

FO Distributor MPD24

for Surface Mounting

The MPD24 modular distributor is available in a third housing version for equipping with up to three 3 HU/7 PU front panels for FO adaptors of the types SC, LC, E2000 and ST.

Up to 72 fibres can be patched in the easy to install metal housing by the modular front plates. Mixed assembly of different adaptor types and different fibres is possible with the front plates.

The lid can be snap-mounted or even removed without tools. The bottom part of the housing can be mounted on the wall flush with the plaster. The

cable opening is protected against dust by brushes; the cables are secured by cable ties.

The MPD24 modular distributor is also available in the versions MPD24 AMJ/UMJ (modularly equippable) and MPD24-HS K Cat.6A (with LSA-Plus piercing terminal and RJ45 jacks in category 6A).

Further information about the variants is available under:
www.telegaertner.com

Technical Data

Housing base plate	Sheet steel zinc plated
Housing cover	varnished pure white, RAL 9010
Cover	sheet steel zinc plated
Dimensions	446 x 190 x 50,5 mm
Ground cable AWG11 with terminal	E-Cu-braid with flexible PVC insulation, tin plated
Directive 2011/65/EU	RoHS-compliant

Performance Characteristics

- wall-/surface mounting; housing base with plaster compensation
- for the installation, cover can be locked or removed (tool-less)
- cable strain relief by means of cable tie
- dustproof cable entry with brush strip
- for modular assembly of up to 3 pcs. 3 HU / 7 PU front plates
