Because progress comes from getting it done

Achieving the best results with safe and innovative products

For you and together with you.

We know from over 75 years of experience: Progress comes from getting things done. Success comes from getting things done. The future comes from getting things done. And this is why, over the years, we have evolved into a leading specialist for wood protection and finishing, with a presence throughout Europe. With our wood varnishes, oils and stains, we offer joiners a complete and compact range for interior wood finishing. The systems are all safe and easy to use, from our range of classic solvent-based 2K PUR varnishes and our stain systems to our most innovative products:

Innovative, versatile water-based solutions

Remmers is the specialist in water-based varnishes for the timber industry. Our business is built on decades of experience in industrial window coating, wood coating systems and interior wood varnishes. The high-performance 1K Aqua varnishes from Remmers can be used to tackle a wide range of tasks in a sustainable way. These products are also "2K-ready" and their properties can be further enhanced with Aqua VGA-485 if required. With its new 2K Aqua varnishes, Remmers has created a special range of high-performance premium coatings for exclusive furniture and interior fittings. The products offer maximum resistance, are much lower in emissions and are designed for users who are looking to switch from solvent-based 2K PUR varnishes to an environmentally friendly but no less effective alternative.

Oils and hard wax sealers – natural alternatives to varnishes

Remmers offers products based on natural oils and waxes as an alternative to varnishes for furniture, interior fittings, wooden flooring and wooden stairs. A special feature of these products is their natural look and feel. And when it comes to application, all the products are highly efficient: the 2K oil HSO-118 [eco] can even be applied in just one coat. One of Remmers' specialities is products in the category of hard wax sealers, either as a conventional, solvent-based solution or in an eco-friendly, water-based version. Surfaces finished with HWS-112 & Aqua HWS-712 [eco] are as beautiful as oiled surfaces and are just as resistant as 2K varnishes.

Proven safety

Remmers ensures that its products function effectively and are safe for people and the environment through a wide range of tests, both internal and by prestigious, external, independent testing institutes. Below you will find an extract of the test standards and

schemes according to which Remmers wood varnishes, oils and stains have been assessed. This gives our customers products they can rely on – especially when dealing with public tenders.

Test symbols that guarantee the quality of our products

Resistance to chemicals (DIN 68861, part 1)

This standard describes the behaviour of surfaces when exposed to chemical substances. Physically drying coatings usually obtain a score of 1C, chemically hardening ones a score of 1B.

Decopaint Directive

The maximum levels of VOCs (VOC ~ organic solvents) in coating systems for built-in components were established for the entire EU and introduced in two stages (2007 and 2010). This regulation applies to building elements such as windows, doors, wall and ceiling linings, stairs and floors. Furniture is excluded. What matters is the VOC content of the ready-to-use product, thinners and hardeners included.

Testing of the combustion properties (EN 13501-1)

Besides fire resistance as such, other criteria such as smoke production and flaming droplets are assessed. Coating materials are always tested in combination with fire-resistant substrates.

Seagoing vessels (IMO Resolution A.653)

The fire resistance and reaction to fire of coating systems used in seagoing vessels must be tested and certified by an independent organisation. The suitability of a given product for this use is documented with the ship's wheel certificate granted by the International Maritime Organization (IMO).

DIN EN 71-3 Migration of certain elements

Test of the migration of dangerous substances (heavy metals in particular). The requirements for a product are considered met when the limits imposed by the standard are not exceeded.

Cytotoxicity (ISO 10993-5/12)

This test proves that a certain material is not toxic to cells. This property is important for example in hospitals and other medical premises.

Resistance to hand creams

There is no official test standard, but since this property is particularly relevant for stair varnishes, several commercially available hand creams are tested according to a method similar to that of EN 12720.

Testing principles for health assessment of products in interior rooms

All products used for the professional treatment of wooden floors require a general approval by the building inspectorate within the EU Construction Products Directive framework. Its goal is to ensure that the health of users of buildings is not harmed by construction products. An emission test of coated samples in special test chambers according to the AgBB scheme must be successfully passed before the approval is granted.

Food safety (Regulation (EC) No 1935/2004)

Selected products have been assessed by independent bodies with regard to their safety for contact with food and conform to the applicable German laws and Regulation (EC) No 1935/2004.

Slip resistance (DIN 51130:2014)

The anti-slip properties of floor coverings are tested and evaluated according to the walking method on a sloping ramp. "R9" represents a low sliding friction coefficient and is recommended for normal private use. Higher R values correspond to better slip resistance properties.

Vegan

For selected Remmers products, explicit attention is given to the avoidance of animal ingredients. This is based on the information available to us, e.g. from raw material suppliers, and on the manufacturing techniques we use.

Water-based finishes and topcoats

Our clear, water-based varnishes are highly durable, with high transparency and excellent emphasis of the wood grain. With regard to look, feel and durability, you can hardly tell the difference between them and their solvent-based counterparts.

The customer benefits in detail:

- ✓ High-performance 1K Aqua finishes
- ✓ No hardener, no thinner, no pot life and no waste
- ✓ Eco-friendly & quick-drying
- ✓ 2K Aqua varnishes for heavy-duty applications

Recommended products

Finishes and topcoats

Aqua 2SL-452-2K Finish

Lightfast 2K finish for highly durable coatings

Range of use	<ul style="list-style-type: none"> ▪ Interior wood ▪ Primer & topcoat ▪ Solid wood & veneer ▪ High-quality living room furniture and interior furnishing ▪ Exclusive interior fittings, kitchen & bathroom furniture ▪ Handleless front panels ▪ Tabletops and worktops ▪ Topcoat on coloured varnishes (resistance to metal rings, gloss level) ▪ Coating oak surfaces without green discolouration
Properties	<ul style="list-style-type: none"> ▪ Good flow properties ▪ Highly transparent, good emphasis of the wood grain ▪ Excellent resistance to chemicals ▪ Good resistance to a wide range of popular hand creams ▪ Resistant to a wide range of PVC plasticisers ▪ Very high scratch resistance ▪ Lightfast ▪ Surfaces do not become glossy
Certificates/test standards	<ul style="list-style-type: none"> ▪ DIN 68861, 1B Resistance to chemicals
Preparation	<ul style="list-style-type: none"> ▪ 10:1 with Aqua H-484 by volume (10:1 by weight) ▪ Add hardener while stirring and homogenise the mixture for at least 2 minutes using the Remmers Patent Disperser ▪ If necessary, dilute the varnish/hardener mixture with max. 10% water ▪ Working time max. 4 hours under gravity; this may be lower at high temperatures. ▪ When applying with a pressure atomiser, e.g. airmix/airless spraying, the processing time is reduced to max. 30 minutes. During breaks in work, set the material supply to unpressurised and remove loads from pumps and spray guns
Application	<ul style="list-style-type: none"> ▪ Flow cup gun: Nozzle: 2.0 - 2.5 mm, atomiser air pressure: 2.0 - 3.0 bar ▪ Airless spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 120 bar ▪ Airmix spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 100 bar, atomiser air pressure: 1.2 - 2 bar.

Water-based pigment fillers & colour varnishes

All opaque water-based intermediate and finishing coatings from Remmers boast high opacity, fast drying times and excellent sanding properties. This allows complete coating systems – usually consisting of a filler and colour varnish – to be applied in just one day. Upon request, complete coating systems can be applied even faster with our 4in1 varnishes.

The customer benefits in detail:

- ✓ High-performance 1K fillers and colour varnishes
- ✓ No hardener, no thinner, no pot life and no waste
- ✓ Good covering power
- ✓ Eco-friendly & quick-drying
- ✓ 2K Aqua varnishes for heavy-duty applications

Recommended products

Pigment fillers

Aqua PF-430 Pigment Filler [iac]

Very easy to sand 1K pigment filler with indoor air cleaning effect – with Aqua VGA-485 as sealing filler

Aqua IF-431-1K Sealing Filler

Pore-filling 1K filler with very good sealing power, for wood with high levels of active substances

Aqua 2IF-437-2K Sealing Filler

Highly pigmented 2K filler with very good sealing power

Colour varnishes

Aqua CL-440 Colour Opaque

Fire-resistant, lightfast, durable 1K colour varnish

Aqua CL-445 Colour Opaque 4in1

Multi-layer 1K colour varnish for use as sealer, filler, opaque varnish and topcoat

Aqua 2CL-442 Colour Opaque 4in1

Lightfast 2K colour varnish for highly durable coatings

Aqua PF-430 Pigment & Sealing Filler [iac]

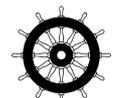

Very easy to sand, fire resistant 1K pigment filler with indoor air cleaning effect – with Aqua VGA-485 as sealing filler

Reduction of formaldehyde in indoor air

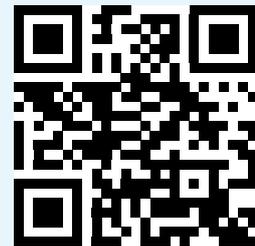

Formaldehyde is a harmful gas found in indoor air. It is emitted by materials such as wood-based products, textiles, carpets and disinfectants. Aqua PF-430 [iac] permanently reduces the formaldehyde content in the indoor air for a healthier living environment.

Aqua IF-431-1K Sealing Filler

Pore-filling 1K filler with very good sealing power, for wood with high levels of active substances

Range of use	<ul style="list-style-type: none"> ■ Preparation of opaque pigmented coatings ■ Solid wood & veneers ■ Wooden materials ■ Wood with high levels of active substances such as ash, hevea, oak, whitewood/yellow poplar ■ High-quality furniture ■ Wooden stairs ■ Damp interiors (kitchen and bathroom) ■ Interior finishing work: e.g. panels, borders, cladding & interior doors
Properties	<ul style="list-style-type: none"> ■ Single-component: simple and economical handling ■ Very good sealing effect (moisture and water-soluble substances in wood) ■ Primer for coatings that emphasise pores ■ Good sanding properties ■ Low risk of sanding through ■ Can be coated with Aqua and PUR varnishes
Application	<ul style="list-style-type: none"> ■ Airless spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 120 bar ■ Airmix spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 100 bar, atomiser air pressure: 1.2 - 2 bar ■ Flow cup gun: Nozzle: 2.0 - 2.5 mm, atomiser air pressure: 2.0 - 3.0 bar
Application rate	<ul style="list-style-type: none"> ■ 120 - 150 ml/m² per coat
Overcoating	<ul style="list-style-type: none"> ■ Dust-dry: after approx. 1 hour ■ Overcoating: after approx. 4 hours ■ Leaving to dry overnight optimises the sealing effect (e.g. on Hevea)

Aqua 2CL-442-2K Colour Opaque

Lightfast 2K colour varnish for highly durable coatings

Range of use	<ul style="list-style-type: none"> Wood and wood-based materials High-quality living room furniture and interior furnishing Exclusive interior fittings, kitchen & bathroom furniture Ideally suited to surfaces that have been pre-treated with Remmers Aqua fillers
Properties	<ul style="list-style-type: none"> Can also be used on vertical surfaces Good flow properties Good covering power Resistant to metal rings Excellent resistance to chemicals Good resistance to a wide range of popular hand creams Lightfast Does not become glossy
Certificates/test standards	<ul style="list-style-type: none"> DIN 68861-1B Chemical resistance with restrictions (minor restrictions for colouring substances)
Preparation	<ul style="list-style-type: none"> 10:1 with Aqua H-484 by volume (10:1 by weight) Add hardener while stirring and homogenise the mixture for at least 2 minutes using the Remmers Patent Disperser If necessary, dilute the varnish/hardener mixture with max. 10% water Working time max. 4 hours under gravity; this may be lower at high temperatures. When applying with a pressure atomiser, e.g. airmix/airless spraying, the processing time is reduced to max. 30 minutes. During breaks in work, set the material supply to unpressurised and remove loads from pumps and spray guns
Application	<ul style="list-style-type: none"> Flow cup gun: Nozzle: 2.0 - 2.5 mm, atomiser air pressure: 2.0 - 3.0 bar Airless spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 120 bar Airmix spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 100 bar, atomiser air pressure: 1.2 - 2 bar
Application rate	<ul style="list-style-type: none"> 120 - 150 ml/m² per coat

Hardeners, thinners and additives for water-based varnishes

In most cases, our Aqua varnishes can be used without a hardener component. However, many of our high-performance 1K Aqua varnishes can be enhanced with the cross-linking agent and glass lacquer additive VGA-485 - and still with no pot life. The water-based 2K varnishes for premium applications, such as exclusive interior fittings and furniture, have to be used with the hardener component Aqua H-484. Also available are various cleaning agents, as well as aids and additives for improving the adhesion on non-wood substrates.

The customer benefits in detail:

- ✓ Production of coatings for metals and glass
- ✓ Production of textured coatings
- ✓ Efficient cleaning of tools

Recommended products

Hardeners/cross-linking agents

Aqua H-484 Hardener

Lightfast isocyanate for hardening Aqua coatings

Aqua VGA-485 Crosslinker & Glass Lacquer Additive

Improves the resistance and adhesion to glass of 1K varnishes

Thinners/tool cleaning agents

Aqua V-490 Retarder

Retarder for improving flow properties

Aqua RK-898 Cleaning Concentrate

Highly effective cleaning product for tools and equipment

UN-894 Converter

Retooling spraying equipment: solvent-based to water-based varnishes and vice versa

Admixtures and additives

UMA-824 Universal Metal Adhesion Additive

Improves the adhesion to metal of selected varnishes

SM-820 Texturing Additive

Additive for the production of textured coatings

Aqua MM-825 Matting Agent

Matting paste for water-based coating materials

ULM-822 Universal Light Stabiliser

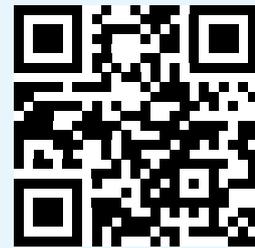

Protects light wood against UV radiation

Aqua H-484 Hardener

Lightfast isocyanate for hardening Aqua coatings

Range of use	<ul style="list-style-type: none"> For 2K Aqua varnishes
Properties	<ul style="list-style-type: none"> Lightfast Easy to mix with the Remmers Patent Disperser Diisocyanate content <0.1% by weight: no training required according to EU 2020/1149 Slow, slight increase in viscosity of the prepared mixtures
Application rate	<ul style="list-style-type: none"> Add to varnish in the specified mixing ratio

Get it done the right way

To achieve the best possible result, please take note of the following tips for water-based vanishes

Range of use

- ✓ Universal use for furniture and fixed components according to the Decopaint directive
- ✓ Furniture and interior fittings
- ✓ Stairs and parquet
- ✓ Wall cladding and constructions
- ✓ Suitable for sustainable building / building certifications

Properties

- ✓ Contemporary surfaces in all gloss levels
- ✓ Highly durable
- ✓ No odour
- ✓ Easy to use
- ✓ Single component for many applications
- ✓ 2K products for premium applications
- ✓ Cost effective - high solids content, no dilution, low excess material, easy disposal

Preparation

- ✓ High-quality materials required
- ✓ MDF boards: compacted middle layer and apparent density > 700 kg/m³
- ✓ Brush out wood with large pores, water if necessary
- ✓ Graded, fine intermediate sanding of bare wood and varnish, then remove dust
- ✓ Wood moisture content 8-12%, relative humidity 45-65%
- ✓ Recommended temperature of the substrate, material and air approx. 18 to 25 °C
- ✓ Prepare a test sample

Application/tips on use

- ✓ If possible, set up the sanding, varnishing and drying zones in separate areas
- ✓ Recommended temperatures:
 - Varnishing zone 18-20°C / 50% RH, avoid drafts and direct sunlight
 - Resting zone 18-20°C / 65% RH, (10-15 minutes), avoid drafts and direct sunlight
 - Drying zone 20-30°C / 45% RH, min. 2x air exchange per hour recommended, forced drying (e.g. IR drying) possible
- ✓ Surfaces freshly coated with Aqua varnish may be cloudy; this will dry transparent
- ✓ Dried-on varnish residue will not dissolve in the varnish, so a suitable sieve or filter must be used when filling the varnish application device.
- ✓ Use suitable stainless tools
- ✓ Prime absorbent and open-pored substrates with diluted material for optimum wetting

Application rate

- ✓ Use the application rates specified in the Technical Data Sheet in order to avoid delays in drying and surface defects
- ✓ With multi-layer systems, use the lower application rate value for the primer and the upper value for the topcoat
- ✓ It is recommended to use a measuring comb in a concealed area to check the layer thickness, or to use the weighing method, for quality assurance purposes

Tools/cleaning/disposal

- ✓ Use corrosion-proof, stainless steel tools for varnishing and handling material.
- ✓ Use suitable nozzle sizes, atomiser air caps and material handling systems according to the instructions in the Technical Data Sheet and the manufacturer's data sheets
- ✓ Use technically clean compressed air
- ✓ Equipment that is used alternately with solvent-based varnishes must be rinsed carefully and rinsed with UN-894 for the system change
- ✓ Use Aqua RK-898 Cleaning Concentrate for thorough cleaning
- ✓ Collect varnish residues and water used for washing using a suitable coagulant and dispose of according to the manufacturer's instructions
- ✓ Dried varnish residues are classified as commercial waste

Personal protective equipment

- ✓ Wear safety glasses, safety gloves and safety boots
- ✓ A2/P2 respiratory mask required, extended period of use (breakthrough time) compared to solvents
- ✓ Use extraction, always apply varnish in the direction of the extraction

Safety/regulations

- ✓ External test certificates and sustainability data sheets are available as extra literature for the product range (emission properties, ingredients etc.)

Storage/shelf life

- ✓ The temperature must not fall below 5 °C during storage and transport
- ✓ Observe the shelf life information on the container label
- ✓ Use up the contents of opened containers quickly
- ✓ Bacteria contamination due to contact with rinsing water or tools significantly reduces the shelf life of opened containers

Preservation/maintenance

- ✓ Damp-clean with soapy water, avoid leaving residues
- ✓ Lint-free soft cleaning cloths, do not use microfibre
- ✓ Repair damage immediately
- ✓ Do not use furniture care products containing silicone or wax; check compatibility in a concealed area before use

Range of use	System structure	Property profile/advantages
Finish with emphasised pores: all areas, all wood types	<ul style="list-style-type: none"> ■ If needed: Aqua KB-004 / PB-006 (for colour finishes) ■ Aqua SL-418* ■ Aqua SL-418* <p>* Optional: +Aqua VGA-485 for an additional durability boost (tabletops etc.)</p>	<ul style="list-style-type: none"> ■ Resistant to daily use thanks to durable surfaces ■ Handling, appearance, feel of a solvent-based varnish ■ Directly on oak without green discolouration ■ Also for ship interior finishing (IMO) and public areas (fire resistant)
Premium finish that emphasises pores: all areas including kitchens & bathrooms, all wood types	<ul style="list-style-type: none"> ■ If needed: Aqua KB-004 / PB-006 (for colour finishes) ■ Aqua 2SL-452 + Aqua H-484 ■ Aqua 2SL-452 + Aqua H-484 	<ul style="list-style-type: none"> ■ Resistant to daily use thanks to highly durable surfaces ■ Directly on oak without green discolouration
Natural effect varnish with emphasised pores: all areas, light wood	<ul style="list-style-type: none"> ■ Aqua NEL-419/05* ■ Aqua NEL-419/05* <p>* Optional: +Aqua VGA-485 for an additional durability boost (tabletops etc.)</p>	<ul style="list-style-type: none"> ■ For coatings that are imperceptible visually and to the touch ■ Resistant to daily use thanks to durable surfaces ■ Also for ship interior finishing (IMO) and public areas (fire resistant)
Pore-filling varnish: stairs and other interior components, all wood types	<ul style="list-style-type: none"> ■ If needed: Aqua KB-004 / PB-006 (for colour finishes) ■ Aqua TL-412* ■ Aqua TL-412* <p>* Optional: +Aqua VGA-485 for an additional durability boost (project work etc.)</p>	<ul style="list-style-type: none"> ■ Economical application on suspended surfaces in just two steps ■ Slip-resistant surfaces "R10" with SM-820 ■ Also for ship interior finishing (IMO) and public areas (fire resistant) ■ For stair coatings with no creaking
Pore-filling, cloth matt natural effect varnish: stairs and other interior components, light wood	<ul style="list-style-type: none"> ■ Aqua NTL-420/05* ■ Aqua NTL-420/05* <p>* Optional: +Aqua VGA-485 for an additional durability boost (project work & glass lacquer)</p>	<ul style="list-style-type: none"> ■ Economical application on suspended surfaces in just two steps ■ Slip-resistant surfaces "R10" and no creaking
Transparent seal coat: wooden flooring, parquet & built-in steps	<ul style="list-style-type: none"> ■ If needed: Aqua FKL-402 ■ If needed: Aqua MSV-403 ■ Aqua PL-413* ■ Aqua PL-413* ■ Aqua PL-413* <p>* Optional: +Aqua VGA-485 for an additional durability boost (e.g. project work)</p>	<ul style="list-style-type: none"> ■ Optimised for roller application with excellent flow properties ■ Compact, durable 1K system for virtually all wooden floors/stairs ■ Very good resistance to water
Semi-transparent glass varnish: glass in interiors, kitchens and bathrooms	<ul style="list-style-type: none"> ■ Cleaning: UN-894 ■ Aqua SL-418 + Aqua VGA-485 + SM-820 for special effects 	<ul style="list-style-type: none"> ■ No duplicate purchasing and storage ■ Durable glass varnish with available wood varnishes/components ■ SM-820 can be used to create various effects & anti-fingerprint effect ■ Excellent adhesion with Aqua VGA-485

Opaque coating systems

Water-based coating systems

Range of use	System structure	Property profile/advantages
Opaque colour coating: interior MDF	<ul style="list-style-type: none"> ■ Aqua PF-430 [iac] ■ Aqua CL-440* ■ If needed: Aqua SL-418 / TL-412* (for resistance to metal rings) <p style="font-size: small; margin-top: 5px;">* Optional: +Aqua VGA-485 for an additional durability boost</p>	<ul style="list-style-type: none"> ■ Efficient: high covering power, fast drying, very easy to sand ■ Indoor air cleaning: creates healthier living environments by trapping formaldehyde ■ Also for ship interior finishing (IMO) and public areas (fire resistant)
Opaque coating: MDF in kitchens and bathrooms	<ul style="list-style-type: none"> ■ Aqua PF-430 [iac] +Aqua VGA-485 ■ Aqua CL-440 +Aqua VGA-485 ■ Aqua SL-418 +Aqua VGA-485 (for resistance to metal rings) 	<ul style="list-style-type: none"> ■ Very good sealing effect: prevents swelling & yellowing ■ Efficient: high covering power, fast drying, very easy to sand ■ Indoor air cleaning: creates healthier living environments by trapping formaldehyde ■ Also for ship interior finishing (IMO) and public areas (fire resistant)
Opaque 4in1 colour coating: interior MDF	<ul style="list-style-type: none"> ■ Aqua CL-445 4in1* ■ Aqua CL-445 4in1* <p style="font-size: small; margin-top: 5px;">* Optional: +Aqua VGA-485 for an additional durability boost</p>	<ul style="list-style-type: none"> ■ Sealing, filler, colour varnish and topcoat in a single product ■ High covering power and build, excellent adhesion and resistance to metal rings ■ Easy to store, more efficient surface preparation
Premium opaque colour finish: bare MDF, all areas including kitchen and bathroom	<ul style="list-style-type: none"> ■ Aqua 2IF-437 + Aqua H-484 ■ Aqua 2CL-442/10 + Aqua H-484 	<ul style="list-style-type: none"> ■ Excellent flow properties for visually and haptically flawless surfaces ■ Reliable sealing effect ■ For durable surfaces with resistance to metal rings without a topcoat
Premium opaque colour finish: MDF with primer film, all areas including kitchen and bathroom	<ul style="list-style-type: none"> ■ Aqua 2CL-442/10 + Aqua H-484 ■ Aqua 2CL-442/10 + Aqua H-484 optional topcoat: Aqua 2SL-452 + Aqua H-484 	<ul style="list-style-type: none"> ■ Excellent flow properties for visually and haptically flawless surfaces ■ Efficient coating ■ For durable surfaces with resistance to metal rings without a topcoat
Opaque colour finish with emphasis of pores: all interior finishing work, fine- and coarse-pored wood	<ul style="list-style-type: none"> ■ Aqua CL-445 4in1* ■ Aqua CL-445 4in1* <p style="font-size: small; margin-top: 5px;">* Optional: +Aqua VGA-485 for an additional durability boost</p>	<ul style="list-style-type: none"> ■ Optimal sealing effect ■ Good flow properties: optimum pore emphasis/wetting ■ For durable surfaces with resistance to metal rings without a topcoat
Opaque colour coating: stairs, all wood types	<ul style="list-style-type: none"> ■ Aqua HWS-712 [eco] ■ Aqua PF-430 [iac] + Aqua VGA-485 ■ Aqua CL-445 4in1* ■ Topcoat for stairs and handrails: Aqua TL-412* <p style="font-size: small; margin-top: 5px;">* Optional: +Aqua VGA-485 for an additional durability boost</p>	<ul style="list-style-type: none"> ■ Very good sealing effect: Prevents swelling & yellowing also on hevea and other problematic wood types ■ Economical coating on suspended surfaces (stability & defoaming) ■ Indoor air cleaning: creates healthier living environments by trapping formaldehyde
Opaque rear glass colour finish: interior glass, kitchens and bathrooms	<ul style="list-style-type: none"> ■ Cleaning: UN-894 ■ Aqua CL-440/CL-445 4in1 + Aqua VGA-485 	<ul style="list-style-type: none"> ■ No duplicate purchasing and storage ■ Durable glass varnish with available wood varnishes/components ■ Highly opaque thanks to excellent covering power ■ Excellent wet adhesion with Aqua VGA-485

Solvent-based transparent primers, finishes and topcoats

The furniture coatings in this category feature exceptional application properties and can be used to achieve uncompromisingly durable surfaces – e.g. for kitchen and bathroom furniture. From invisible, natural effect varnishes to high-gloss finishes, anything is possible. To keep things simple, most of the products are compatible with the hardening component PUR H-280.

The customer benefits in detail:

- ✓ Lightfast, clear 2K varnishes for maximum resistance
- ✓ High gloss varnishes with very high build
- ✓ Cloth and dull matt natural effect finishes
- ✓ Virtually all varnishes are compatible with the same hardener

Recommended products

Primers

PUR FG-201 Filling Primer

Lightfast 2K filling primer for semi-closed to closed-pore lacquering systems

Finishes

PUR SL-210 Finish

Flame-resistant 2K finish especially for use in public buildings

PUR SL-212 Finish

High-build, highly scratch-resistant 2K finish

PUR RHE-217 Bare Wood Effect Varnish

2K finish for natural wood effects on light and dark wood

PUR BML-215 Brilliant Matt Varnish

Very matt 2K PUR varnish with integrated anti-fingerprint effect even on dark substrates

Topcoats

PUR HL-211/90 High Gloss Finish

Lightfast 2K topcoat for flame-resistant high-gloss coatings

PUR FG-201 Filling Primer

Lightfast, two-component filling primer for semi-closed to closed-pore lacquering systems

Range of use	<ul style="list-style-type: none"> ■ Solid wood & veneers ■ Bleached wood ■ Wooden materials ■ High-quality furniture ■ Kitchen & bathroom furniture
Properties	<ul style="list-style-type: none"> ■ Very fast drying ■ Good sanding properties ■ Good surface-filling properties ■ Lightfast ■ Free of aromatic compounds ■ Fire behaviour according to DIN EN 13501-1: C-s2,d0 on suitable substrates ■ Suitable for ship interior finishing (IMO)
Certificates/test standards	<ul style="list-style-type: none"> ■ Classification of fire behaviour according to DIN EN 13501-1 (C-s2, d0) ■ Declaration of conformity (Marine Equipment Directive)
Preparation	<ul style="list-style-type: none"> ■ 10:1 with PUR H-280 by volume (100:10 by weight) ■ Working time max. 8 hours; this may be lower at high temperatures
Application	<ul style="list-style-type: none"> ■ Flow cup gun: Nozzle: 1.8 - 2.0 mm; atomiser air pressure: 2 - 3 bar ■ Airless spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 120 bar ■ Airmix spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 100 bar, atomiser air pressure: 1.2 - 2 bar
Application rate	<ul style="list-style-type: none"> ■ 80 - 120 ml/m² per coat

Solvent-based pigment fillers and colour varnishes

Our solvent-based PUR sealing fillers and colour varnishes are easy to use – and once again, only the hardener component PUR H-280 is required for the various coatings. Our new PUR IF-235 sealing filler sets standards in terms of efficient substrate preparation of MDF boards thanks to its fast and excellent sandability - without the need for a separate, clear seal coat. With the all-in-one system PUR CL-241 Colour Opaque 4in1, high-quality opaque surfaces with good resistance to metal rings can be achieved using just one product. All Remmers PUR colour opaque finishes are available in a wide variety of colours, either shipped directly from the factory or from one of our fully automated tinting stations.

The customer benefits in detail:

- ✓ 2K fillers and colour varnishes with high opacity
- ✓ Efficient, functional and highly durable
- ✓ Virtually all varnishes are compatible with the same hardener
- ✓ High resistance to metal rings even without a clear topcoat

Recommended products

Sealing fillers
PUR IF-235 Sealing Filler

2K sealing filler for opaque surfaces with excellent sandability

Colour varnishes
PUR CL-240 Colour Opaque

Flame-resistant, lightfast 2K colour varnish with high hiding power

PUR CL-241 Colour Opaque 4in1

Highly pigmented, multi-layer 2K varnish for use as a sealer, filler, opaque varnish & topcoat

PUR HCL-248/90 High Gloss Colour Varnish

High-gloss 2K topcoat with excellent volume stability and low time to polishability

PUR IF-235 Sealing Filler

2K sealing filler for opaque surfaces with excellent sandability

Range of use	<ul style="list-style-type: none"> Preparation of opaque pigmented coatings Solid wood and wood-based materials High-quality furniture Damp interiors (kitchen and bathroom)
Properties	<ul style="list-style-type: none"> Can also be used on vertical surfaces Good build and high stability Good resistance to alternating climate Very good sealing effect (moisture and substances in wood) Quick-drying and easy to sand Fire behaviour acc. to DIN EN 13501-1: C-s1,d0 on suitable substrates Suitable for ship interior finishing (IMO)

PUR CL-241 Colour Opaque 4in1

Highly pigmented, multi-layer 2K varnish with resistance to metal rings, for use as a sealer, filler, opaque varnish & topcoat, with very high scratch resistance and integrated anti-fingerprint effect

Range of use	<ul style="list-style-type: none"> Optimum adhesion to primer films and ABS edges Exclusive interior design and shop fitting As a glass varnish (in conjunction with PUR GLA-820) As metal varnish (when used with UMA-824) Solid wood and wood-based materials High-quality furniture Kitchen & bathroom furniture Handleless front panels
Properties	<ul style="list-style-type: none"> Functions: sealing layer, filler, coloured coating and topcoat Anti-fingerprint effect High mechanical resistance Lightfast Resistant to metal rings Good stability (coating on suspended surfaces) Resistant to hot water and steam Very good flow properties High build Good covering power Fire behaviour acc. to DIN EN 13501-1: C-s1,d0 on suitable substrates
Certificates/test standards	<ul style="list-style-type: none"> DIN 68861-1B Resistance to chemicals Classification of fire behaviour according to DIN EN 13501-1 (C-s1,d0) Declaration of conformity (Marine Equipment Directive)
Preparation	<ul style="list-style-type: none"> 10:1 with PUR H-280 by volume (100:9 by weight) Working time max. 4 - 6 hours; this may be lower at high temperatures.
Application	<ul style="list-style-type: none"> Airmix spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 100 bar, atomiser air pressure: 1.2 - 2 bar Airless spraying: Nozzle: 0.23 - 0.28 mm, material pressure: 80 - 120 bar Flow cup gun: Nozzle: 1.8 - 2.0 mm; atomiser air pressure: 2 - 3 bar
Application rate	<ul style="list-style-type: none"> 100 - 120 ml/m² per coat
Overcoating	<ul style="list-style-type: none"> Dust-dry: after approx. 30 minutes Overcoating: after approx. 3 hours Stacking: > 16 hours

Hardeners, thinners and additives for solvent-based varnishes

Most Remmers PUR coatings can be used with the same hardening component – PUR H-280 Hardener – which minimises the risk of user error and excess stock. Adding cross-linking agents and other additives significantly improves the adhesion properties of Remmers PUR coatings on a range of non-wood substrates.

The customer benefits in detail:

- ✓ PUR H-280: one hardener for almost all Remmers 2K-PUR varnishes
- ✓ Production of coatings for metals and glass
- ✓ Production of textured coatings

Recommended products

Hardeners

PUR H-280 Hardener
Isocyanate for hardening PUR varnishes

PUR H-286 Hardener
Isocyanate for solvent-based PUR varnishes

Thinners/tool cleaning agents

V-890 Thinner
Fast dilution/cleaning of tools

V-897 Thinner
Medium-speed dilution: flow optimisation and fast drying

V-893 Retarder
Slow dilution for improving flow properties

WV-891 Brush Wash
For cleaning tools

Admixtures and additives

MM-823 Matting Agent
Matting additive for 2K PUR coatings

UMA-824 Universal Metal Adhesion Additive
Improves the adhesion to metal of selected varnishes

PUR GLA-820 Glass Lacquer Additive
Additive for improving the adhesion of PUR varnishes on glass

SM-820 Texturing Additive
Additive for the production of textured coatings

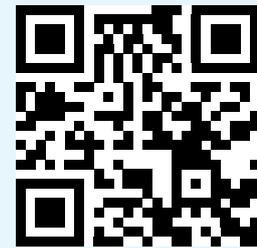

ULM-822 Universal Light Stabiliser
Protects light wood against UV radiation

PUR H-280 Hardener

Lightfast isocyanate for hardening PUR varnishes

Range of use	<ul style="list-style-type: none"> For hardening 2K PUR coatings in the specified mixing ratio Bleached wood
Properties	<ul style="list-style-type: none"> Lightfast Free of aromatic compounds No training required as per EU Regulation 2020/1149
Application	<ul style="list-style-type: none"> Isocyanates react with moisture in the air, so always keep the hardener container sealed air-tight

Get it done the right way

To achieve the best possible result, please take note of the following tips for solvent-based coating systems:

Range of use

- ✓ High-quality furniture
- ✓ Kitchen & bathroom furniture
- ✓ Ship interior finishing
- ✓ Shop fitting and exhibition stand construction
- ✓ Solid wood & veneers

Properties

- ✓ Contemporary surfaces in all gloss levels
- ✓ Highly durable
- ✓ Easy to use
- ✓ One hardener component (no training required)
- ✓ Anti-fingerprint effect possible
- ✓ Cost-effective - long pot life and working time, fast drying

Preparation

- ✓ High-quality materials required
- ✓ MDF boards: compacted middle layer and apparent density > 700 kg/m³
- ✓ Brush out wood with large pores, water if necessary
- ✓ Graded, fine intermediate sanding of bare wood and varnish, then remove dust
- ✓ Wood moisture content 8-12%, relative humidity 45-65%
- ✓ Recommended temperature of the substrate, material and air approx. 18 to 25 °C
- ✓ Prepare a test sample

Application/tips on use

- ✓ If possible, set up the sanding, varnishing and drying zones in separate areas
- ✓ Recommended temperatures:
 - Varnishing zone 18-20°C / 50% RH, avoid drafts and direct sunlight
 - Resting zone 18-20°C / 65% RH, (10-15 minutes), avoid drafts and direct sunlight
 - Drying zone 20-30°C / 45% RH, min. 2x air exchange per hour recommended, forced drying possible
- ✓ Seal PUR hardener containers air-tight
- ✓ Homogenise the PUR hardener and additives thoroughly in the varnish (Patent Disperser)
- ✓ Follow the mixing ratios precisely - for materials with a high density, e.g. sealing filler & colour varnishes, pay attention to differences between volumetric mixing (measuring cup) and gravimetric mixing (scales) in the Technical Data Sheet
- ✓ Only use suitable varnish thinners
- ✓ Use a sieve/filter when filling the varnish application device
- ✓ Use suitable tools
- ✓ Prime absorbent and open-pored substrates with diluted material for optimum wetting
- ✓ Sand PUR varnish surfaces and remove dust before applying further coats of varnish

Application rate

- ✓ Use the application rates specified in the Technical Data Sheet in order to avoid delays in drying, surface defects and unpleasant odours
- ✓ With multi-layer systems, use the lower application rate value for the primer and the upper value for the topcoat
- ✓ It is recommended to use a measuring comb in a concealed area to check the layer thickness, or to use the weighing method, for quality assurance purposes

Tools/cleaning/disposal

- ✓ Use suitable nozzle sizes, atomiser air caps and material handling systems according to the instructions in the Technical Data Sheet and the manufacturer's data sheets
- ✓ Use technically clean compressed air
- ✓ Equipment that is used alternately with water-based varnishes must be rinsed carefully and rinsed with UN-894 for the system change
- ✓ Use WV-891 Brush Wash for thorough cleaning
- ✓ Gather up leftover thinner and varnish residues and dispose of appropriately
- ✓ Dried varnish residues are classified as commercial waste

Personal protective equipment

- ✓ Wear safety glasses, safety gloves and safety boots
- ✓ A2/P2 respiratory mask required
- ✓ Use extraction, always apply varnish in the direction of the extraction

Safety/regulations

- ✓ External test certificates and sustainability data sheets are available as extra literature for the product range (emission properties, ingredients etc.)

Storage/shelf life

- ✓ The temperature must not fall below 5 °C during storage and transport
- ✓ Observe the shelf life information on the container label
- ✓ Ventilate storage areas, observe the requirements for fire and explosion protection

Preservation/maintenance

- ✓ Damp-clean with soapy water, avoid leaving residues
- ✓ Lint-free soft cleaning cloths, do not use microfibre
- ✓ Repair damage immediately
- ✓ Do not use furniture care products containing silicone or wax; check compatibility in a concealed area before use

Oils and hard wax sealers

Remmers offers products based on natural oils and waxes as an alternative to varnishes for furniture, interior fittings, wooden flooring and wooden stairs. A special feature of these products is their natural look and feel. And when it comes to application, all the products are highly efficient: the 2K oil HSO-118 [eco] can even be applied in just one coat. One of Remmers' specialities is products in the category of hard wax sealers, either as a conventional, solvent-based solution or in an eco-friendly, water-based version. Surfaces finished with HWS-112 & Aqua HWS-712 [eco] are as beautiful as oiled surfaces and are just as resistant as 2K varnishes.

The customer benefits in detail:

- ✓ Hard wax seal: as attractive as an oil – as reliable as a varnish
- ✓ 2K oil HSO 118 [eco]: Finished surfaces in a single coat
- ✓ Aqua HWS-712 [eco] & HSO-118 [eco]: Very high proportion of renewable raw materials
- ✓ Numerous certifications

Recommended products

Hard wax seal
Aqua HWS-712
Hard Wax Seal [eco]
 Water-based, hard-wearing 1K sealant made from renewable raw materials

HWS-112
Hard Wax Seal
 Durable, single-component wood sealer for a natural look

High-solid oil
HSO-118
High Solid Oil [eco]
 High-solid wood finish made from renewable raw materials

OH-180 Hardener [eco]
 Solvent-free isocyanate for hardening HSO-118 [eco]

Maintenance & care
Oiled Floor Care [eco]
 Care product for oiled wooden floors and stairs

Maintenance Kit
 For oiled surfaces

Aqua HWS-712 Hard Wax Seal [eco]

Water-based, hard-wearing 1K sealant made from renewable raw materials, for two applications

Range of use	<ul style="list-style-type: none"> Interior wood Wood in sheltered outdoor areas Furniture and interior fittings Wooden floors and stairs Tabletops and worktops Primer: minimises swelling behaviour (opaque coatings) Terrace furniture in sheltered outdoor areas Dimensionally stable wood building elements in sheltered areas Sustainable building: suitable for building certifications DGnB, LEED, BNB Not for bleached wood "Natural effect" colour only for light wood, e.g. oak, ash & spruce No removal of excess
Properties	<ul style="list-style-type: none"> Very fast drying Resistant to abrasion and scratches Resistant to chemicals: DIN 68861, 1B Slip-resistant Very low tendency to shine Natural look and feel Made from renewable raw materials: min. 80% A vegan product based on the information available to us VOC-free and mild odour No creaking 2K ready: improvement of the resistance to chemicals, hand cream, scratches and abrasion by adding 2% Aqua VGA-485 Fire resistant Cloth matt
Certificates/test standards	<ul style="list-style-type: none"> DIN EN 71-3 "Migration of certain elements" Slip-resistant as per DIN 51130:2014 "R10" with texturing agent / "R9" without texturing agent Classification of fire behaviour as per DIN EN 13501-1 (B-s1, d0)
Application	<ul style="list-style-type: none"> Roller, spray application Microfibre sealant roller approx. 5 mm pile height Flow cup gun: Nozzle: 1.0 - 1.6 mm, atomiser air pressure: 1.0 - 2.0 bar Airless spraying: Nozzle: 0.23 mm, material pressure: 60 - 80 bar Airmix spraying: Nozzle: 0.23 mm, material pressure: 50 - 70 bar, atomiser air pressure: max. 1 bar
Application rate	<ul style="list-style-type: none"> Two coats, 70 - 90 ml/m² per coat
Overcoating	<ul style="list-style-type: none"> Dust-dry: after approx. 30 minutes Touch-dry: after approx. 1.5 hours Overcoating: after approx. 3 hours Full loading capacity: after approx. 7 days

HSO-118 High Solid Oil [eco]

High-solid wood finish made from renewable raw materials, for protection in a single coat

Range of use	<ul style="list-style-type: none"> Interior wood Wooden floors and stairs Tabletops and worktops High-quality solid wood furniture Cork floors Panels and moulding Natural stone kitchen worktops (less dirt) Sustainable building: suitable for building certifications DGnB, LEED, BNB
Properties	<ul style="list-style-type: none"> 3in1 oil: stain, oil and wax sealing coat Made from renewable raw materials: min. 90% Slip-resistant Penetrates deeply into the wood and emphasises the grain Durable, dirt repelling, hard-wearing Good resistance against selected standard household substances (e.g. water, cola, beer, tea, coffee, wine & cleaning agents) Flexible: 1K or 2K application 2K application: more durable and ready to use sooner
Certificates/test standards	<ul style="list-style-type: none"> DIN EN 71-3 "Migration of certain elements" Declaration of Harmlessness for food contact Approval as surface coating system for parquet and wood flooring Slip-resistant "R9" according to DIN 51130:2014
Application	<ul style="list-style-type: none"> Application by roller, brush, spreader or pad Attention: observe the information on self-ignition! Mixing: If necessary, mix with OH-180 [eco] in a ratio of 5:1 Processing time: 6h Inside cupboards and drawers, only apply a single thin layer of the product Areas not subjected to heavy wear and tear: single 1K application Areas subjected to higher stresses: single 2K application (alternative: two times 1K application) Remove excess material after approx. 20 - 30 min Depending on the substrate condition, apply 1 or 2 coats Before the second coat carry out an intermediate sanding with P 240 - 320
Application rate	<ul style="list-style-type: none"> 20 - 70 ml/m² per coat (the application rate includes excess material and depends heavily on the application method, the absorbency of the wood and the sanded finish)
Overcoating	<ul style="list-style-type: none"> After drying overnight (practice values at 20 °C and 65% RH)

Get it done the right way

To achieve the best possible result, please take note of the following tips for oils and hard wax sealers

Range of use

- ✓ Furniture and interior fittings
- ✓ Wooden floors and stairs
- ✓ Universal use for furniture and fixed components according to the Decopaint directive
- ✓ Wall cladding and constructions
- ✓ Suitable for sustainable building / building certifications

Properties

- ✓ Natural look and feel
- ✓ Highly durable
- ✓ Easy to use
- ✓ Single component for many applications
- ✓ Hard Wax Seal: economical application, no need to remove excess material

Preparation

- ✓ Wood must be selected carefully
- ✓ Brush out wood with large pores, water if necessary
- ✓ Graded sanding of bare wood and intermediate sanding, then remove dust
- ✓ Wood moisture content 8-12%, relative humidity 45-65%
- ✓ Recommended temperature of the substrate, material and air approx. 18 to 25 °C
- ✓ Prepare a test sample

Application/tips on use

- ✓ If possible, set up the sanding, varnishing and drying zones in separate areas
- ✓ Recommended temperatures:
 - Varnishing zone 18-20°C / 50% RH, avoid drafts and direct sunlight
 - Resting zone 18-20°C / 65% RH, (10-15 minutes), avoid drafts and direct sunlight
 - Drying zone 20-30°C / 45% RH, min. 2x air exchange per hour recommended, forced drying possible
- ✓ Seal containers air-tight, store containers inverted, skin formation possible
- ✓ Thoroughly homogenise the hardener and additives with the product (Patent Disperser)
- ✓ Spraying: Use a sieve/filter when filling the varnish application device
- ✓ Use suitable tools
- ✓ Prime absorbent and open-pored substrates for optimum wetting when applying product with a roller or brush
- ✓ Observe the documentation on the use of oil-based products (danger of self-ignition) TI 2.12 – 2.1
- ✓ Oil-based products contain natural ingredients. Under the influence of UV light, light exclusion (yellowing), heat or individual changes to the wood, this can result in changes to the surface
- ✓ White, pastel and grey shades can lose their intensity in a short period of time. The severity depends on the type of wood used, the substances it contains, and the heat and lighting conditions. If these changes are not desired, it is recommended to apply a lightfast stain to the surface

Application rate

- ✓ Use the application rates specified in the Technical Data Sheet in order to avoid delays in drying and surface defects
- ✓ Observe the recommended action time before removing excess material
- ✓ When using multi-layer systems on absorbent substrates, use the upper application rate value for the primer and the lower value for the topcoat
- ✓ It is recommended to use a measuring comb in a concealed area to check the layer thickness, or to use the weighing method, for quality assurance purposes

Tools/cleaning/disposal

- ✓ Use suitable nozzle sizes, atomiser air caps, material handling systems, rollers, brushes, pads etc. according to the instructions in the Technical Data Sheet and the manufacturer's data sheets
- ✓ Use technically clean compressed air
- ✓ Alternating use of varnishing tools with other systems is not recommended
- ✓ Use V-101 Thinner to thoroughly clean tools and work surfaces
- ✓ Collect cloths, sponges, filter mats, polishing pads, abrasives, varnish dust, sanding dust, soiled work clothes etc. in fire-safe containers and dispose of correctly

Personal protective equipment

- ✓ Wear safety glasses, safety gloves and safety boots
- ✓ A2/P2 respiratory mask required
- ✓ Use extraction, always apply varnish in the direction of the extraction

Safety/regulations

- ✓ External test certificates and sustainability data sheets are available as extra literature for the product range (emission properties, ingredients etc.)

Storage/shelf life

- ✓ The temperature must not fall below 5 °C during storage and transport
- ✓ Observe the shelf life information on the container label
- ✓ Ventilate storage areas, observe the requirements for fire and explosion protection

Preservation/maintenance

- ✓ Use the Remmers Maintenance Kit for Oiled Surfaces
- ✓ Damp-clean with soapy water, avoid leaving residues
- ✓ Lint-free soft cleaning cloths, do not use microfibre
- ✓ Repair damage immediately
- ✓ Do not use furniture care products containing silicone or wax; check compatibility in a concealed area before use

Oils and hard wax sealers

Coating systems

Range of use	System structure	Property profile/advantages
Highly durable 1K sealant with an oil effect: all areas including kitchens, bathrooms & stairs, all wood types	<ul style="list-style-type: none"> ▪ If needed: OB-008 (for colour finishes) ▪ HWS-112 clear (can be tinted for particularly intensive colours) ▪ HWS-112 clear 	<ul style="list-style-type: none"> ▪ As attractive as an oil - as reliable as a varnish ▪ Ultra-natural, cloth matt finish and very high durability ▪ Versatile application: roller & spraying ▪ Multiple certifications: e.g. slip resistance R10, IMO for ship interior finishing
Highly durable 1K sealant with an oil effect based on renewable raw materials: all areas including kitchens, bathrooms & stairs, all wood types	<ul style="list-style-type: none"> ▪ If needed: OB-008/HSO-118 [eco] pigmented (for colour finishes) ▪ Aqua HWS-712 [eco] clear / grain+ / natural effect* ▪ Aqua HWS-712 [eco] clear / grain+ / natural effect* <p>* Optional: +Aqua VGA-485 for an additional durability boost (tabletops etc.)</p>	<ul style="list-style-type: none"> ▪ As attractive as an oil - as reliable as a varnish ▪ Versatile application: roller & spraying ▪ Ultra-natural, cloth matt finish and very high durability ▪ Efficient coating process thanks to fast drying ▪ For public areas: fire resistant ▪ Based on renewable raw material & vegan ▪ VOC-free: for sustainable construction & healthy living
Durable, clear oil surface finish based on renewable raw materials: wooden floors, furniture & interiors, in just one coat	<ul style="list-style-type: none"> ▪ HSO-118 [eco] clear + OH-180 [eco] ▪ Repeat if necessary (more exposed areas, absorbent wood types) 	<ul style="list-style-type: none"> ▪ Efficient application in just one coat as 2K variant ▪ Excellent emphasis of the grain for an organic wood finish ▪ Excellent emission properties for healthy living environments ▪ Anti-static: does not attract dust ▪ Multiple certifications: e.g. slip resistance
Durable, coloured oil surface finish based on renewable raw materials: wooden floors, furniture & interiors, in just one coat	<ul style="list-style-type: none"> ▪ HSO-118 [eco] coloured + OH-180 [eco] ▪ If needed: HSO-118 [eco] clear (for surfaces subjected to heavy stresses) 	<ul style="list-style-type: none"> ▪ 3in1 oil: stain, oil and wax sealing coat ▪ Efficient application in just one coat as 2K variant ▪ Excellent emphasis of the grain for an organic wood finish ▪ Excellent emission properties for healthy living environments ▪ Anti-static: does not attract dust ▪ Multiple certifications: e.g. slip resistance

Stains

With the modular, highly flexible stain concept from Remmers, the sky's the limit when it comes to choosing colours. With just 3–4 different coloured base stains that can be mixed with one another in any ratio, you can produce wood stains in a wide variety of colour shades that are the perfect match for the species of wood you want to stain. Remmers concentrates mainly on water-based staining concepts that work equally well with both water-based and solvent-based coating systems.

The customer benefits in detail:

- ✓ Modular principle for stains
- ✓ For flexible production of stain colours by the applicator
- ✓ Perfectly harmonised with Remmers varnishes and oils

Get it done the right way

To achieve the best possible result, please take note of the following tips for solvent-based coating systems:

Range of use

- ✓ High-quality furniture
- ✓ Seating and upholstered furniture
- ✓ Ship interior finishing
- ✓ Shop fitting and exhibition stand construction
- ✓ Colourful toys and furniture
- ✓ Solid wood & veneers

Properties

- ✓ Cost-effective, contemporary surface finishes
- ✓ Good light-fastness
- ✓ Levelling effect when applied by spraying
- ✓ Emphasises the pores when applied with dispersal
- ✓ Based on pigments and/or dyes
- ✓ Positive effects on softwood
- ✓ Imitates noble wood colours and smoky effects

Preparation

- ✓ Careful selection of veneer and wood
- ✓ Brush out wood with large pores
- ✓ Water, bleach if necessary
- ✓ If necessary, remove residues of glue and veneer tape
- ✓ Graded, fine sanding of the bare wood, then remove dust
- ✓ Wood moisture content 8-12%, relative humidity 45-65%
- ✓ Recommended temperature of the substrate, material and air approx. 18 to 25 °C
- ✓ Create stain sample - final colour only achieved when coated with the clear varnish selected for the product

Application/tips on use

- ✓ Stir carefully before and during application
- ✓ Only use suitable additives and clean water
- ✓ Use a sieve/filter when filling the varnish application device
- ✓ Use suitable tools
- ✓ Substrates with large differences in absorption: saturate or wet with Aqua KB-004 clear
- ✓ On absorbent wood: Use Aqua V-490 to adjust Aqua stains
- ✓ Spray fine-pored wood (beech, maple, birch, cherry) as dry as possible, do not exceed the fibre saturation point
- ✓ Spray positive stains (Aqua PB-006) until fully saturated, do not apply forced drying
- ✓ Use Aqua KB-004 or NC HB-005 by dispersal or wiping to emphasise the pores
- ✓ Do not sand (through) stains
- ✓ Do not use on large areas, e.g. wooden floors. Use OB-008 Oil Stain or HSO-118 High Solid Oil [eco] pigmented for this purpose

Complementary products and accessories

Here you will find useful complementary products that are largely universal in use and naturally compatible with our coating systems: two-component fillers, polyurethane adhesives, sealing compounds and tools for mixing coatings and hardener components.

The customer benefits in detail:

- ✓ Helpers for daily working
- ✓ Tried and tested
- ✓ Perfectly harmonised with Remmers varnishes and oils

Recommended products

Induline 2K Filler
For levelling out deep uneven areas

MultiBond Express
Clear, universal, high-strength PUR adhesive

MultiSil
Universal, alkoxy-crosslinking silicone sealant

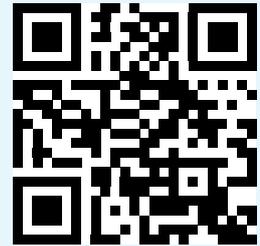

Patent Disperser
Stirring tool for mixing in hardener components

Induline 2K Filler

For levelling out deep uneven areas

Range of use	<ul style="list-style-type: none"> ■ Interior and exterior wood ■ Windows, doors, laminated wood, furniture etc. ■ Other substrates: Sheet steel, cast iron and aluminium, chipboard ■ Unsuitable substrates: <ul style="list-style-type: none"> - Substrates that can be dissolved by nitrocellulose thinner (e.g. acrylic coatings) - Galvanised and hot-dip galvanised sheet metal - Reactive primer (wash primer), synthetic resin or nitrocellulose combination primer, because adhesion difficulties are expected on these substrates- Tropical woods such as teak and palisander contain substances that can significantly delay or even prevent the hardening of polyester
Properties	<ul style="list-style-type: none"> ■ Elastic, two-component, fine filler on a polyester base ■ Reduced styrene content ■ Easy to smooth off ■ Good build ■ Easy to sand ■ Low volume shrinkage
Preparation	<ul style="list-style-type: none"> ■ Thoroughly mix the desired quantity of filler with approx. 2% hardener paste and use within 4 – 5 minutes
Application	<ul style="list-style-type: none"> ■ Application with a filling knife ■ When applying filler to exterior wood, spalling may generally occur due to swelling and shrinkage of the wood ■ After 20-25 minutes hardening time, Induline 2K filler can be dry-sanded.
Application rate	<ul style="list-style-type: none"> ■ As needed
Overcoating	<ul style="list-style-type: none"> ■ Overcoating after 15 - 20 minutes

MultiBond Express

Clear, universal, high-strength PUR adhesive

Range of use	<ul style="list-style-type: none"> ▪ Interiors and exteriors ▪ Universal ▪ Wood, metal, ceramics, PVC, polystyrene and glass ▪ Assembling furniture, panels, moulding and door linings ▪ Gluing wooden windows and doors
Properties	<ul style="list-style-type: none"> ▪ Single-component ▪ Solvent-free ▪ High adhesive strength, no staining ▪ Invisible bonds ▪ Water-resistant according to DIN EN 204: D4 ▪ Does not run off, evens out surface irregularities
Application	<ul style="list-style-type: none"> ▪ Application with a sealant gun ▪ Lightly wet both parts to be joined in order to achieve the maximum adhesive strength and rapid establishment of the bond. If joining two non-porous parts: lightly wet one side only. Apply the adhesive on one side and push together the pieces to be joined within 5 minutes, using a slight sliding or twisting movement if necessary and applying strong pressure. A higher adhesive strength is achieved by pressing the parts together (for at least 60 minutes). The adhesive bond must not be moved while it is hardening ▪ The material can be applied in dots or in a strip
Application rate	<ul style="list-style-type: none"> ▪ Approx. 5 - 15 g/m² if applied in strips, approx. 50 g/m² in dots

Quantity per pallet	1200	
Packaging unit	15 × 310 ml	Cartridge

MultiSil

Universal alkoxy-crosslinking silicone sealant

Range of use	<ul style="list-style-type: none"> ▪ Glazing work – especially in wood window manufacturing ▪ Expansion and connection joints in construction and sanitary areas ▪ Roof waterproofing ▪ Food production areas ▪ Sheet metal and metal construction ▪ Interior finishing, parquet etc. ▪ Mirror and plexiglass mounting ▪ Suitable for use in clean rooms and room ventilation systems
Properties	<ul style="list-style-type: none"> ▪ Highly abrasion-resistant and streak-free as per ift guideline VE-04/2 ▪ Coating-compatible as per DIN 52452, Part 4 ▪ Film preserver protects against microbial damage ▪ Extremely strong adhesion ▪ Can be used on many substrates without an adhesive primer ▪ Very low emissions (GEV-EMICODE EC 1Plus) ▪ Fire resistant ▪ Complies with the principles for health assessment of construction products in interiors (AgBB scheme)
Tools/cleaning	<ul style="list-style-type: none"> ▪ Hand-held and compressed air guns, filling knife, adhesive tape
Application rate	<ul style="list-style-type: none"> ▪ Approx. 100 ml/running metre for a 1 cm² joint cross-section
Yield	<ul style="list-style-type: none"> ▪ 310 ml - 3 m

All the essentials – our workshop posters

Wood varnishes and oils for joiners and carpenters

Big format, big impact: On our workshop posters, our customers can find the relevant products and the associated systems along with their key parameters at a glance. Each page is dedicated to either water-based or solvent-based coatings. The oils and waxes are also listed on both pages. The posters are available from our specialist representatives.

We get it done so that you can get things done

Whatever you have in mind:

We at Remmers do everything to personally support you, your work, your project, your idea, your vision, to reach your goal.

We never stand still and we always go one step further for you.

We drive tomorrow's products and services forward. And strive for sustainable development. Because we know from over 75 years of experience: Progress comes from getting things done, success comes from getting things done, the future comes from getting things done.

What can we get done for you?
Don't hesitate to get in touch.

**“Never stop
starting and
never start
stopping.”**

Guiding principle of
Bernhard Remmers,
founder

Remmers is one of the leading specialists for construction chemicals, wood paints and coatings, and industrial coatings. Founded in 1949 by Bernhard Remmers, we are an independent and owner-managed family business to this day. Our head office is located in the German town of Lönigen in the Lower Saxony region – this is where we have our roots. At the same time, we have an international presence with 18 subsidiaries.

**Exceptional range
of products and
services**
