Specific information

Keyways/distances

Measure the distance for locks and fittings.

The following distances are standard

BB = Lever key e = 72 mm for inside and corridor doors

PZ = Euro cylinder e = 72 mm for inside and corridor doors
or 92 mm for entrance doors

Vacant/engaged e = 78 mm

Other centres and distances upon request.

Distance details are not required when ordering rose fittings or specifying them for tender.

Emergency opening types for bathroom toilet locks

FBM and M can be opened with coins, FBD and D with a square key.

HEWI delivers FBM as standard.

Fixing sleeve

Technical information for:

Pull handles and fixing concepts

The system is equally suitable for wooden doors, plastic profiles, steel profiles and aluminium profiles, too. The heart of the new fixing system is the BA5.1 fixing sleeve.

Advantages

- one fixing system for 3 materials (wood, plastic, metal)
- storage space is reduced due to the use of only a few components
- easy and fast installation
- only perforated handle elements
- modular system
- high durability (alternating load of 100 kg for wood and aluminium, or of 50 kg for plastic)
- no deformation (denting) of the profiles
- customised packaging: packaging unit one, two or ten pieces etc.

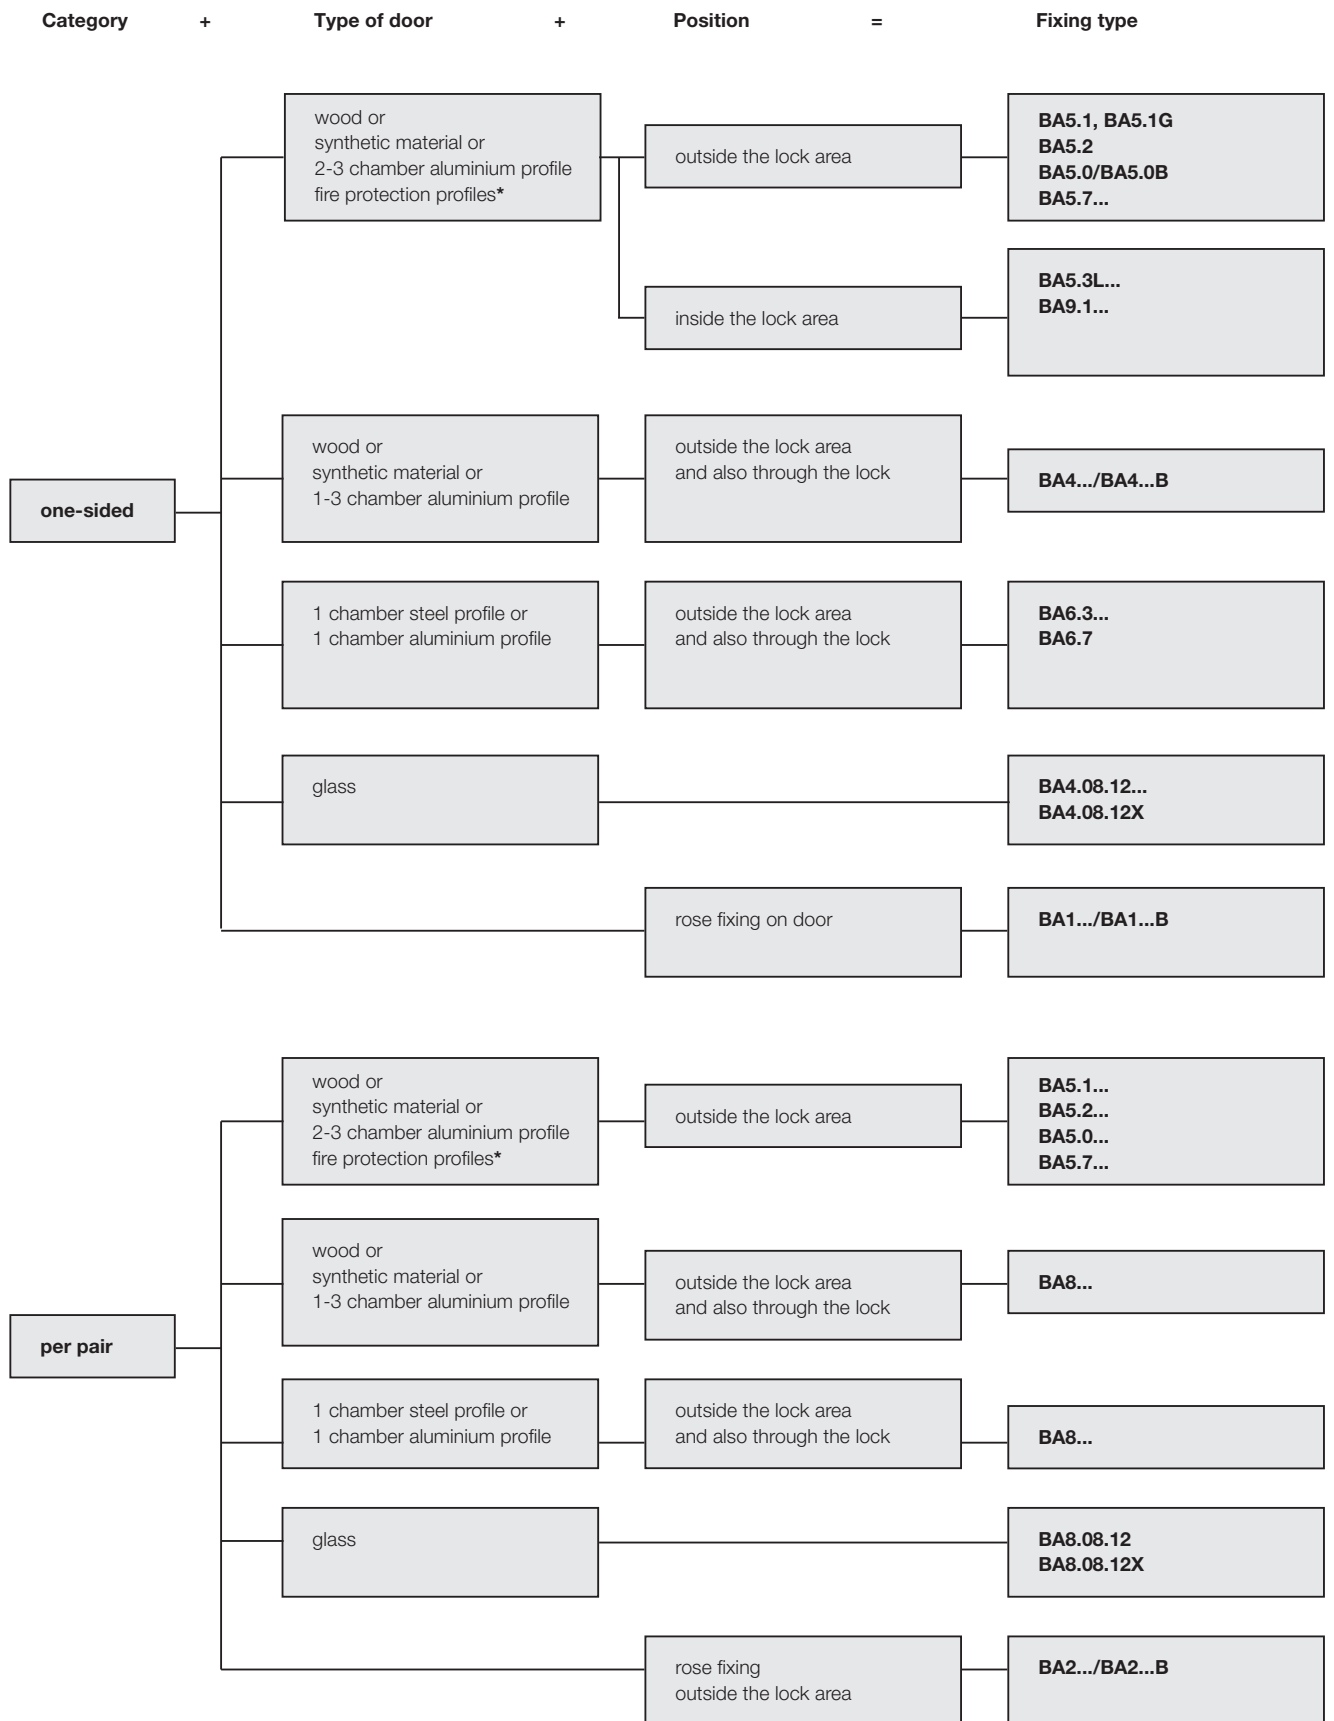

The heart of the fixing system

Heart of the BA5.1 fixing system is the fixing sleeve of surface-hardened steel, which, by means of its special thread, can be fitted with a lasting and secure grip to wood, plastic, steel and aluminium profiles. It covers 90% of all potential applications.
