# System 900

## Universal Design

Our society is changing, and this means the demands on architecture and product design are changing as well. For decades HEWI has been meeting this challenge and developing solutions that always focus on the individual needs of people. Outstanding design can only be created when interacting with innovative technology. In fact, combining aesthetics together with function has always been part of our cultural DNA at HEWI.

System 900 is the answer to the complex requirements of accessible bathrooms. Naturally, the products in our System 900 are well thought through, right down to the smallest detail. They have exceptional functionality, lasting quality, intelligent installation technology and of course, hygienic design. System 900 combines pure design with high levels of functionality and offer a unique depth of product possibilities.

System 900 fulfils the requirements of not only the most diverse user groups, but also the most diverse types of buildings, be they hospitals, retirement homes, public buildings, hotels or even homes.

## Fields of application

### PROFESSIONAL CARE

System 900 makes it easy to create accessible plans. As a system, S 900 takes precise account of the complex requirements in the field of professional care. This is an impressive range of products combining functionality with particularly hygienic design and clever assembly technology.

System 900 is designed to provide the highest level of independence and safety for patients. Which in turn helps reduce pressure on care personnel. Cleaning staff benefit from the hygienic and easy-clean surfaces. The wide variety of materials provides solutions for regular patient baths, optional service areas and high-quality senior citizens' residences from a single source.

### PUBLIC

Robust, sustainable quality and functionality, as well as good design, are always the focus when furnishing and equipping buildings, particularly in the quasi-public and public sectors. System 900 meets these requirements exactly. Carefully selected materials and their expert processing results in high-quality products with exceptional surfaces, which even after years of frequent use, won't show signs of wear.

### HOTEL

Contemporary hotel concepts are always impressive when they use clever designs which create an unmistakable ambience and respond to the individual needs of their guests. System 900 provides a harmonious overall concept for high-quality hotel bathrooms. From accessories and comfort elements to accessible equipment, that can also be flexibly adapted to each guest's needs.

### HOME

The bathroom has developed into a central, very personal space in the home, and its design should allow for flexibility that is individually adaptable. System 900 enables safety and support and, in combination with excellent design, creates a feel-good ambience which uniquely incorporates functionality, comfort and aesthetics.

## Material and finish

HEWI believes good design should also provide options. System 900 is available in stainless steel, chrome or powder-coated with a deep matt finish in white, gray or black, making it versatile and allows extensive design options. The use of first-class materials and careful workmanship result in the outstanding, durable quality of System 900.

All System 900 products have been developed so that they facilitate maximum cleanliness in the bathroom. To this end, only easy-care materials, such as stainless steel, are used. These materials have particularly hygienic surfaces and also provide optimum cleaning properties.

## NEW 2022 – CHOOSE YOUR OWN COLOR

### INSPIRATION: FADED CINDER ROSE

Light pink evokes floral connotations. The subtle saturation underlines the softness of the color and evokes the sensuality of roses.

## INSPIRATION – CHOOSE YOUR OWN COLOR OUT OF 4500 COLORS

Color is an integral part of HEWI's DNA. It allows for personal design choices and expressive statements. With System 900, HEWI offers the option to design folding support handles, dispensers etc. for the project business in the color of your choice. And it's very easy to do so! HEWI first requires the desired color code around 4.500 possible colors or from HEWI's four favorite colors and then starts the production process. The result is a unique color scheme that creates a sense of personal identity. In keeping with the motto: **MAKE YOUR OWN CHOICE – CHOOSE YOUR OWN COLOR!**

Your HEWI contact partner will be happy to help you with the process.

Need some inspiration? Discover our favourite colors:

### INSPIRATION: SOOTHING CEDAR BROWN

This soft brown reflects the colors of the high-quality cedar wood. Its soft appearance has a calming effect and creates a cozy atmosphere.

**INSPIRATION:  
SOMBER SAGE GREEN**  
A dark green full of depth and complexity. This natural tone is reminiscent of the colors of the forest. Its exciting base stands for liveliness.

**INSPIRATION:  
DARK BREEZE BLUE**  
A dark, a clear blue. It evokes the vastness of the ocean and the light breeze of the sea, radiating calm and relaxation.

## People in focus

Making life easier for people – with individually adaptable concepts that make independence possible and provide safety as well – that's what drives us. We can offer you individual solutions to the highest design standards, which can be tailor-made exactly to your requirements.

System 900 focuses not just on the people receiving care but also the care personnel. Our products are designed so they provide safe support, with grab and hold options to increase independence and relieve stress for carers. System 900 provides solutions for all areas of sanitary rooms – be it at the washbasin, on the toilet, or in the shower. Cleaning staff benefit from the hygienic and easy-to-clean surfaces.

The modular structure of System 900 creates a range of combination options. This means that the bathroom design can be optimally tailored to the needs of individual users. The system's product functions are tailor-made for use in professional care.

Preconfigured products make further additions of individual functions unnecessary. With System 900, you get the right solution straight away and optimally created to meet your specific requirements, and without the need for retrofitting. For example, the hinged support rail is available in various configurations – from the minimalist mono-hinged support rail to the fully equipped, duo-hinged, support rail with toilet roll holder and radio-controlled flushing mechanism.

## Enabling independence

The modular washbasin system comes with adaptive functions and allows the integration of additional support and storage options directly at the washbasin. The washbasins provide extra safety and ensure that a variety of bathroom utensils can always be located within easy reach. The practical storage system is also suitable for wall mounting which of course, provides extendable functionality. Naturally, the washbasins match System 900, with powder coating available in white, light gray pearl mica, dark gray pearl mica, and black.

Our powder coating gives System 900 an inimitable finish. In addition to its outstanding appearance, our special finishing process offers maximum corrosion protection making it perfectly suited for use in sanitary rooms. In combination with its optimal hygiene properties, cleaning agent resistance and highly precise processing, System 900 can meet even the most demanding of requirements.

## Differentiating design

System 900 fits just as easily into private patient comfort wards, as it does in normal patient areas. Our surface finish options in stainless steel, chrome and powder coating are suitable for enabling differentiation and provide solutions from a single source.

In addition to the design aspects and safe use of the products, we also focused on comfort and convenience during the product development stage. The support systems are therefore not just extremely load resistant, their cross-sections are also optimally adapted to the shape of the human hand so that they are safer and easier to grip. The tubular design of System 900 also offers a pleasant-to-touch, grip. The ergonomic design of the shower seat promotes stable sitting. The seat surface itself, which is also slip-resistant even when wet, is particularly comfortable to sit on. Whilst a robust and reliable fixing and stable design increase safety.

System 900 is remarkable thanks to its certified quality. Products used in the care sector must not only withstand cleaning agents, but also be resistant to wound treatments and disinfection agents. For example, the seat surfaces and backrests of the System 900 range of shower seats are made of thermoplastic (polypropylene). This ensures the surfaces won't discolor or fade.

## Support

Hinged seat

### Secure hold

It's well known that safety, independence and ease-of-use, are decisive factors in the professional care field. By significantly increasing these factors the burden on care personnel can be reduced because patients can become more self-reliant.

System 900 is designed to support people with limited mobility. The large variety of shower seats enables a precisely fitted solution. Permanently installed shower seats, hanging seats or mobile solutions are also available. For example, they can be folded against the wall to save space. The hanging seat is extremely light, weighing less than 9 kg, which means it can be carried easily. The pleasant, slip-resistant surface, molded and slightly shaped seat with its ergonomic backrest, make for a comfortable and secure feeling when sitting.

Shower grab rail

### Made-to-measure solutions

In existing bathrooms, it can often be difficult to create an optimum solution using standard products. Wall projections, small floor space or an unfavorable room layout, require both individual plans and customised products. System 900 offers customized support bar systems made of satin stainless steel, that fit perfectly into the structure of any room. Customized products are available in single or multiple units.

Hinged support rail

### Integrated functions

By integrating functions product surfaces can be created with a minimum number of joints. This means the surfaces are much easier to clean. For instance, the toilet flush and function buttons are mounted flush with the hinged support rail.

Shelf with grab bar

### Flexible design

The range of System 900 support bars are extremely durable. Their cross-sections are ideally adapted to the human hand so they can be gripped more securely. The rounded, tubular design is also very pleasant to hold.

## Individuality

### Mobile shower seats and hinged support rails

Bathrooms can be designed individually thanks to our mobile shower seats and hinged support rails. Sanitary rooms can be even more easily adapted to the needs and personal skills of the user with the use of mobile solutions. These mobile solutions can offer the same functionality as permanently installed shower seats or hinged support rails. For example, they can be folded back against the wall to save space, and they still have the same load-bearing capacity. Our System 900 mobile shower seat is available in two sizes. The mobile hinged support rail is available in either a mono or duo rail version. The optional toilet roll holder and remote controlled toilet flush, offer additional accessibility options on the hinged support rail.

### Easy installation

HEWI's System 900 mobile solutions are not only extremely easy to mount, but also to dismount. Tool-free mounting means that care or cleaning personnel can add mobile shower seats or hinged support rails in the bathroom in a few easy steps. The mobile solution is clicked into position in a permanently installed mounting plate, and then secured with an attachment screw. If the support is no longer required, the shower seat or hinged support rail can be just as easily removed by releasing the screw. The mounting plate is then hidden behind a subtle cover.

## Sustainable quality and award-winning design

Sanitary rooms in public and semi-public areas should always reflect the character of the building with a representative design. Other important aspects to be considered during planning and implementation are the atmosphere and the well-being of the users, as well as cost-effectiveness and sustainability. The HEWI System 900 optimally fulfils these requirements with impressively durable products and a uniquely deep product range. The modular construction principle enables individual planning – whether for sanitary facilities in event centers, the design of representative offices, or equipping and furnishing, standards-compliant, accessible sanitary rooms.

The dispensing systems and accessories from System 900 are perfectly rounded off by HEWI washbasins, system fittings, mirrors and even matching fittings.

Accessible sanitary rooms can also have demanding requirements in terms of planning and equipment. As well as building regulations and accessibility standards, the individual needs and competencies of users must also be taken into account. The objective must be to create the possibility for all people to gain access and use the facilities independently. System 900 enables an accessible, standardized room concept to be easily implemented.

## Hygiene with style

HEWI dispenser systems of course, not only meet the highest demands in terms of design and functionality, they are consistent down to the last detail. Both manually operated versions and a selection of electronic, touch-free dispensers are available. And a wide range of materials for these dispenser systems offers a multitude of design options. The HEWI range includes models with powder coating in black, gray tones and white, as well as stainless steel. This creates functional and design-oriented hygiene products in every area they are required.

## Coherent overall concept

A coherent overall concept impresses your guests. HEWI's System 900 combines functionality and excellent, award-winning design with durable, sustainable quality. This creates added value for the users, with continuous, universal solutions from accessories to comfort products and also accessible elements.

With System 900, you have the opportunity to create a feel-good ambience for your guests in which aesthetics and functionality form a unique unit.

A bathroom that is optimally customized to the individual needs of each hotel guest, shows just how naturally you can implement accessibility. This also allows you to create the prerequisites for your guest to feel both comfortable and supported in their independence. Accessibility is exceptionally easy to plan for with System 900 – whether for a small, family-run guest house, a boutique or business hotel, or an exclusive luxury resort.

## Universal design in hotel bathrooms

### Flexibly adjustable

Your hotel rooms should be as individual as your guests. HEWI provides the opportunity for you to flexibly adjust your bathrooms to the needs of the individual user. If a guest needs support, the mobile shower seats and hinged support bars can be quickly and easily integrated into the room. Our tried-and-tested fixing technology is easy to use and requires no tools.

Housekeeping staff can quickly and easily add the mobile hinged support rails and shower seats and of course, remove them later. When they are no longer required, a discreet cap conceals the installed, fixed, assembly plate. You can easily increase your occupancy rate by assigning supposedly accessible rooms to all guests. And System 900 mobile solutions can provide the same functionality as permanently installed hinged support rails and shower seats.

## Surface finish variety

Shower basket

Soap dispenser

Toilet roll holder and toilet brush unit

Rail with shower head holder

Shower basket, angular

Hinged support rail Mono

A variety of surface finishes increases design freedom. System 900 provides you with the opportunity to create a feel-good ambience for your guests where aesthetics and functionality are uniquely combined. Various accessories such as a hairdryer bracket, shower basket or soap dispenser compliment the range of products and accessories available. System 900 surfaces include stainless steel and high-gloss chrome, as well as matt powder coating.

HEWI's system 900 in a matt design is an exciting new source of inspiration. Deep matt white, light gray pearl mica effect, dark gray pearl mica effect, and black, offer design options. They lend the rooms character, with authentic, honest materials and a classic and expressive product design. Highlight the color concept for your hotel or create exciting accents.

## Design and function

Bath towel shelf

Soap dispenser and hooks

Toilet roll holder and toilet brush unit

System 900 has a wide range of useful accessories. From soap dispensers to cosmetic mirrors and toilet brush sets, to towel rails, System 900 provides a uniquely integrated product range that leaves nothing to be desired.

The basis of our high-quality, chrome products is stainless steel. This makes them extremely corrosion-resistant. The System 900 chrome-coated products are also particularly hygienic and easy to clean. They can also be combined with applications made with polyamide or satin-finished crystal glass.

## Incorporating comfort and aesthetics

The way we live is continuously changing. Safety and well-being are becoming more important every day. Individual solutions, precisely tailor-made to the individual requirements and needs of people, using authentic, honest materials, with a timeless, reduced product design, are becoming increasingly important when planning, equipping and furnishing private bathrooms.

System 900 combines all these requirements, providing the possibility to skillfully set accents and of course, to include ergonomics and function. A uniquely deep and versatile product range, with its variety of materials and surface finishes, open up almost limitless opportunities for design. System 900 provides solutions for all areas of the bathroom – whether at the washbasin, on the toilet or in the shower. In addition to sanitary accessories, the system also includes comfort products and accessibility elements which enable greater independence, and provide safety and combined with comfort and aesthetics.

System 900 is of course, available with powder coating in various shades. Deep matt black, white and gray shades provide various design possibilities.

## Clever technology

### Hygienic sealing element

Often, rose mounts do not completely seal on uneven walls. In contrast, HEWI's sealing element is one that can be used quickly and reliably. It can also be used with the wall brackets for the hinged support rails and shower seats, and the rose mounts of the support rails and bar systems. The products are designed so that water cannot collect on the surface areas, allowing it to drain away instead.

### Reliable quality

HEWI's constant, reliable quality is not just reflected in the materials we use but in the technical details as well. The hinged support rails of the System 900 series have a maintenance free brake that absorbs the impact as the handle lowers. (The bar only drops gently and automatically from an angle of more than 45°. Less than 45° and it stays in position). A prominent stop prevents the hinged support rail from hitting the wall.

### Fewer components | Easy cleaning

Hygiene is a decisive factor in the professional care field. System 900 products are made with as few components as possible so that the minimum number of joints are needed. Thanks to our incredibly precise production processes, components can be joined so that a smooth, hygienic surface is created. For example, the carrier bracket of the hanging seat is mounted flush with the seat surface.

### Simplified mounting | Plug-click connection

The railing system and shower handrails of the System 900 series stand out because of a clever and extremely simple mounting technique. Instead of the usual four mounting points, just three rose mounts are required. This naturally reduces installation time. The new mounting equipment also allows for compensation of the angle of tolerance in the corner of a room by +/- 2°.

View the film to see how easy mounting is with the plug-click connection.

## Special color powder coating | Ordering process

HEWI is expanding its range of unique surface colors. Individually select your desired color tone from the RAL Classic, RAL Design plus, or Pantone palette (Fashion, Home + Interiors Color Guide Book) as well as from our four favorite HEWI colors. There's also a choice of matt or gloss surfaces.

### Samples

HEWI will sample your desired color choice in advance, as colors can appear differently depending on the incidence of light, gloss level and surface. For this reason, you will receive your desired color on a sample plate (78 x 222 mm) which means you can approve your choice with confidence.

### Service

If you have any questions, please contact the HEWI Service Centre

## Contact and service

### International standard requirements

System 900 provides sophisticated design in conjunction with a high degree of functionality and thereby enables an uncompromising standardized design. System 900 also meets the requirements of SIA and ÖNORM, ADA, British Standard and DOC M internationally. Additional information can be found in the HEWI online catalogue.

### Accessible bathroom planning

Our design service for accessible bathrooms offers you practical support for your project. We advise you how to use the available spaces optimally and design them in conformity with the applicable standards. You can reach the planning service at [scb@hewi.de](mailto:scb@hewi.de).

Example for planning Hotel

Example for planning UK (BS 8300)

### Online catalogue

The full System 900 range, product data sheets and tender texts are available in our online catalogue at: [www.hewi.com/en/productcatalogue](http://www.hewi.com/en/productcatalogue). The entire HEWI portfolio can also be seen in the online catalogue.

### Web page and BIM downloads

You can find more information about HEWI's System 900 on our website at [www.hewi.com/system-900](http://www.hewi.com/system-900). The BIM data regarding System 900 is available for download at <https://www.bimobject.com/de/hewi/private-cloud/hewi>.

### Seminars

The importance of accessible design is growing fast. HEWI offers a comprehensive training program for architects, planners and practitioners. For more information about our current seminar program, please visit [www.hewi.com](http://www.hewi.com).

### Contact

Would you like to find out more about System 900? We would be pleased to advise you personally. Call us on +49 5691 82-0 or email us at [international@hewi.com](mailto:international@hewi.com). Find personal contacts local to you at [www.hewi.com/contact](http://www.hewi.com/contact)

## HEWI system design

### Excellent design

---

Reduce to the essentials, is the design principle that distinguishes all HEWI products. High levels of functionality with a minimalist design language is what characterizes the typical HEWI design. The numerous internationally renowned design awards we have won reflect our philosophy of total design quality.

### Certified quality

---

HEWI products all offer long-term reliability. Carefully selected materials and precise workmanship result in products that show absolutely no signs of wear, even after years of intensive use and constant cleaning. HEWI products are continually tested and thus guarantee the fulfilment of the highest functionality, reliable technology and safety requirements.

### Well-considered functions

---

Accessibility is a matter of course for HEWI. We develop innovative products with intelligent functions that help people. Starting with ingenious mounting concepts and continuing through intuitive, safe use and easy cleaning – at HEWI, people are our top priority.
