exclude Value Added Tax (VAT) and any other taxes that may be levied in respect of the GOODS. The COMPANY reserves its rights to effect price increases from time to time without notification to the CUSTOMER. The onus shall be on the CUSTOMER to remain informed of the prices of the COMPANY. No COMPANY employee, official, agent or nominee shall have the authority to effect or authorise any discounting of the CONTRACT PRICE of the GOODS save the Managing Director of the COMPANY.
- 4.12 The price quoted for GOODS may be increased by the COMPANY in the event that the COMPANY incurs any increase in the cost of labour, materials and transport between the date of accepting an order placed by the CUSTOMER and the date of delivery of the GOODS concerned.
- 4.13 Notwithstanding the stated price on the INVOICE, the CONTRACT PRICE shall, at all material times, be subject to any increase of duties, levies, taxes, transport, storage and packing costs and the COMPANY shall endeavour, where reasonably possible, to inform the CUSTOMER in advance of any anticipated increases of the aforestated.
- 4.14 Due to the nature of the COMPANY'S manufacturing process, the COMPANY and the CUSTOMER, shall agree (where applicable) upon an allowance in respect of a reasonable variation in the quantity of GOODS supplied in respect of each order.

5. PAYMENT

- 5.1 Unless otherwise agreed upon between the Parties, payment shall be made in full without any deduction or set off in respect of GOODS sold. Payment shall be made by the CUSTOMER within 30 (Thirty) days from the date of statement.
- 5.2 Notwithstanding the aforementioned, the COMPANY reserves the right to demand payment from the CUSTOMER prior to any delivery taking place.
- 5.3 The COMPANY reserves the right to extend credit facilities to CUSTOMERS, from time to time, without any obligation to do so notwithstanding having extended such facilities in the past to any CUSTOMER.
- 5.3.1 Where the COMPANY has agreed to supply GOODS on credit, payment in full shall be due within 30 (Thirty) days from date of the first monthly statement rendered by the COMPANY.
- 5.3.2 The monthly accounts of the COMPANY are closed on the 25th day of each month. Payment must be credited to the banking accounts of the COMPANY by the 25th day of the following month.
- 5.4 Credit facilities shall only be afforded to CUSTOMERS after completion of the necessary documents required by the COMPANY and the CUSTOMER having provided the COMPANY with the required guarantees/suretyships.
- 5.5 The COMPANY reserves its right to, at any time and after having provided the CUSTOMER with reasonable notice, and reasonable notice to be deemed to be 30 (Thirty) days, advise that credit facilities to a CUSTOMER by the COMPANY shall be terminated, and the COMPANY shall be under no obligation whatsoever to provide any reasons for such termination.
- 5.6 It is specifically agreed upon and recorded that at all material times, it shall be the sole prerogative of the COMPANY to decide to which CUSTOMERS it would be willing to extend credit facilities, it specifically being understood by CUSTOMERS that any differentiation shall not be deemed to be discriminatory but shall be deemed to form part of the COMPANY'S internal credit risk limitation policy.

- 5.7 The COMPANY shall be entitled to refuse the sale of GOODS to any CUSTOMER in the event of overdue accounts owing by the CUSTOMER to the COMPANY, or in the event that a CUSTOMER is not able to obtain/provide satisfactory guarantees/ suretyships.
- 5.8 It is specifically recorded and agreed that any late payments by a CUSTOMER shall constitute an automatic breach of any credit facility agreement entered into between the COMPANY and the CUSTOMER and provided to the CUSTOMER by the COMPANY and accordingly, the COMPANY reserves the right at any time to refuse any further sale of GOODS to the CUSTOMER and/or demand a cash on delivery basis, until all outstanding accounts including any accrued interest on such outstanding accounts have been settled in full by such CUSTOMER.
- 5.9 IT IS SPECIFICALLY RECORDED AND AGREED THAT THE CUSTOMER WAIVES ALL CLAIMS AGAINST THE COMPANY FOR ANY DAMAGES OR LOSSES THAT IT MAY SUFFER AS A RESULT OF THE REFUSAL OF THE COMPANY TO SELL GOODS TO THE CUSTOMER IN THE EVENT OF AN OVERDUE ACCOUNT, OR IN CONNECTION WITH ANY OTHER DISPUTE WHATSOEVER ARISING OUT OF PAYMENT FOR GOODS.

6. INTEREST

It is specifically recorded and agreed that interest on overdue accounts shall be at the rate as per the Prescribed Rate of Interest Act 55 of 1975, as amended.

7. DELIVERY

- 7.1 Time of delivery shall not be of the essence in this AGREEMENT.
- 7.2 WHILST EVERY EFFORT SHALL BE MADE TO DISPATCH AND DELIVER THE GOODS AS ADVISED, THE COMPANY DOES NOT GUARANTEE DISPATCH AND/OR DELIVERY ON ANY SPECIFIC DATE AND SHALL NOT BE LIABLE FOR ANY DAMAGES, INCLUDING CONSEQUENTIAL DAMAGES THAT MAY BE SUFFERED BY THE CUSTOMER, AS A RESULT OF ANY DELAYS IN THE DELIVERY OF THE GOODS THAT MAY OCCUR, SAVE TO THE EXTENT THAT THE COMPANY MAY BE LIABLE FOR ANY LOSSES IN TERMS OF SECTION 47 OF THE CPA.
- 7.3 The **CUSTOMER** shall not be entitled to cancel any order by reason of such delay.
- 7.4 Should the COMPANY be prevented from the performance of any of its obligations as a result of Force Majeure, or any cause whatsoever beyond the control of the COMPANY, the COMPANY shall be entitled, at its option, to cancel the AGREEMENT or to suspend performance of its obligations there under and SHALL NOT BE LIABLE WHATSOEVER FOR ANY LOSS OR DAMAGE, CONSEQUENTIAL OR OTHERWISE, RESULTING FROM SUCH INABILITY TO PERFORM ITS OBLIGATIONS, CANCELLATION OR SUSPENSION.
- 7.5 Unless otherwise agreed upon in writing, delivery and passing of the risk in the GOODS shall be deemed to have taken place when:
- 7.5.1 the GOODS are offloaded by the COMPANY, or its duly appointed delivery agent, at the CUSTOMER'S premises; or
- THE GOODS ARE COLLECTED BY THE CUSTOMER FROM THE PREMESIS OF THE COMPANY.RESERVATION OF OWNERSHIP
- 8.1 The COMPANY shall reserve ownership of GOODS delivered, until receipt of all payments due in terms of this AGREEMENT. Further, the COMPANY reserves ownership of GOODS until the CUSTOMER has affected any payments in full.
- 8.2 In the event that the CUSTOMER defaults in payment, it shall deliver the GOODS to the COMPANY upon receipt of notice by the CUSTOMER from the COMPANY, without any undue delay.
- 8.3 The COMPANY may elect, without detracting from other remedies which may be available to it, to continue with the AGREEMENT or to cancel it and cancel the sale of any further GOODS to the CUSTOMER and to rely on the provisions of this clause to repossess those GOODS sold and delivered by the COMPANY to the CUSTOMER or to claim specific performance of all the CUSTOMER'S obligations whether or not such obligations would otherwise have fallen due for performance, in either event, without prejudice to the COMPANY'S rights to claim damages.
- 8.4 The COMPANY'S request for repossession and repossession itself shall not be construed as rescission of the contract. After repossession of the delivered items, the COMPANY shall be authorised to realise the same. The realisation proceeds shall be set off against the CUSTOMER'S liabilities less appropriate realisation costs. The COMPANY may also realise the repossessed, reserved GOODS by selling them by private contract.
- 8.5 The CUSTOMER undertakes to handle the GOODS with care; in particular, it is obliged to insure them adequately at the reinstatement value against damage caused by fire, water, and theft at its expense.

- 8.6 In the event of attachments, attempted attachments, or other intervention by third parties, the CUSTOMER shall inform the COMPANY, in writing, without delay. The CUSTOMER shall be liable to the COMPANY for the judicial and extra-judicial costs of any necessary action pursuant to third-party action in respect of acts of execution. GOODS belonging to the COMPANY shall be clearly marked as property of the COMPANY.
- 8.7 The CUSTOMER is entitled to resell the GOODS in the ordinary course of business. In exchange, it herewith assigns to the COMPANY all claims against its customers or third parties in the amount of the total invoice (including value added tax) which, to its benefit, accrue from the resale, irrespective of whether the delivered item was resold without any processing or after processing. The COMPANY accept this assignment of the CUSTOMER to the COMPANY.
- 8.8 The CUSTOMER shall remain authorised to collect these claims, even after the assignment. However, the COMPANY shall be authorised to collect the claim itself, if the CUSTOMER no longer performs its obligations to pay from the collected proceeds, or there has been a suspension of payments. In this event, the COMPANY may demand that the CUSTOMER discloses to the COMPANY the assigned claims and their debtors, furnishes all the information required to collect the claims, delivers the pertinent documents and notifies the debtor (third party) of the assignment.
- 8.9 In processing or transforming the GOODS, the CUSTOMER shall invariably be acting for the COMPANY and on its behalf. If the GOODS are processed with other items not belonging to the COMPANY, the COMPANY shall acquire joint title to the new thing in the same proportion as the value of the delivered item bears to the other processed items at the time of the processing. In all other cases, the new thing having resulted from the processing shall be governed by the same provision as GOODS. The reservation of title shall remain effective even if individual claims of the COMPANY or all of the COMPANY'S claims are included in a current account and a balance is struck or the balance is confirmed.

9. RETURN OF GOODS

- 9.1 A PRECONDITION OF THE WARRANTY RIGHTS (CLAIMS BASED ON DEFECTS) OF THE CUSTOMER, IN TERMS OF THE AGREEMENT, IS THAT A CUSTOMER WHO IS A MERCHANT INSPECTS THE GOODS UPON RECEIPT WITHOUT UNDUE DELAY AND GIVES WRITTEN NOTICE OF ANY VISIBLE DEFECTS (SPECIFYING THE DEFECT) WITHOUT UNDUE DELAY, AFTER THE INSPECTION. THIS SHALL ALSO APPLY TO WRONG DELIVERIES OR ITEMS IN INSUFFICIENT QUANTITIES BEING DELIVERED. NOTIFICATION MUST BE GIVEN WITHIN A PERIOD OF 7 (SEVEN) DAYS. FOR NON-MERCHANTS (I.E. CONSUMER AS DEFINED IN THE CPA) NOTIFICATION MUST BE GIVEN WITHIN A PERIOD OF 14 (FOURTEEN) DAYS.
- 9.2 SHOULD THERE BE AN ALLEGATION THAT ANY GOODS ARE UNSAFE, OR DEFECTIVE THE COMPANY SHALL NOT BE LIABLE FOR ANY HARM CAUSED WHERE SUCH ALLEGED UNSAFE GOODS CHARACTERISTIC, FAILURE, DEFECT OR HAZARD DID NOT EXIST IN THE GOODS AT THE TIME AT WHICH THEY WERE SUPPLIED TO THE CUSTOMER BY THE COMPANY. THEREFORE IF NO SUCH NOTIFICATION IS RECEIVED IN TERMS OF CLAUSE 9.1 ABOVE, IT SHALL BE REGARDED AS SUFFICIENT (PRIMA FACIE) PROOF THAT NO DEFECTS WERE PRESENT AT THE TIME OF DELIVERY AND THAT THE GOODS WERE DELIVERED IN ACCORDANCE WITH THIS AGREEMENT.
- 9.3 In the event that the COMPANY receives notification in terms of clause 9.1 above and it is satisfied that the GOODS are defective or does not conform to specifications, then the COMPANY shall, at the COMPANY'S election, replace such quantity of GOODS with an equal quantity of GOODS or refund the applicable portion of the purchase price to the CUSTOMER against return of the defective portion of the GOODS (the return to be made at the CUSTOMER'S risk and expense).
- 9.4 The CUSTOMER may not however return to the COMPANY any GOODS for any reason whatsoever unless:-
- 9.4.1 the Parties have agreed in writing to such return and to the conditions of such return:
- 9.4.2 the **GOODS** are being returned in accordance with the provisions of clauses 9.2 and 9.3 above:
- 9.4.3 the GOODS were intended to satisfy a particular purpose communicated to the COMPANY, prior to the PURCHASE thereof, and have been found not to satisfy the purpose for which they were intended, within 7 (Seven) business days of delivery and the COMPANY has been notified of this in writing within that time period;
- 9.4.4 the CUSTOMER is exercising its right to cool-off in terms of section 16 of the CPA.
- 9.5 Notwithstanding the aforementioned:
- 9.5.1 The **CUSTOMER** shall accept slight imperfections in colour and appearance.

- 9.5.2 The decision by the COMPANY in respect of any alleged defect shall be final, conclusive and binding upon the Parties.
- 9.5.3 The replacement costs of any returned GOODS shall under no circumstances exceed the cost of replacement of the GOODS and/or the price paid by the CUSTOMER of the GOODS.
- 9.5.4 **GOODS** sold to the **CUSTOMER** in accordance with the **CUSTOMER**'S specifica tions shall not be returnable/and/or replaced.
- 9.6 It is specifically recorded and agreed that in the event of the GOODS being returned by the CUSTOMER, the COMPANY shall be entitled to invoice the CUSTOMER WITH A "RE-STOCKING CHARGE" at 15% (Fifteen Percent plus VAT) of the value of the GOODS. Same shall be invoiced to the CUSTOMER upon receipt of the GOODS by the COMPANY.

10. REPRESENTATIONS AND WARRANTIES

- 10.1 The COMPANY makes no warranty of any kind, express or implied, including without limitation, any warranty of merchantability, or non-infringement. The COMPANY specifically makes no warranties as to any services or as to compliance with laws, regulations, standards and/or conventions including any related to the environment or to the packaging, labelling and/or transport of hazardous GOODS. No warranty shall apply to shipping damage, damage caused by improper installation, GOODS that have been modified or altered in any manner, damage caused by corrosion, abrasion, or severe temperatures or moisture, or GOODS that have been subjected to improper maintenance, abuse, misuse, abnormal usage, or accident.
- 10.2 THE CUSTOMER WARRANTS THAT IT SHALL FULLY COMPLY WITH ALL LABEL DIRECTIONS FOR THE HANDLING, STORAGE, POSSESSION OR USE OF THE GOODS SOLD HEREUNDER AND THE CUSTOMER AGREES THAT IT SHALL INDEMNIFY AND HOLD THE COMPANY HARMLESS FROM ALL CLAIMS (INCLUDING, WITHOUT LIMITATION, ATTORNEYS' FEES) OF PERSONAL INJURY OR PROPERTY DAMAGE, RESULTING FROM ANY NEGLIGENCE, RECKLESSNESS OR WILLFUL/GROSS MISCONDUCT ON THE PART OF THE CUSTOMER.
- 10.3 Specifications, illustrations and the like remain the property of the COMPANY and may only be used for the purpose specified in this AGREEMENT and must be returned upon the request of the COMPANY. The design method of construction and content of all literature packaging and all other goods remains the property of the COMPANY and the sale of any goods shall not give to the CUSTOMER any implied licence to do any act which would otherwise constitute a breach/novation of the COMPANY'S industrial/intellectual property rights..
- 10.4 WHILST THE COMPANY SHALL TAKE ALL REASONABLE STEPS TO ENSURE THAT THE GOODS TO BE SOLD AND DELIVERED TO THE CUSTOMER, IN TERMS HEREOF ARE MANUFACTURED IN ACCORDANCE WITH THE CUSTOMER'S SPECIFICATIONS, THE COMPANY DOES NOT WARRANT THAT THE SAID GOODS WILL BE FIT FOR THE SPECIFIC PURPOSE FOR WHICH THE CUSTOMER INTENDS TO USE THE SAID GOODS, AND THE CUSTOMER ACCORDINGLY ABSOLVES THE COMPANY FROM ANY LIABILITY WHATSOEVER (HOWSOEVER ARISING) AS A RESULT OF THE SAID GOODS NOT BEING FIT FOR THE PURPOSE FOR WHICH THE CUSTOMER INTENDS TO USE THE SAID GOODS, UNLESS THE CUSTOMER HAS SPECIFICALLY INFORMED THE COMPANY, IN WRITING, OF THE PARTICULAR PURPOSE FOR WHICH THE CUSTOMER WISHES TO ACQUIRE ANY GOODS OR THE USE TO WHICH THE CUSTOMER INTENDS TO APPLY THOSE GOODS AND THE COMPANY AGREES TO SUPPLY SUCH GOODS.
- 10.5 NO LIABILITY FOR DAMAGES RESULTING FROM UNSUITABLE OR IMPROPER USE, IMPROPER ASSEMBLY AND IMPROPER COMMISSIONING OR HANDLING BY THE CUSTOMER OR BY THIRD PARTIES, OR ANY OTHER DISREGARD OF INSTALLATION AND OPERATING INSTRUCTIONS OR OF GENERALLY ACCEPTED TECHNICAL RULES AND NORMAL OPERATIONAL WEAR AND TEAR, SHALL ATTACH TO THE COMPANY.

11. LIMITATION OF LIABILITY

11.1 IN NO EVENT SHALL THE COMPANY, ITS DIRECTORS, OFFICERS, EMPLOYEES OR AGENTS BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT OR SPECIAL DAMAGES, INCLUDING PUNITIVE DAMAGES OR ATTORNEYS' FEES, WHETHER FORESEEABLE OR UNFORESEEABLE. THIS INCLUDES CLAIMS OF THE CUSTOMER OR ITS CLIENTS (INCLUDING, BUT NOT LIMITED TO, CLAIMS FOR LOSS OF BUSINESS, GOODWILL, PROFITS, LOSS OF MONEY OR USE OF GOODS OR IMPAIRMENT OF OTHER ASSETS), ARISING OUT OF BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, BREACH OF CONTRACT, MISREPRESENTATION, NEGLIGENCE, IN DELICT OR OTHERWISE IN CONNECTION WITH OR ARISING OUT OF THIS AGREEMENT, EXCEPT IN THE EVENT OF PERSONAL INJURY OR PROPERTY DAMAGE WHERE AND ONLY TO THE EXTENT THAT APPLICABLE LAW REQUIRES SUCH LIABILITY. TO THE EXTENT THE CUSTOMER INCORPORATE THE GOODS OF ANY THIRD PARTY, THE COMPANY SHALL NOT BE LIABLE FOR THIRD PARTY CLAIMS FOR INFRINGEMENT OF LETTERS PATENT, REGISTERED DESIGN, TRADEMARK

OR COPYRIGHT RESULTING FROM SUCH INCORPORATION AND BASED UPON THE USE OF THE GOODS OR THE MANUFACTURE, USE, SALE OR OFFER FOR SALE OF ANY GOODS CONTAINING SUCH GOODS, EXCEPT AS SUCH LIABILITY FOR THIRD PARTY CLAIMS FOR INFRINGEMENT IS EXPRESSLY REQUIRED BY APPLICABLE LAW AND NOT WAIVABLE BY THE CUSTOMER THE CUSTOMER ASSUMES RESPONSIBILITY FOR ALL PERSONAL INJURY AND PROPERTY DAMAGE RESULTING FROM HANDLING, POSSESSION, USE, RESALE OR DISPOSAL OF THE GOODS.

11.2 ANY ACTION BY THE CUSTOMER FOR BREACH OF THIS AGREEMENT BY THE COMPANY OR ANY OTHER CAUSES OF ACTION OF THE CUSTOMER EXPRESSLY ALLOWED UNDER THIS AGREEMENT MUST BE COMMENCED WITHIN 1 (ONE) YEAR AFTER THE CAUSE OF ACTION HAS ACCRUED, FAILING WHICH NO CLAIM SHALL BE ACKNOWLEDGED BY THE COMPANY.

12. BREACH

- 12.1 In the event that the CUSTOMER:
- 12.1.1 Breaches any condition contained in these conditions and failing to pay any amount due and payable on due date, and having failed to rectify such breach or outstanding payment within 10 (Ten) days of having been requested to do so in writing by the COMPANY;
- 12.1.2 Suffering any civil judgment to be taken or entered against it, causing a notice of surrender of its estate to be published in terms of the Insolvency Act of 1936 (as amended);
- 12.1.3 The CUSTOMER dying or ceasing to exist;
- 12.1.4 The CUSTOMER'S estate being placed under an order of provisional or final winding up, business rescue, as the case may be, then, and in that event, the COMPANY shall, without retracting from other remedies which may be available to it, be entitled to cancel this AGREEMENT and cancel the sale of any GOODS to the CUSTOMER without notice to the CUSTOMER and to rely on the provisions of this clause to repossess those GOODS sold and delivered by the COMPANY to the CUSTOMER or to claim specific performance of all the CUSTOMER'S obligations whether or not such obligations would otherwise have fallen due for performance, in either event, without prejudice to the COMPANY'S rights to claim damages.

13. PRESCRIPTION

THE **CUSTOMER** HEREBY EXPRESSLY WAIVES ITS RIGHT TO CLAIM PRESCRIPTION UNDER THE RELEVANT PROVISIONS OF THE PRESCRIPTION ACT NO. 68 OF 1969, AS AMENDED FROM TIME TO TIME.

14. INDEMNITY

14.1 The CUSTOMER agrees to indemnify, hold harmless and defend the COMPANY and the COMPANY'S directors, officers, employee's and agents, and the directors, officers, employees and agents of any the COMPANY parent, subsidiary or related company (the "COMPANY Indemnities") from and against any and all claims, suits, losses, damages, costs, fees and expenses arising out of the death or injury to person or damage to property resulting from the sale, marketing or use of the GOODS by the CUSTOMER, except that such claims, suits, losses, damages, costs, fees or expenses arise or result from any grossly negligent or wrongful act or omission of the COMPANY.

15. JURISDICTION

- 15.1 The Parties do hereby consent that the Magistrate's Court shall have jurisdiction to determine any action or proceedings which may arise under or in connection with this AGREEMENT.
- 15.2 This AGREEMENT, as well as the relationship between the COMPANY and the CUSTOMER is governed by the Law of the Republic of South Africa.

16. LEGAL ACTION

- 16.1 All debt collection charges incurred by the COMPANY, including the costs of collection agencies, including collection commission shall solely be borne by the CUSTOMER.
- 16.2 In the event of the COMPANY instructing attorneys in regard to any breach of the CUSTOMER, of the conditions of this AGREEMENT, then the CUSTOMER shall pay all the costs on the scale between Attorney and Client, including any costs incidental to such action instituted against the CUSTOMER.

17. CERTIFICATE OF INDEBTEDNESS

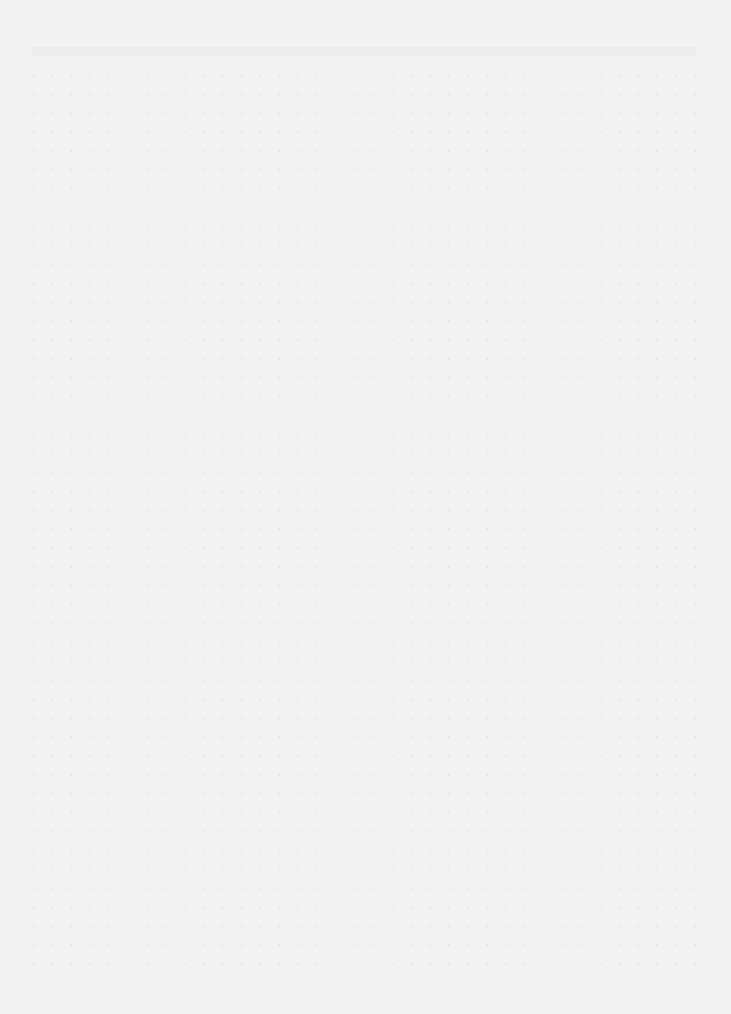

A certificate under the hand of the Managing Director of the COMPANY as to the existence and the amount of the CUSTOMER'S indebtedness to the COMPANY, as well as the amount of interest accrued thereon, and as to any other fact, matter or thing relating to the CUSTOMER'S indebtedness to the COMPANY, shall be accepted as sufficient (prima facie) proof of the contents and correctness thereof and of the amount of the CUSTOMER'S indebtedness for the purpose of provisional sentence or summary judgement or any other proceedings against the CUSTOMER in any competent Court and shall be valid and constitute a liquid document for such purposes. Furthermore, it shall not be necessary to prove the appointment of the person signing such a certificate and it shall be deemed to be sufficient particularly for the purpose of any action or any other proceeding instituted by the COMPANY against the CUSTOMER.

18. NOTICE AND DOMICILIA

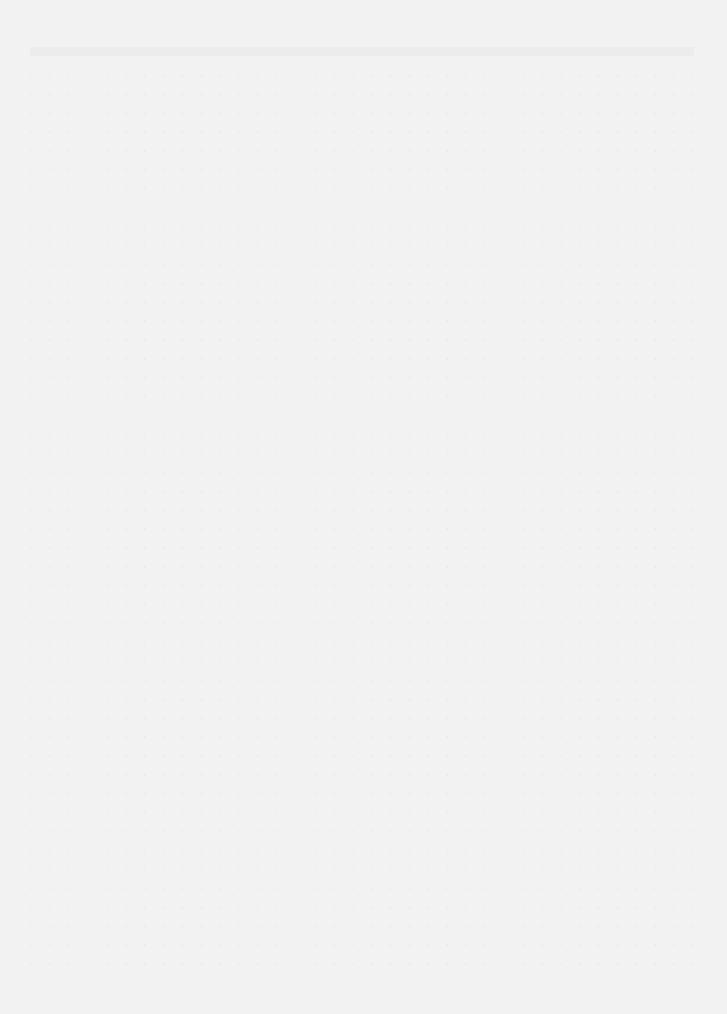

- 18.1 Any notices to be given to the Parties in terms of this AGREEMENT shall be in writing and delivered by hand during ordinary business hours or posted by pre-paid registered post to the addresses mentioned hereunder, which addresses the Parties choose as their domicilium *citandi et executandi* for all purposes arising out of this AGREFMENT
- 18.2 The COMPANY: 2 Spartan Road, Spartan, Johannesburg, South Africa.
- 18.3 The CUSTOMER: The delivery address as reflected on the face of the latest delivery note issued to the CUSTOMER, or such other address within the Republic of South Africa as either Party may choose by written notice to the other.

19. NO VARIATION

- 19.1 This AGREEMENT constitutes the entire agreement between the Parties and no representation by either of the Parties or their agents, whether made prior or subsequent to the signing of this AGREEMENT, shall be binding on the Parties unless done in writing and signed by both Parties hereto.
- 19.2 No variation, alteration or consensual cancellation of this AGREEMENT, or any of the terms thereof, shall be of any force or effect, unless done in writing and signed by the Parties hereto.
- 19.3 No waiver or abandonment by either Party of any of its rights in terms of this AGREEMENT shall be binding on that Party, unless such waiver or abandonment is in writing and signed by the waiving Party.
- 19.4 No indulgence, extension of time, relaxation or latitude which any Party may show, grant or allow to another shall constitute a waiver by a Party of any such Party's rights and such Party shall not hereby be prejudiced or estopped from exercising any of its rights against any Party, which may have arisen in the past or which might arise in the future. Unless the context indicates otherwise, the rights and obligations of any Party arising from this AGREEMENT shall devolve upon and bind its successors-in-title.
- 19.5 The Parties agree that they will do all things and sign all documents necessary to give effect to the terms of this AGREEMENT and to all transactions deriving there from.
