

ABA AQUA

ECONOMICAL AND POWERFUL

ABA aqua® jet cleaning gun

Robust

Easy to handle

Saves water

Durable material

Quick and easy installation

ABA AQUA

Jet cleaning gun

Water-saving technology – durable material

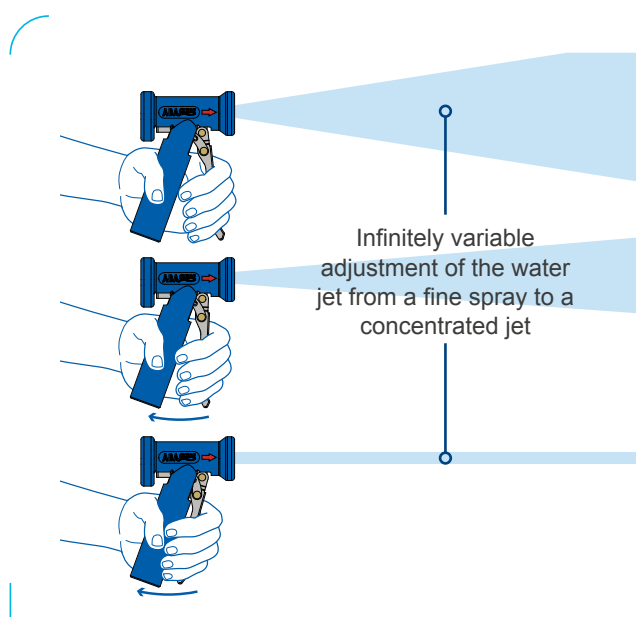

The ABA aqua jet cleaning gun enables powerful cleaning while keeping water consumption at a low level. The infinitely variable regulation of the water jet allows you to adjust it from a fine spray to a concentrated jet, depending on your cleaning requirements.

Water consumption is around 25% lower than conventional models, so it not only saves resources but also cuts

your operating costs.

And you can rest assured that all wetted materials meet the high standards of the German Drinking Water Ordinance, including the requirements of KTW and DVGW W270.

Our cleaning gun is made from a robust brass alloy that guarantees an exceptionally long service life.

CONNECTION VARIANTS

Article no.	Description
1 58070.104.2	with internal thread G 1/2
2 58070.000.2	with connection plug for ABA water plug-in coupling system 3/4
3 58070.004.2	with external thread G 1/2, flat-sealing
4 58070.006.2	with external thread G 3/4, flat-sealing
5 58070.300.2	with half claw coupling
6 58070.204.2	with hose connection piece for hose 1/2 x 13 mm
7 58070.217.2	with hose connection piece for hose 3/4 x 19 mm
8 58070.400.2	with standard system coupling connection
